	APPENDIX IV: ASYUT CATALOGUE.....	329

APPENDIX I: MAPS AND TABLES

1. MAPS

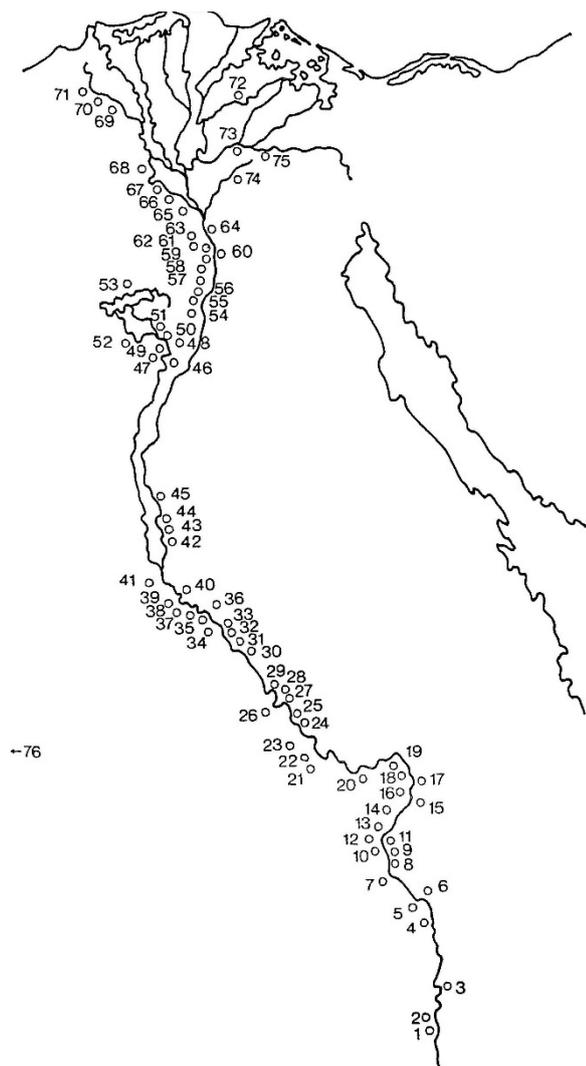

The following maps indicate the relationship between the emergence of royal centres and cemeteries during each time period, the rise of provincial centres and associated necropoleis, and the location of the most important quarries used for construction of tombs and stone funerary fixtures throughout the ancient Egyptian landscape. Clusters of offering tables/trays/soul houses are represented in relation to features mentioned in order to get a general sense of the relationship between material procurement, political influence as well as regional differences.

1.1 NECROPOLIS MAPS

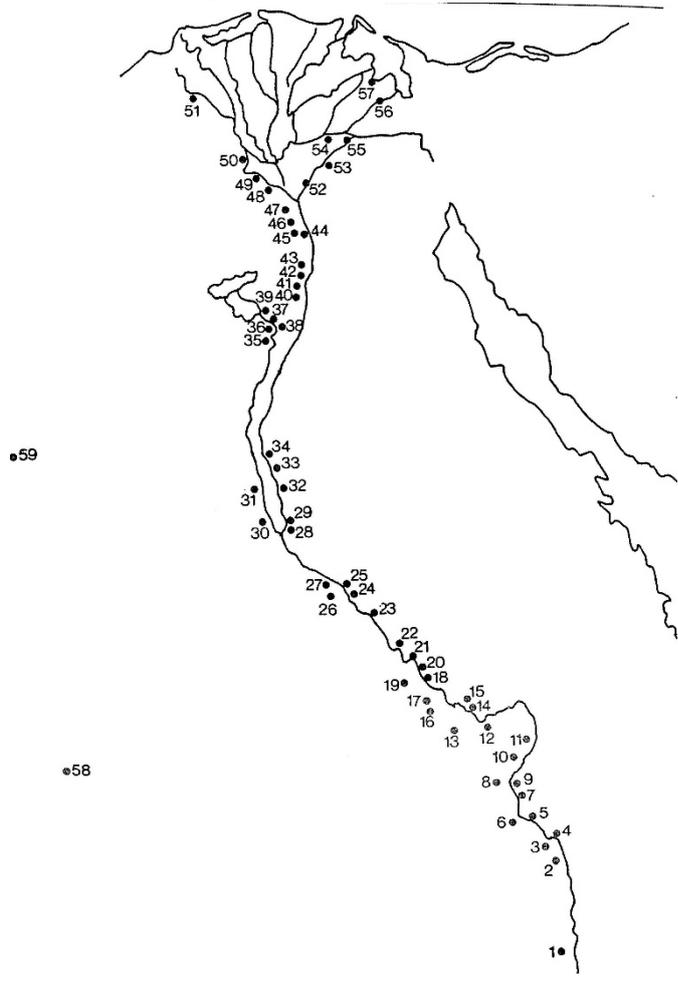

1.1.1. The main royal necropolis across Egypt from the Old Kingdom to the Greco-Roman Period.

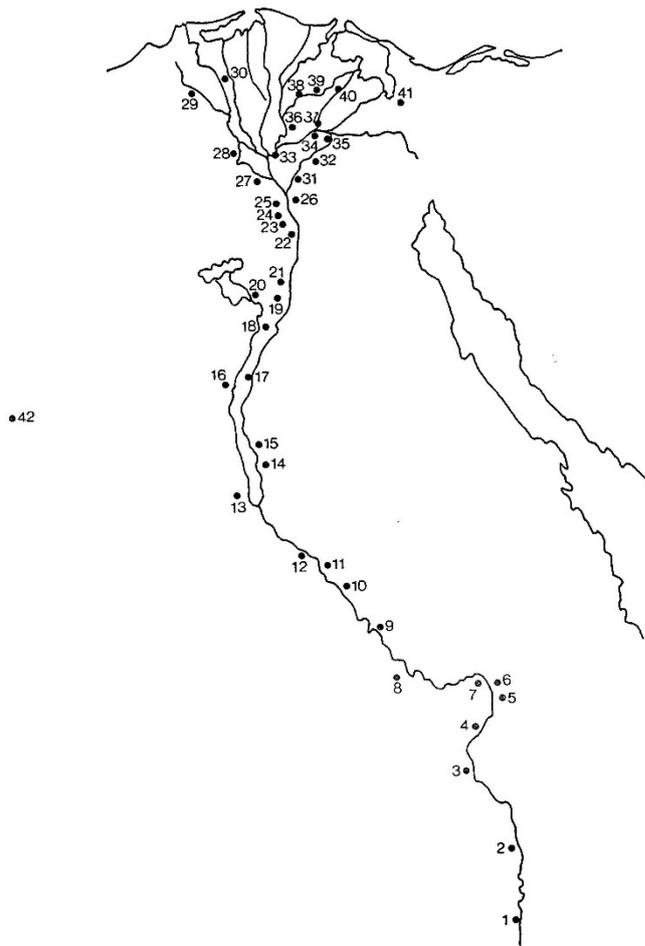

1.1.2. Location of Middle Kingdom necropoleis in Egypt from LÄ 424.

1.1.3. Location of New Kingdom necropoleis in Egypt from LÄ 436.

1.1.4. Location of Late Period necropoleis in Egypt from LÄ 446.

1.2. DATA MAPS

1.2.1. OK Necropoleis and Context of OK Material in the Database.

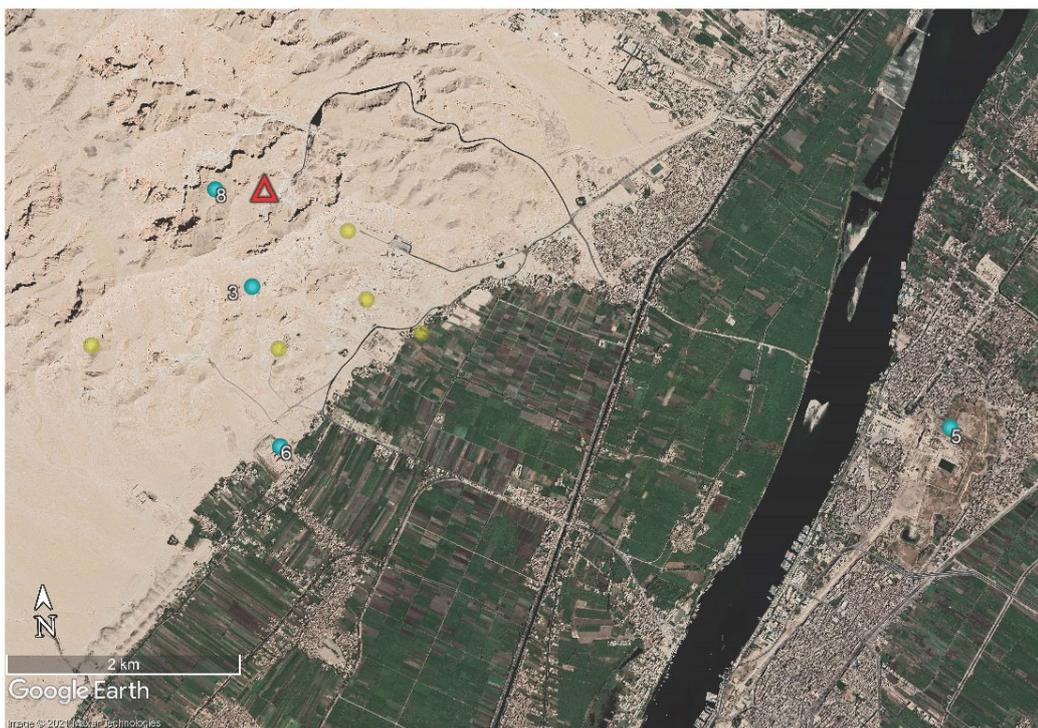

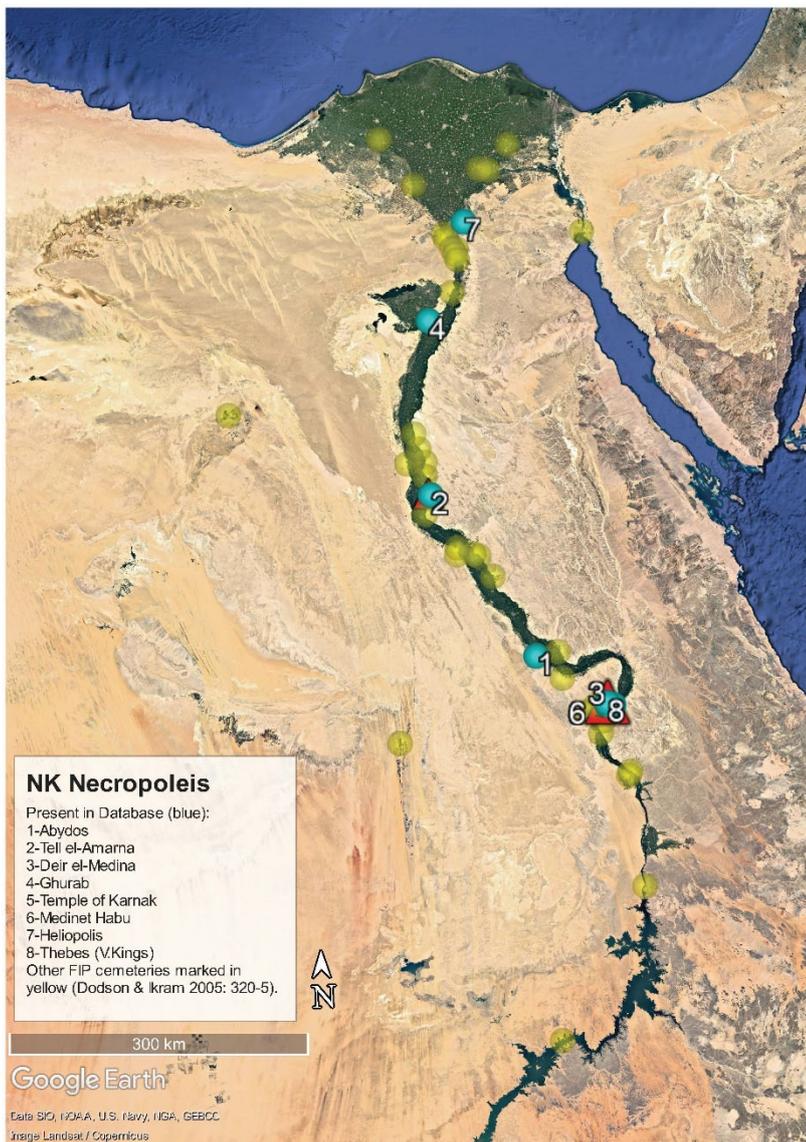

1.2.2. FIP Necropoleis and Context of FIP Material in the Database.

1.2.3. Map 2.3 MK Necropoleis and Context of MK Material in Database

1.2.4. NK Necropoleis and Context of NK Material in the Database.

1.2.5. TIP Necropoleis and Context of TIP Material in the Database.

1.2.6. LP Necropoleis and Context of LP Material in the Database

1.2.7. LP Necropoleis (including sites in Nubia) and Context of LP Material in the Database

1.2.8. G-RP Necropoleis and Context of G-RP Material in the Database.

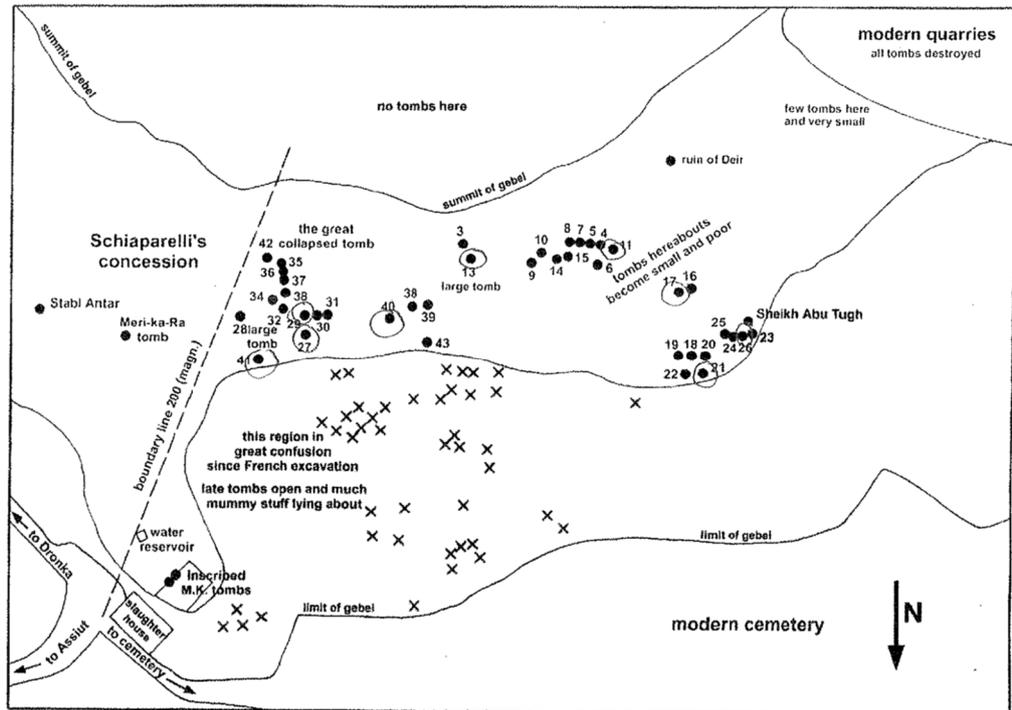

1.2.9. G-RP Necropoleis and Context of G-RP Material in Database (detail).

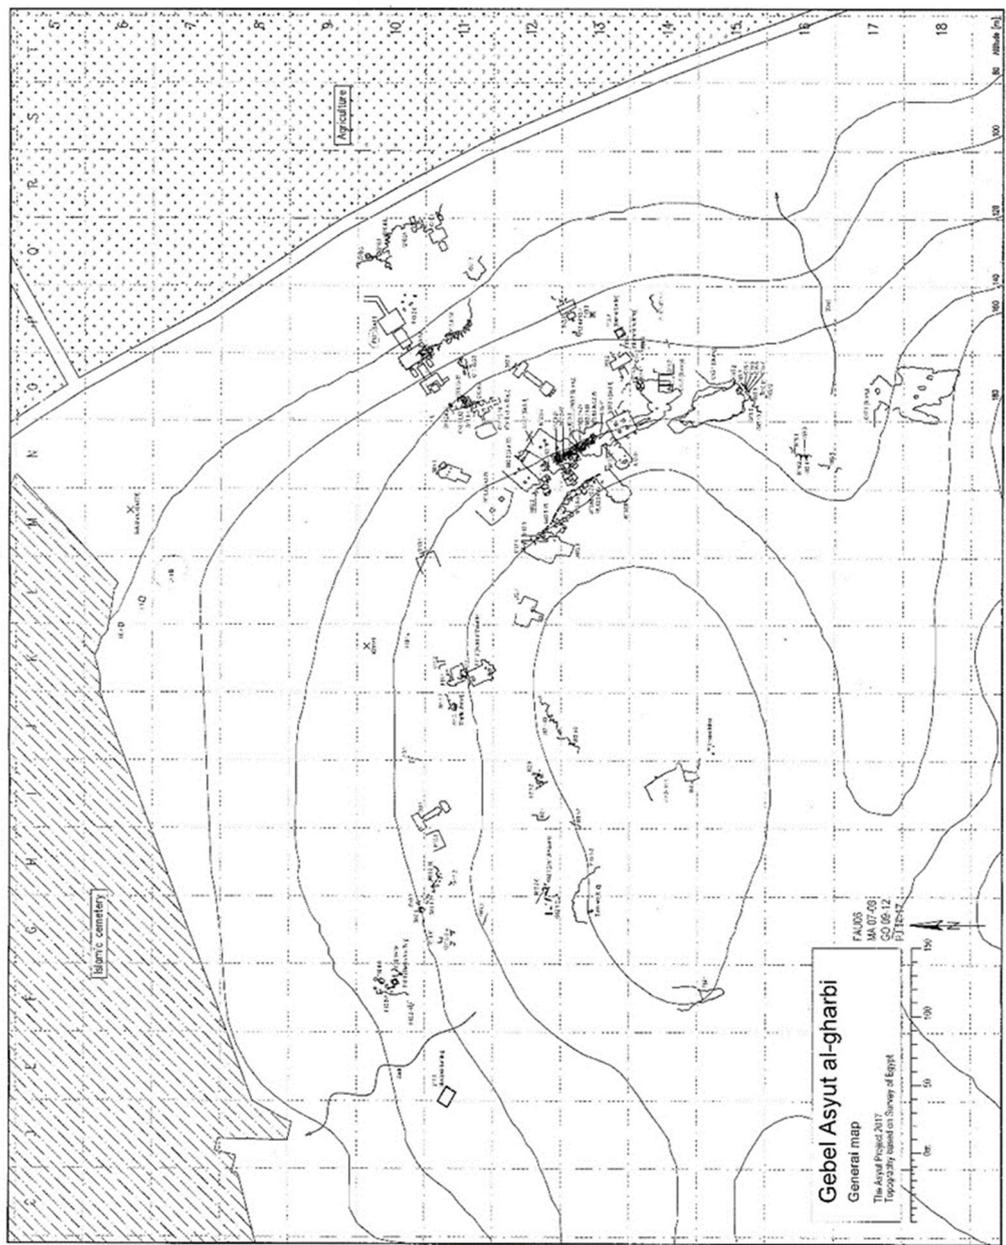

1.3. MAPS OF ASYUT (TAP)

1.3.1. A copy of Hogarth's map of the Asyut necropolis with the locations of the tombs he excavated and associated numbers (from Zitman 2010b: 3, Map 1).

1.3.2. General Map of Asyut al-gharbi (TAP 2017).

2. TABLES AND GRAPHS

2.1. CHAPTER 1 TABLES:

2.1.1. Table 1.1: Chronology based on Quirke 2015 and Shaw 2000.

Time Period	Date Range	Dynasty	Main Centres
(Late) Protodynastic Period	c. 4400-3200 BCE	Amratian (Naqada I) Period Gerzean (Naqada II) Period Naqada III Period/ Dynasty 0	Nekhen? Upper Egypt
Early Dynastic Period	c. 3000-2686 BCE	Dynasty 1-2	Abydos, Memphis (Hierakonpolis)
Old Kingdom (OK)	c. 2686-2160 BCE	Dynasty 3-6 Early = 3-4 Late = 4-6	Memphis
First Intermediate Period (FIP)	c. 2181-2055 BCE	Dynasty 7-11* 7-8th Dynasties mark the beginning of conflict – numerous kings in power	Thebes, Heracleopolis, Memphis
Middle Kingdom (MK)	c. 2055-1650 BCE	Dynasty 11-13 Early = 11-mid 12 Late = 12-mid 13	Thebes, Memphis, Abydos, Lisht, Tell el-Daba
Second Intermediate Period (SIP)	1773--1550 BCE	Dynasty 14-17	Thebes, Tell el-Daba, Hyksos
New Kingdom (NK) <i>Ramesside Period</i>	1550-1069 BCE <i>1295-1069 BCE</i>	Dynasty 18-20	Thebes, Memphis, Akhetaten, PerRamses
Third Intermediate Period (TIP)	1069-664 BCE	Dynasty 21-24 25 = Assyrian Invasions	Thebes, Memphis, PerBast, Ashur
Late Period (LP) <i>Persian and Late Dynastic Periods</i>	664-525 BCE 525-332 BCE	Dynasty 26 (Saite Period) Dynasty 27-31 Achaemenid = 27, Late Dynastic = 28-30, Achaemenid = 31	Thebes, Memphis, Sau <i>Persepolis, Thebes,</i> Memphis, Sau
Greco-Roman Period (GR)* Ptolemaic Period (PP) <i>Roman Period</i>	323-30 BCE 30 BCE – 395 CE	Macedonian Dynasty Ptolemaic Dynasty Roman Imperial Era	??

*The Greco-Roman Period is a term frequently used throughout the thesis. this period covers the Ptolemaic Period and/or Greco-Roman. This is because most of the offering tables and similar objects in the sample from later periods are harder to date since they imitate past royal styles. Nevertheless, sometimes they are within a more accurate range such as the Ptolemaic Period. From the end of the Ptolemaic Period and early Roman period it is hard to differentiate between the two styles, which is why it is better to use the Greco-Roman Period as an umbrella term.

2.2. CHAPTER 2 TABLES:

2.2.1. Nomenclature of the "filling of the Eye" – a list of natural elements and minerals required for filling the Eye of Horus (from Aufrere 1999: 205).

¹ Ce chiffre annonce le jour où la divinité intervient. — ² Ce chiffre correspond au numéro de paragraphe.

2.2.2. The Hermopolitan deities and their definitions.

God and Goddess	Transliteration	Transcription	Definition/form	References
	<i>nnw</i> <i>nnwnt</i>	Nun Naunet	water, inertness The Primordial Waters watery abyss	Faulkner 1977: 134 - RB 111, 15; PT 1078; Urk. V, 170, 13; BD 7, 11.
	<i>kk</i> <i>kk̄t</i>	Kek Kauket	Darkness; "a child about to be born" Frog deity	Faulkner 1977: 287 - Westc.10, 23; RB 111, 8, 177, 15; CT I, 161; Wilkinson 2003: 16.
	<i>hh</i> <i>hh̄t</i>	Heh Hauhet	formlessness, million, infinity shown as a male figure with upraised arms	Faulkner 1977: 176; Wilkinson 2003: 109-10.
	<i>imn</i> <i>imnt</i> <i>tmnw</i> <i>tmnt</i>	Amun Amaunet Temenu Temenet	hiddenness, wind "The Hidden One" - Snake deity Hidden, secret, to create lostness, gloom	Faulkner 1977: 21, 299 -Amun; Siut pl. 5, 239; PT 434; CT II 4.6.

2.2.3. Definitions of the term *k3*

<i>k3</i> definitions	Translit./Gardiner	Definition	Reference
	<i>k3</i> (D28, 29)	"creative strength', 'personality', double, omnipresent force.	Wilson 1997: 1073, Wb. V 86 (10)-89;
	<i>k3</i>	Name, <i>k3</i> and name (rn) sometimes referred to as one entity.	PT S908b; CT III 350; D 22; Wilson 1997: 1079.
	<i>k3</i>	mast or pole, part of ritual <i>sḥk3 shnt</i> "erecting the pole of the sHnt tent". First in chapel of Senwosret I Karnak for tent of Min.	CdE 28, 1953, 13-22 in Wilson 1997: 1078.
	<i>k3/sk</i> G60	to call upon or name. Dates to NK, GR. The verb is used to name places or persons such as <i>k3.tw r</i> "Place of Eternity", replacing r with a city.	Dendera, Wb V 85 (6)-86 in Wilson 1997: 1079.
	<i>k3, ih</i> E1, 2	Bull – a symbol of strength and fertility, qualities which are added to the <i>k3</i> , stressing its definition as a "life force". Gods usually embody bulls, e.g., primordial gods labelled as "bulls who copulate"	Wb. V 94 (7)-96 (8) Pyr; in Wilson 1997: 1075.

	<i>k3w</i>	Provisions. It appears from the MK onwards in offering texts with the determinative X4E. It may be a generic term for food offerings, but the term <i>k3</i> for offerings is older. <i>k3w</i> is the material form of sustenance.	Wb. V 91-92 MK in Wilson 1997: 1080.

G: Abflußrinnen und -kanäle
H: Kniefiguren
I: Hathorköpfe bzw. Hathorembieme
J: Zwickelflächen

2.3.4. Initial categorisation of offering tables/basins/models and offering trays based on Hölzl 2002 and Petrie 1907.

Hölzl /Lundius Categorisation	# Offering Tables/Basins	#Offering Trays
A1	7	13
A2	16	13
A1/A2	0	2
A2/∩*	0	5
B1	29	3
B2	41	7
B1/B2	1	0
B2/∩*	0	4
C1	2	0
C2	29	1
A+B	5	1
B+C	51	1
A+C1	1	0
A+C2	6	1
A+B+C1	1	0
A+B+C2	7	0
∅	49	10
∩*	0	22
∅/∩*	0	1
∅/PA*	0	3
A1/PA*	0	1
B2/PC*	0	1
Grand Total	245	89

*The highlighted types in yellow are a reflection of Petrie's Types (i.e., PA and PC) and personal observations of shape such as the "horseshoe" shape described by Petrie which is represented as "∩" in the table.

Typology and categorisation of the offering tables in the sample were subsequently amended according to the typology described by Hölzl (2002) for stone offering tables and basins. For pottery offering trays and plates the categorisation proposed by Tooley (1989) was consulted, and Flinders Petrie (1907) for soul houses. The initial categorising stages described above allowed for a definition of specific objects, as well as placing them within a potential archaeological context and time-period, facilitating the following typologies based on other studies. A few similarities between stone table and basin design could be evidenced in pottery offering trays. An initial categorisation based on personal observations and Petrie (1907)'s categorisation of soul houses (Petrie's Type A is equivalent to this study's Type C) was made. The initial typological analysis of offering trays is outlined in the table above.

2.3.5. Old Kingdom (c. 2686-2160 BC) (based on Hölzl 2002: 13-26).

Main criteria:

∅ No main features

A. Round depressions/platforms

B. Basins

C. Cakes, i.e. *hṯp* sign

Additional features in the Old Kingdom:

D. Raised rim, or “frame” (“Umrahmung”). This is usually around a drainage canal.

E. Internal spout structure (“Ausgussoffnung »).

F. External spout structure (« Hervorstehender Ausguss“)

G. Drainage canal(s) („Abflusssinnen und Kanäle“)

TYPES AND VARIANTS (# PRESENT IN CATALOGUE)	DESCRIPTION	Examples in Holzl (2002)	Examples in Catalogue	Archaeological Contexts
Type ∅ No examples in database	Rectangular or irregular shaped tables with no main features present. They may have served as a base for other tables and/or cult ware. They are occasionally manufactured by mud-brick and placed in front of a cult fixture, e.g. funerary stele	Giza – AR-1, AR-2, AR-67	n/a	n/a
Type A A1: 1 limestone offering table (2 pottery offering trays) A2: No examples in the database	A1: Round offering tables/trays. They may have a round elevated platforms on a rectangular/square base. A2: Offering tables with round elevations or depressions (basins). They are usually rectangular in shape. The round features may represent “washing sets” used during purification rituals.	CG1304, 1305, 1307, Turin N.22002, CG1306	CAT ID 119	Unknown
Type B B1: 24 stone offering basins B2: 12 stone offering tables Variations: B+D+F+G	B1: Rectangular offering basins, occasionally with sloping internal and external edges. They may also be “stepped”, i.e. double-rimmed, with the outermost rim inscribed B2: Offering tables with square/rectangular basin(s). Tables with more than four basins are rare during this time period.	CG1324, 1348, 1353, 1326, 1334, 1336, 1343, 1352, 1360, 1367, 57006, 57007 Berlin 11465 BM EA 65953, 68176, 68231 UC 8578, 16406, 19658, Manchester 1751, Ashm. E3923, Turin N. 22004, MFA 31-1-87, MFA 12.1481	CAT ID 17; 165; 227; 258; 259; 260; 262; 292; 308; 322; 324; 326; 327; 328; 331; 332; 333; 334; 335; 336; 337; 338; 339; 340 CAT ID 79; 58; 67; 68; 102; 117; 118; 159; 229; 256; 291; 309	Abusir Giza Saqqara (Sacred Animal Necropolis, North Saqqara)
Type C C1: no examples in the database C2: 2 stone offering tables C+D	C1: offering tables shaped like a <i>Htp</i> -sign, meaning that the table serves as the “mat” for the sign of the bread. C2: offering tables with representations of the <i>Htp</i> sign. The mat itself is not depicted in detail, or sometimes not at all, on OK offering tables.	CG1373, 1370, BM EA1345, MFA 12.1513,	CAT ID 257; 372	Giza Saqqara (Mastaba D2, north of the great Pyramid, a few steps south of enclosure)

Type A+B 1 stone offering table	Offering tables with round elevations (platforms)/depressions as well as regular-shaped basins. These tables are usually rectangular in shape with round platforms and basins combined in a variety of ways. Offering tables with round raised platforms/basins and more than three regular basins are rare.	CG1330, 1366, 57008, 57027, 57028, JE89379 Berlin 1201, UC 14445, MFA 06.1883	CAT ID 69; 255	Saqqara (Iriu-ka-Ptah Tomb) Giza
Type A+C A+C1: 1 stone offering table A+C2: 1 stone offering table	A+C1: Round offering tables with a <i>hnp</i> sign. There are not many examples of these tables during the OK. The mat and bread of the <i>hnp</i> sign usually cover the central area of the table. A+C2: Offering tables with round platforms/basins and a <i>hnp</i> sign.	Leiden AM9, CG 1328, 1332, Berlin 1139, 1159	CAT ID 54; 196	
Type B+C 8 stone offering tables Variations: B+C+D B+C+F+G B+C+E+G B+C+D+E B+C+D+E+G B+C+D+F+G	Offering tables with regular-shaped basins and representations of the <i>hnp</i> sign. These tables may have up to six basins, although the most common layout is a central <i>hnp</i> sign sided by a rectangular basin on either side. This type extends into the FIP. Offering tables with more than one <i>hnp</i> sign are documented during the OK.	CG 1331, 1335, 1347, 1355, 1363, 1369, 1372, 57016, 57025, 57030, Berlin 11574, 11575	CAT ID 14; 57; 64; 66; 145; 325; 329; 330	Tarkhan Abusir Giza
Type A+B+C A+B+C1: No examples in database A+B+C2: 4 examples in database Variations: A+B+C+D A+B+C+D+F	A+B+C1: Round offering table with round platforms/basins, regular basins and a <i>hnp</i> sign. Type "A" is featured twice since the round shape is the round platform, as well as the round elements present. A+B+C2: offering table with round platforms/basins and a <i>hnp</i> sign. Two basins are usually present in this type.	CG1329, JE53151, CG 1354, 57029, Berlin 7725, BM EA 1156B, 1179,	CAT ID 65; 131; 149; 295	Saqqara

2.3.6. First Intermediate Period (c. 2160-2055 BC)

Main criteria:

- A. Round depressions/platforms
- B. Basins
- C. Cakes, i.e., *htp* sign

Additional features in the FIP:

- D. Raised rim, or “frame” (“Umrahmung”), usually located around a drainage canal.
- E. Internal spout structure (“Ausgussoffnung »).
- F. External spout structure (« Hervorstehender Ausguss“)
- G. Drainage canal(s) („Abflussrinnen und Kanäle“)

TYPES AND VARIANTS (# PRESENT IN CATALOGUE)	DESCRIPTION	Examples in Catalogue	Archaeological Contexts
Type A A1: 4 pottery offering trays present in the database A2: 6 pottery offering trays Variations: A+D+E+G	A1: Round offering tables/trays. Oval pottery trays with t-shaped canals begin to emerge from the late OK and well into the MK. A2: Offering tables with round elevations or depressions (basins). Numerous pottery offering trays with circular basins and vertical canals, may be referring to reproductive systems.	CAT ID 188	Asyut
Type B B1: no examples in database B2: 2 stone offering tables, 1 pottery offering tray Variations: B+E+F+G	B1: Rectangular offering basins with sometimes sloping internal and external edges. Not present in database. B2: Offering tables with square/rectangular basin(s). Usually two basins are incorporated in the design.	CAT ID 142; 303	Dendera
Type B+C 5 stone offering tables Variations: B+C+E+F+G B+C+D+E+F+G	Offering tables with regular-shaped basins and representations of the <i>htp</i> sign. The basins and <i>htp</i> sign are combined in numerous ways and the number of basins and their arrangement on the table vary significantly.	CAT ID 171; 183; 185; 191; 236	Asyut Saqqara

2.3.7. Middle Kingdom (c. 2055-1650 BC) (based on Hölzl 2002: 27-38)

Main criteria:

- ∅ No main features
- A. Round depressions/platforms
- B. Basins
- C. Cakes, i.e. Htp sign

Additional features in the Middle Kingdom:

- D. Raised rim, or “frame” (“Umrahmung”), usually located around a drainage canal.
- E. Internal spout structure (“Ausgussoffnung »).
- F. External spout structure (« Hervorstehender Ausguss“)
- G. Drainage canal(s) („Abflussrinnen und Kanäle“)

TYPES AND VARIANTS (# PRESENT IN CATALOGUE)	DESCRIPTION	Examples in Holzl (2002)	Examples in Catalogue	Archaeological Contexts

Type Ø 1 stone offering table and 2 offering table models/ amulets, 9 pottery offering trays	Rectangular or irregular shaped tables with no main features present. The internal area within the table is surrounded by a raised rim (D). Most of the surface may be covered in representations of offerings but no additional “watery” features such as basins and/or canals.	CG23013	CAT ID 76; 78; 12; 55; 56; 62; 83; 98; 101; 103; 115; 116; 121; 124; 136; 181; 182; 184; 195; 198; 214; 271; 272; 274; 279; 280; 281; 293; 296; 319; 341; 342; 344; 373; 374; 375; 376; 377; 378; 379; 380; 384; 393	Unknown
Type A A1: 1 example in database, 2 pottery offering trays A2: 1 stone offering table, 8 pottery offering trays	A1: Round offering tables/trays. Hözl (2002) does not document any from the MK. However, there are numerous oval pottery offering trays. A2: Offering tables with round elevations or depressions (basins). Hözl (2002) only documents one offering table from the 13 th Dynasty with round basins and a frame (D). Pottery offering trays with circular features have been recorded in the current study, some phallic in design.	CG23040	CAT ID 344; 376	Riqqeh
Type B B1: 2 pottery basins B2: 4 stone offering tables, 7 pottery offering trays Variations: B+D+E+F+G	B1: Rectangular offering basins with occasionally sloping internal and external edges. No simple offering basins have been documented by Hözl (2002). One pottery offering basin is recorded in the current study. B2: Offering tables with square/rectangular basin(s). Tables may have up to four basins, usually in the vicinity of the spout and connected via canals.	MMA 30.8.230, CG57021, 23023, 23058	CAT ID 98; 121; 124; 280	El-Kab
Type C C1: 1 offering table model/ amulet C2: 5 stone offering tables Variations: C+F+D	C1: offering tables shaped like a <i>hup</i> -sign. Only one example is documented by Hözl (2002) study. One example of in the current study is that of a miniature model/amulet. C2: offering tables with representations of the <i>hup</i> sign. The depiction of just the “cake” without the mat is also common and all tables have additional features. When included, the mat is often depicted with detail (i.e., mesh).	CG23008, 23001, 23005, 23035, 23083, 23109, 23248, UC16150	CAT ID 76; 296; 373; 375; 377; 393	El-Lahun
Type A+B No examples in database	Offering tables with round elevations (platforms)/depressions as well as regular-shaped basins. Hözl (2002) documents no examples in the MK .	n/a	n/a	n/a

<p>Type A+C</p> <p>A+C1: No examples in database A+C2: 2 stone offering tables, 1 pottery offering tray</p> <p>Variations: A+C+D+E+F</p>	<p>A+C1: Round offering tables with a <i>h̑tp</i> sign. Hölzl (2002) only documents one example, a miniature offering table from Meir. A+C2: Offering tables with round platforms/basins and a <i>h̑tp</i> sign. Examples from the MK only have round basins and no round platforms.</p>	<p>CG23009, 23073, 23074, Berlin 1189, Leiden AM12</p>	<p>CAT ID 195; 380</p>	<p>Abydos</p>

2.3.8. Table 3.9: New Kingdom (c. 1550-1069 BC) (based on Hölzl 2002: 39-47)

Main criteria:

Ø No main features

A. Round depressions/platforms

B. Basins

C. Cakes, i.e., *hnp* sign

Additional features in the New Kingdom:

D. Raised rim, or “frame” (“Umrahmung”), usually located around a drainage canal.

E. Internal spout structure (“Ausgussoffnung »).

F. External spout structure (« Hervorstehender Ausguss“)

G. Drainage canal(s) („Abflusrrinnen und Kanäle“)

H. Kneeling figures

I. Hathor heads

J. “Gussets” i.e., additional surfaces on either side of the spout within the external spout structure

TYPES AND VARIANTS (# PRESENT IN CATALOGUE)	DESCRIPTION	Examples in Hölzl (2002)	Examples in Catalogue	Archaeological Contexts
<p>Type Ø</p> <p>Variations: Ø +D+E Ø +D+F Ø +D+J</p> <p>1 stone offering table and 2 offering table models/ amulets, 9 pottery offering trays</p>	<p>Rectangular or irregular shaped tables with no main features present. The internal area within the table is surrounded by a raised rim (D). These tables are very similar to those in MK. A new additional feature in the NK is that of having “gusset” surfaces (J) attached to either side of the spout creating a drainage canal (Hölzl 2002:39).</p>	<p>CG23077, 23079, BM EA420</p>	<p>CAT ID 10; 123; 283; 311</p>	<p>Amarna, possibly Heliopolis (Memphite Region)</p>
<p>Type A</p> <p>Variations: A+D+E A+D+F</p> <p>A1: 1 example in the database, 2 pottery offering trays</p> <p>A2: 1 stone offering table, 8 pottery offering trays</p>	<p>A1: Round offering tables/trays. Hölzl (2002) does not document any from the NK. However, there is at least one oval pottery offering tray in the database. A2: Offering tables with round elevations or depressions (basins). This type is quite rare during the NK and always include a frame (D) and spout structure (E and/or F)</p>	<p>CG23071, Turin N.22052</p>	<p>CAT ID 164</p>	<p>Deir el-Medina</p>
<p>Type B</p> <p>B1: 2 pottery basins</p> <p>B2: 4 stone offering tables, 7 pottery offering trays</p> <p>Variations: B1+D+H B1+D+I B2+D+E+F+G</p>	<p>B1: Rectangular/ circular offering basins. Rectangular basins are very similar to those from the OK, double-rimmed and with sloping sides. An important feature emerges during this period which includes a representation of a deity (i.e., Hathor (I)) or a kneeling figure (H) on the external rim (D). B2: Offering tables with square/rectangular basin(s).</p>	<p>CG23086, 23087, JE45626, BM EA28, 108, 465, 1301, Berlin 19900, Turin N.22030, 22031, 22034, Wein AS50, BM EA1511, UC2242, Leiden AM36</p>	<p>CAT ID 80; 13; 187; 194; 203; 280</p>	<p>Amarna</p>

	Table may have up to six basins, usually in the vicinity of the spout and connected via canals. The basins are generally located close to the external spout.			
Type C C1: 1 offering table model/ amulet C2: 5 stone offering tables Variations: C2+D+E+F C2+D+F+J C2+D+E+F+J	C1: offering tables shaped like a <i>hup</i> -sign. Only one example is documented by Hölzl (2002). C2: offering tables with representations of the <i>hup</i> sign. This type is very frequent during the NK. In addition to the central Htp sign with incorporated mat, a second <i>hup</i> sign may be represented by the external spout end. The spout itself may be shaped as the bead sign. Gusset surfaces (J) with straight or rounded sides may be added. Type A+B No examples in database	Offering tables with round elevations (platforms)/depressions as well as regular-shaped basins. Hölzl (2002) documents no examples in the NK .	n/a	n/a	n/a
Type A+C A+C1: No examples in database A+C2: 2 stone offering tables, 1 pottery offering tray Variations: A+C+D+F+G	A+C1: Round offering tables with a Htp sign. Hölzl (2002) documents no examples in the NK . A+C2: Offering tables with round platforms/basins and a Htp sign. Hölzl (2002) only documents one example belonging to Thutmose III. There is one example of a stone offering table in this study.	JE88803	CAT ID 199; 381; 394	Unknown
Type B+C 24 stone offering tables Variations: B+C+D B+C+E+F+G B+C+E+G B+C+D+E	Offering tables with regular-shaped basins and representations of the Htp sign. A maximum number of four basins are documented in Hölzl (2002) study. This is a significantly lower number compared to the countless variations during the MK. The Htp signs are also significantly smaller in size.	CG23084, 23094, 23096, Fitzw. E.275.1900, Manchester 1635 Turin N.22047	ID 25 134 144 158 230 279	Abydos, Thebes
Type A+B+C A+B+C1: No examples in database A+B+C2: 2 stone offering tables Variations: A+B+C+D A+B+C+D+F	A+B+C1: Round offering table with round platforms/basins, regular basins and a Htp sign. Hölzl (2002) only documents one example, which is an imitation to OK offering tables (Hölzl 2002:41, 47). A+B+C2: offering table with round platforms/basins and a Htp sign. Rectangular offering tables of this type are very rare.	CG23091, 23020	n/a	n/a

2.3.9. Third Intermediate Period (c. 1069-664 BC)

Main criteria:

∅ No main features

A. Round depressions/platforms

B. Basins

C. Cakes, i.e., *htp* sign

Additional features in the TIP:

D. Raised rim, or “frame” (“Umrahmung”), usually located around a drainage canal.

E. Internal spout structure (“Ausgussoffnung”).

F. External spout structure (« Hervorstehender Ausguss»)

G. Drainage canal(s) („Abflussrinnen und Kanäle“)

H. Kneeling figures

K. Cartouche designs

L. Bale/loop for suspension on models/amulets

TYPES AND VARIANTS (# PRESENT IN CATALOGUE)	DESCRIPTION	Examples in Catalogue	Archaeological Contexts
Type ∅ Variations: ∅ +F ∅ +D+F+L ∅ +D+E+F+G+L 3 models/ amulets	Rectangular or irregular shaped tables with no main features present. The internal area within the table is surrounded by a raised rim (D). This is the most common type for amulets and/or models which begin to become popular from the TIP onwards. An additional feature on these types is the presence of a bail (L) at the opposite end of the spout structure indicating the object's use as a pendant.	CAT ID 277; 278; 367	El-Lahun
Type A Variations: A+D+F+K A2: 1 offering table	A1: Round offering tables/trays. Not present in the database. A2: Offering tables with round elevations or depressions (basins). Only one example in the database with oval, cartouche-shaped (K) basins and v-shaped external spout structure (F).	CAT ID 345	Tarkhan
Type B B1: 2 offering basins B2: 1 offering table Variations: B1+D+K B1+D+H B2+D+F	B1: Rectangular/ circular offering basins. After the NK, cartouche-shaped (K) basins start to become more popular. Two examples are present in database. One from Kafr Ammar is cartouche-shaped (K) with a rim (D) and the other from Gebelein is circular with a ledge, a kneeling figure (H) and crocodile. B2: Offering tables with square/rectangular basin(s). As noted earlier, from the NK basins begin to become deeper and cover more than half of the table, like the example in the database.	CAT ID 15; 169; 343	El-Riqqa, Gebelein, Tarkhan

Type C C2: 2 stone offering tables, 1 model Variations: C2+ D+E+F C2+ D+F	C1: offering tables shaped like a Htp-sign. Not present in the database C2: offering tables with representations of the Htp sign. Similar to the type common during the NK, an additional Htp sign is added by the external spout end. One of the examples is a very detailed miniature model of an offering table in limestone with its surface originally painted red.	CAT ID 151; 371; 386	Medinet Habu (Thebes), Tanis
Type A+B+C A+B+C1: No examples in database A+B+C2: 1 stone offering table Variations: A+B+C+ D+F	A+B+C1: Round offering table with round platforms/basins, regular basins and a Htp sign. No examples in the database A+B+C2: offering table with round platforms/basins and a Htp sign. A fairly unique offering table is present in the database with a central round, nmst-vase-shaped basin leading to an external spout structure with the depiction of a Htp sign.	CAT ID 150	

2.3.10. Late Period (664-525 BC)

Main criteria:

∅ No main features

A. Round depressions/platforms

B. Basins

C. Cakes, i.e. Htp sign

Additional features in the New Kingdom:

D. Raised rim, or “frame” (“Umrahmung”), usually llocated around a drainage canal.

E. Internal spout structure (“Ausgussoffnung »).

F. External spout structure (« Hervorstehender Ausguss“)

G. Drainage canal(s) („Abflussrinnen und Kanäle“)

H. Kneeling figures

K. Cartouche designs

L. Bale/loop for appendature on models/amulets

M. Aquatic animals and other deities

TYPES AND VARIANTS (# PRESENT IN CATALOGUE)	DESCRIPTION	Examples in Catalogue	Archaeological Contexts
Type ∅ Variations: ∅ + D+E ∅ + D ∅ + D+F+H+L 2 stone offering tables 2 models/ Amulets 13 bronze pendants	Rectangular or irregular shaped tables with no main features present. The internal area within the table is surrounded by a raised rim (D). The two stone offering tables present in the database lack an external spout structure but have a deep central sunken area with a surrounding rim. There are 15 miniature models/ amulets of this type, only two of which are not elaborate bronze pendants (L). The bronze pendants may have a kneeling figure (H) as well as aquatic animals and other haloed deities (M).	CAT ID 77; 11; 41; 81; 84; 114; 217; 226; 244; 250; 251; 273; 297; 306; 307; 311; 314	Armant, Saqqara (H5-1556), Medinet Habu

<p>Type A</p> <p>Variations: A+G A+D+F</p> <p>A1: 1 example in database</p> <p>A2: 1 stone offering table</p>	<p>A1: Round offering tables/trays. One impressive monumental offering table is present in the database from Memphis is present in the database. It has a central depression and inscriptions around the cylinder.</p> <p>A2: Offering tables with round elevations or depressions (basins). One example in the database with four circular basins.</p>	<p>CAT ID126; 167</p>	<p>Memphis (?)</p>
<p>Type B</p> <p>B2: 3 stone offering tables</p> <p>Variations: B2+D+E+F+G B2+D+F</p>	<p>B1: Rectangular/ circular offering basins. No examples in database.</p> <p>B2: Offering tables with square/rectangular basin(s). Three different offering tables, one of which has a deep central basin with four interlinking staircases, a style gaining popularity into the PP.</p>	<p>ID70; 318</p>	<p>Abusir (El-Meleq),</p>
<p>Type C</p> <p>C1: 1 offering table model/ amulet</p> <p>C2: 9 stone offering tables, 3 amulets/ models</p> <p>Variations: C1+D+F+G+L C2+D+F C2+D+F+G C2+D+L C2+D+F+L</p>	<p>C1: offering tables shaped like a Htp-sign. Only one example present in the database, in the form of a small faience amulet from Matmar. C2: offering tables with representations of the Htp sign. The most common type during this time-period as it was during the NK. The mat is usually decorated and two Htp signs are quite common, with one incorporated in the spout structure (F). One amulet is made of schist stone which is quite rare since most are made in faience, or bronze.</p>	<p>CAT ID82; 133; 189; 193; 220; 248; 276; 290; 370; 385; 387; 388</p>	<p>Matmar, Saqqara, Thebes</p>
<p>Type A+C</p> <p>A+C2: 1 stone offering table</p> <p>Variations: A+C+D+F+K</p>	<p>A+C1: Round offering tables with a Htp sign. No examples in database</p> <p>A+C2: Offering tables with round platforms/basins and a Htp sign. The only example in the database is as stone offering table from Saqqara with two large and deep cartouche-shaped basins (K) on either side of a central table area with a decorated Htp sign,</p>	<p>CAT ID348</p>	<p>Saqqara (near Nectanebo Temple)</p>
<p>Type B+C</p> <p>2 stone offering tables</p> <p>Variations: B+C+D+E+F+G</p>	<p>Offering tables with regular-shaped basins and representations of the Htp sign. Both offering tables are very similar to the types seen during the late MK with multiple basins and interlinking canals. One of the tables is even a “multiple”, combining three tables into one.</p>	<p>CAT ID132; 138</p>	<p>Akhmim</p>
<p>Type A+B+C</p> <p>A+B+C1: 1 stone offering table</p> <p>Variations: A+B+C+D A+B+C+D+F</p>	<p>A+B+C1: Round offering table with round platforms/basins, regular basins and a Htp sign. The circular offering table from Thebes is an imitation of earlier OK designs, reintroducing the “washing set”, as well as a seven-oils palette.</p> <p>A+B+C2: No examples in database</p>	<p>CAT ID190</p>	<p>Thebes (Tomb of Montuemhat)</p>

2.3.11. Ptolemaic Period (c. 323-30 BC)

Main criteria:

- Ø No main features
- A. Round depressions/platforms
- B. Basins
- C. Cakes, i.e. Htp sign

Additional features in the New Kingdom:

- D. Raised rim, or "frame" ("Umrahmung"), usually located around a drainage canal.
- E. Internal spout structure ("Ausgussoffnung »).
- F. External spout structure (« Hervorstehender Ausguss")
- G. Drainage canal(s) („Abflussrinnen und Kanäle")
- H. Kneeling figures
- J. "Gussets" i.e. additional surfaces on either side of the spout in the external spout structure

K. Cartouche designs

L. Bale/loop for appendature on models/amulets

M. Deities and aquatic animals

TYPES AND VARIANTS (# PRESENT IN CATALOGUE)	DESCRIPTION	Examples in Catalogue	Archaeological Contexts
Type Ø Variations: Ø + D+F Ø + D+F+G+J Ø + D+F+H+L+M 2 stone offering tables, 2 bronze models/ amulets	Rectangular or irregular shaped tables with no main features present. The internal area within the table is surrounded by a raised rim (D). Two offering tables present in the sample, one of which has "gussets" (J) as those in the NK.	CAT ID22; 113; 218; 302	Esna
Type A Variations: A+D+G+K A2: 1 stone offering table	A1: Round offering tables/trays. Not present in the database A2: Offering tables with round elevations or depressions (basins). One stone offering table present in the database appears to have been equipped with two cartouche-shaped basins (K).	CAT ID170	
Type B B2: 8 stone offering tables Variations: B2+D B2+D+E+F B2+D+E+F+G	B1: Rectangular/ circular offering basins. Not present in the database. B2: Offering tables with square/rectangular basin(s). Most offering tables of this type have a central basin with a staircase as the internal spout structure (E) or several staircases interlinked and descending. This seems to be a common feature from LP onwards, perhaps alluding to sacred lakes.	CAT ID74; 1; 16; 122; 130; 137; 285; 304; 391	Akhmim, Berenike, Dendera, Tell el-Rataba
Type C C2: 2 stone offering tables Variations: C2+D+F	C1: offering tables shaped like a Htp-sign. Not present in the database. C2: offering tables with representations of the Htp sign. The Htp sign continues to be very detailed with mesh outlined in the mat. On the two offering tables the central Htp sign is accompanied by other breads and/or offerings placed on the mat.	CAT ID282; 312	Hermopolis (Ashmunein, Khemenu ?)
Type A+C A+C2: 3 stone offering tables Variations:	A+C1: Round offering tables with a Htp sign. No examples in database. A+C2: Offering tables with round platforms/basins and a Htp sign. A large offering table has two Htp signs, with one of them incorporated on the spout. The external	CAT ID146; 148; 389	

A+C+D A+C+D+F+K A+C+D+E+F+G	spout edge is lined with four cylinders forming circular basins at the top. Another offering table is very similar to one classified as A+C in the LP, with two large and deep cartouche basins (K).		
Type B+C 1 stone offering table Variations: B+C+D+F	Offering tables with regular-shaped basins and representations of the Htp sign. Only one offering table can be firmly attested to this time period – a table from Dendera with two large symmetrical Htp signs covering most of the central area, similar to the “multiple” tables.	CAT ID138; 263; 320	Dendera

2.3.12. Greco-Roman Period (30 BC-640 AD)

Main criteria:

Ø No main features

A. Round depressions/platforms

B. Basins

C. Cakes, i.e., Htp sign

Additional features in the New Kingdom:

D. Raised rim, or “frame” (“Umrahmung”), usually located around a drainage canal.

E. Internal spout structure (“Ausgussoffnung »).

F. External spout structure (« Hervorstehender Ausguss“)

G. Drainage canal(s) („Abflusssinnen und Kanäle“)

H. Kneeling figures

J. “Gussets” i.e. additional surfaces on either side of the spout in the external spout structure

K. Cartouche designs

TYPES AND VARIANTS (# PRESENT IN CATALOGUE)	DESCRIPTION	Examples in Catalogue	Archaeological Contexts
Type Ø Variations: Ø +D+F Ø +D+F+J Ø +D+E+F 3 stone offering tables	Rectangular or irregular shaped tables with no main features present. The internal area within the table is surrounded by a raised rim (D). Two tables are present in the database, one of them has a unique labyrinth design consisting of numerous openings and compartments with two small rounded spouts at one end. While another has “gussets” (J) common to these later periods.	CAT ID32; 154; 298	Esna
Type A Variations: A+D+F+G+K A+D+E+G+K+J A2: 2 stone offering tables	A1: Round offering tables/trays. No offering tables in database A2: Offering tables with round elevations or depressions (basins). The basins in both tables are oval/cartouche-shapes (K), one has “gussets” (J) close to spout.	CAT ID288; 321	
Type B B2: 4 stone offering tables Variations: B2+F B2+D+E+F+G	B1: Rectangular/ circular offering basins. Not present in database. B2: Offering tables with square/rectangular basin(s). Tables have one central basin and all have up to four staircases incorporated in the design.	CAT ID201; 231; 289; 316	Armant

Type B+C 1 stone offering tables Variations: B+C+E+G	Offering tables with regular-shaped basins and representations of the Htp sign. Only one offering table is present in the database and is of the “multiple” type first seen in the NK, consisting of three tables, each with a Htp sign and two round breads.	CAT ID320

2.3.14. Context Data for Pottery Offering Trays in Tooley (1989) study.

Site	Offering Tray Types	Date	Description
Qubbet El-Hawa	3 Soul Houses 1 Horseshoe Form with diving wall and absence of canals	MK	Lady Cecil 1903 excavations, soul houses from tomb 23 and tomb 29 (1905:72, 278). Horseshoe trays in Niwinski 1975:112 no.1).
Elephantine	Fragments of offering trays – most forms present	FIP – MK	Cemeteries on the island
Edfu	6 Horseshoe Form = 5-8 drainage canals, one has a seat at opposite end 2 Altar/Field Form = 1 has 6 canals 2 Tomb Form = double vault or small chamber 1 Soul House	MK	Most tombs are located in cemetery No I, or are within in isolated areas without a context.
Hierakonpolis	3 Horseshoe Form, most have a hut at the back, post stand, stairway and double drainage canals.	MK (13 th Dynasty)	On the “Old Kingdom Hill” in the tomb of Hr-m-xaw.
El-Kab	3 Horseshoe Form, 2 Tomb Form, 2 Altar Form, 2 Soul Houses (evidence of fertility figure in once of them)	MK (12 th Dynasty)	Most are now in the Petrie Museum, the two soul houses are from Tomb M12 and unpublished
Esna	5 Horseshoe Form, 1 Plate Form, 1 Altar Form, 1 Slab Form, 2 Soul Houses	MK – SIP (12 th – 18 th Dynasty)	Excavated by Garstang.
Rizeikat	2 Plate Form, 1 Soul House	?	It is said that there are numerous offering trays present at the site, but they are unpublished. The two trays are at the Cairo Museum.
Gebelein	3 Plate Form (one with a dividing wall and three canals), 1 Altar Form, 1 Horseshoe Form, 1 Soul House	MK	3 Plate Forms at Cairo Museum (JE54561, JE66853, Cairo 3/9127/1), Horseshoe Form (Tubingen 1646), Altar Form (Turin S.16030 – Schiaparelli 1914), Soul House is at the RMO in Leiden (F1901/1.62).
Salamieh	2 Horseshoe, 1 Altar Form	MK	In the Cairo Museum (JE89509, JE89510, JE89511)
Armant	3 Plate Form (of the 26 found on site), 1 Horseshoe, 1 Altar Form.	MK (12 th Dynasty)	From Tombs 1213 and 1214. There are no soul houses or Tomb Forms at this site.

Deir el-Bahari	1 Horseshoe Form, 1 Unknown (both fragmented)	?	Fragments found during EES Expedition in 1907. From Tomb 22, indicating potential royal provenance.
Assasif	1 Horseshoe (double cross canal), 1 Field Form (garden squares)		Carter excavations in 1912. Both fragmented.
El-Tarif	3 Altar Form, 7 Horseshoe, 3 Plate Form, 1 Slab Form, 1 Soul House		Petrie excavations in 1909 found 23 trays in area A (15 Horseshoe, 4 Altar, 4 Plate) and 15 in Area B (7 Horseshoe, 2 Altar, 5 Plate, 1 Slab). Altar form trays were found under the Nb-wnn.f temple, most of which lack food offerings and are mostly covered in canals).
Dra Abu el-Naga	1 Altar Form		Cairo Museum (1895).
Thebes	2 Horseshoe, 2 Plate, 1 Soul House. (other offering trays fragmented)		MMA Tomb 5A (JE58763, JE58764), JE27262, JE27364, JE48348, Glasgow 03-260a
Ballas	1 Horseshoe, 1 Slab Form, 1 Soul House	FIP – MK (11 th – 12 th Dynasty)	Portico tomb excavated by Petrie in 1896, the Slab form tray was found in the tomb vaults in the town area of the site (Brussels E.1939, Manchester 4529).
Dendera	6 Horseshoe, 2 Altar Form, 1 Plate Form, 1 Slab Form	OK – MK (6 th – 12 th Dynasty)	Fisher recorded 302 trays at the site in 1917, stated in Slater 1974, 301 – different from Thebes. The oldest style of tray is the plate-form, then Horseshoe and then the Altar Form in the 12 th Dynasty
Hu	1 Plate Form, 2 Soul Houses		Tomb W70.
Mostagedda	1 Altar Form, others are fragmentary and missing	FIP	Tomb 721 in Cemetery 1200
Matmar	2 Plate Form, 1 Slab Form	FIP	Cemetery 1300
Abydos	1 Horseshoe, 1 Altar Form (has 2 Hs vases), 3 Plate Form, 2 Soul Houses	FIP - MK (11 th – 12 th Dynasty)	Few trays were found despite the large Middle Kingdom cemetery, mostly due to disturbances to the site. Predominant type is the Plate Form – Petrie (1925) and Garstang (1909) excavations. Soul Houses are from Tomb D102 and Tomb 514 A'08.
El-Minsha	1 Horseshoe		JE54576
Rifeh	150 Soul Houses (see Petrie section below), 11 Altar Form (all with 2 square basins), 1 Horseshoe (likely from El-Kab)	MK	Bristol H471, Manchester 4378, Brussels E3180, Edinburgh 1907.713.4, Bristol H470, British Museum 68811, UCL 18410, Bristol H472, Manchester 4379, Manchester 4380.

Asyut	11 Altar Form, 1 Horseshoe (with Htp sign).	FIP – MK (11th – 12th Dynasty)	Most are from Hogarth tombs, others from Chassinat 1911 excavations. At least 24 offering trays are known to be from Asyut.
Meir	1 Soul House (with granary domes)	FIP (11th Dynasty)	Found in Tomb wx-Htpi (Kamal 1911, 14).
Bershah	1 Soul House, 1 Field Form 5 “Bersheh Cartonnage Trays”	FIP – MK (9th/10th – 12th Dynasty)	Offering trays from Bershah are entirely different from other sites. All are from specific tombs: Tomb 22, Tomb 21, Tomb E14, Tomb D15 (inscribed with text! To spi), Tomb 22, Tomb 23
Beni Hassan	1 Altar Form	MK (12th Dynasty)	Tooley does not comment on the lack of apparent lack of trays
Sedment	6 Altar Form	FIP – MK (11th Dynasty)	Most are from the Petrie 1924 campaign, and sometimes described as “Hotep altar”
Harageh	3 Altar Form (1 may be a combination of two trays, now fragmented)		Glasgow 14-64ap, Glasgow 14-64ao (combined tray)
Kahun/Lahun	3 Altar Form (with Hs vase and square basin)	MK	These trays are not from cemeteries, but were found in the town, Petrie 1890 XIII:102.
Giza	1 Soul House	MK	Brussels E2283

2.3.15. Number of offering trays in each context present in Tooley 1989 publication.

2.3.16. Bakers Mark: 7 tables show fingers on round bread and 11 have a central circle (donut-shaped). other types are chequered, spotted, or marked with an x.

2.4. CHAPTER 7 TABLES AND GRAPHS:

2.4.1. The Ancient Egyptian Funerary Cult Sequence (based on Altenmuller 1972; Quirke 2015; Hays 2010; Assmann 2005).

Event	Description	Location	Texts/ Iconography	Ritual utensils	Mythologies/ Cosmogonies	Participants
Night/Death	This is the beginning of the transition from home to the entrance of the necropolis. Death itself is rarely represented in New Kingdom tombs nor addressed specifically in the PT. It may be assumed that an initial lament possibly occurred over the dead before the coffin is transported from the house.	Non-specific – dwelling, village.	Non-specific See Quirke 2015: 229.	Non-specific	Night-bark and the journey of Re, death.	Family members, close relatives.
“Landing” <i>ḏw/rḏit r t3, zm3 t3</i> Travel to the “Place of Embalmmnt” <i>ibw</i> “God Hall of Anubis” <i>zh-nṯ ipnw</i> “Prepare a place for him in the divine hall of Anubis and in the Unification Hall.	Travel to the “place of embalmmnt” (<i>ibw</i>) commences. In the Old Kingdom this would be from the home to the embalming tent. Death is often interpreted as “landing” since the journey to the entrance of the necropolis was often depicted to have been reached via boat. The funeral party is composed of a lector priest, and mourners. The deceased is provisioned with offerings. An initial purification ritual may have taken place. The procession fundamentally transports the coffin to the necropolis. This scene is mostly from NK Theban tombs since the PT of the OK	The ritual crossing of the Nile to the western shore. The Nile is crossed with a “cult boat” <i>nšmt</i> , a classic reed boat upon which a sarcophagus was placed or the coffin in a vertical position. However, this may have mostly concerned Theban NK tombs. A crossing by boat over the Nile was not a standard process, therefore a figurative occurrence mimicked via a funeral procession from home to necropolis with an initial ritual sequence. This would be when the coffin reached the Western shore, i.e., the	Text: PT 316, 340-341 PT 134-135 Tombs: TT24, 39, 82, 100 References: Altenmuller 1972: 117-119, 123; Hays 2010: 3-5; Assmann 2001: 304-305.	Non-specific	Journey to the West, Night-bark. The crossing is made “to the eastern side of the sky and the horizon” (PT 340-341). A Nile ship with a sickle-shaped hull travels “upstream in peace to Abydos” (TT24, 39, 82). The destination is specified as the “Unification Hall” (<i>šbt-wsgt</i>). The “landing” would be at the Temple of Osiris or the “Divine Hall of Anubis” in the Western	Family members, mourners Cult barge composition: the “two kites/consecrations” (<i>ḏrti</i>) who are two female mourners representing Isis and Nephtys at the head and feet of the deceased, surrounded by crouching priests. Priests: Lector

<p>Escort NN with bread, beer and all beautiful things. Land in Sais where the Great God dwells.”</p>	<p>generally commence with rituals in the “place of embalment” (<i>ibw</i>).</p>	<p>necropolis. A series of offerings were consecrated in honour of his/her <i>k3</i> and already named Osiris.</p>			<p>Desert (TT82, 100).</p>	<p>priest in white or dressed in panther skin carrying <i>3ms</i> and <i>6b3</i> sceptres, <i>imi hnt</i>, <i>rh-nswt</i>, <i>sd3wi ntr</i> (god sealer), <i>sm</i> priest.</p>
<p>“Debarking” <i>prt hr t3, spr r zh-ntr n inpw</i></p> <p>“Coffin Sledge Trail”</p> <p>Anubis provides “the requirements of the Lector priest (<i>dbh.w n hr.y-hb</i>) until daybreak” (CT I 252c-d)</p> <p>Make it so that “the one who lives in the horizon is cleansed”; “May it be cooled for him”; “Give water under the sledge and milk for NN (<i>bzw. 6wf</i>)”</p>	<p>Procession to the Place of Embalment and God’s Booth and initial rites. The coffin is placed on a sledge and is drawn by young white oxen. In the PT of the OK the event begins with a ritual performed by a Lector priest impersonating Re-Atum () and a <i>smr</i> priest. The pull ropes are cleansed, consecrated and attached to the barge, while a <i>sm</i> priest as Thoth recites protection rites over the mummy. Both PTs and NK tomb depictions refer to a libation act in front of the coffin sledge composed of water and milk performed by the Lector, <i>sm</i>, and <i>imi-hnt</i> priests. Two female mourners also perform libation acts at the head and feet of the deceased representing Isis and Nephtys. The ritual may have also occurred in a structure called “god’s booth” (<i>zh-ntr</i>) (TT100).</p>	<p>Entrance to the main necropolis along its processional routes, or at the Western shore of the Nile before leading the funeral party to the necropolis. It has been argued by Altenmuller (1975) that this stage may have most likely occurred on the way to a valley temple at the edge of the cultivated land (1975:172-173). However, it can also be in the same place as other stops or “halting places” which follow. The procession to the God’s Hall of Anubis or Purification Tent may have occurred at night as outlined in CTs (CT I 252c-d) and interpreted by Willems (1988: 146).</p>	<p>Text: PT 136-151; 213; 372-373 (statue ritual) CT I 252c-d; 255</p> <p>Tombs: TT 15, 60, 81, DHwti-nxt, SHtp-ib-ra, Sbk-nxt, TT 12, 17, 39, 42, 82, 100, PAHri, TT 53, 85, 92, 123, 125, 127</p> <p>References: Altenmuller 1975:170, 196, 203; Hays 2010: 5; Willems 1988: 146.</p>	<p>Water jugs (Lector Priest “who brings the water” PT316)</p> <p>Reed bundles (“pull ropes” of Osiris PT 340-41)</p> <p>Power symbols <i>3ms</i> and <i>6b3</i></p> <p>Offerings of bread, beer, cattle, poultry (<i>htp di nsw</i>)</p> <p>Libation utensils for purification (<i>nmst</i> jars, natron, <i>hs</i> vases)</p>	<p>Purification rituals said to take place in the “jackal lake” and the “<i>dwt</i> lake” (PT 372-73)</p> <p>The event location is the Western shore of the Nile, occasionally labelled as “Abydos” (TT24, 39, 82). Consecration ritual may have taken place in “god’s booth” (<i>zh-ntr</i>), under the protection of Anubis and accompanied by the Ennead/ “Unification Hall” (<i>6bt-wsgt</i>)/ “Purification Tent” (<i>ibw</i>).</p> <p>The event most likely occurred at night or dusk to mimic the start of the sun-god’s journey in the <i>dwwt</i>.</p>	<p>Family members, two female mourners (<i>drti</i>), friends (<i>smrw</i>), rope team, representatives of the Delta regions (P-Buto, Busiris, Hermopolis, Sais)</p> <p>Priests: Lector priest as Re-Atum (<i>hm-ntr</i>(?); ) , <i>smr</i> priest, <i>imi-hnt</i>, <i>wti</i> (embalmer), <i>sd3wi ntr</i> (God sealer)</p> <p>Gods: Re-Atum, Anubis, Horus, Isis and Nephtys, Geb</p>

				Grave goods and offerings		
<p>“Wrapping” <i>wṯ</i></p> <p>Embalmmnt in Anubis Hall</p>	<p>Mummification/ Embalmmnt event.</p> <p>Traditionally occurred over the course of seventy days. First the corpse was purified in the <i>zḥ-nṯr/ibw</i> tent and a recitation was performed by the leading Lector priest dressed as Atum. However, this part of the ritual is never represented in tombs with only one exception in TT 23. In later tombs of the 18th Dynasty, the ritual is staid to occur in a garden with a pool (TT 23). In earlier period this stage may have been incorporated in the journey to Abydos. Mummification was carried out in the “pure place” (<i>wṯbt</i>) by a priest dressed as Anubis (<i>ḥri-sštꜣ</i>, “the master of secrets”). However, the steps of the process itself are never depicted in the Pharaonic Period, only documented on Roman papyri. Only the preparation of the coffin is depicted from the New Kingdom onwards, which simulated mummification, wrapping and anointing accompanied by recitation.</p>	<p>Place of embalmmnt (<i>zḥ-nṯr</i>). This would have been a tent set up somewhere outside the tomb within the necropolis, or at the edge of the cultivated fields. The location was also known as the “pure place” <i>wṯbt/pr-nfr</i></p>	<p>Text: Amulet consecration rituals in CT, BoD. The seventy days correspond to the annual period of darkening of the stars south of the <i>ecliptic</i>. The “pure place” (<i>wṯbt/pr-nfr</i>) may be a mythical place.</p> <p>In NK tombs this stage of the ritual would be associated with a “travel to Abydos”, in order to identify the deceased with Osiris. This is because the rituals were intended to mimic the death and resurrection of Osiris. The deceased’s mummification and re-awakening by the <i>ḏry.t</i> mourners provide protection and justification against Seth. This Osirian mythology associate the rituals with the location of Osirian burial places such as Abydos and Busiris. The</p>	<p>Two female mourners (<i>ḏrti</i>)</p> <p>Priests: Lector priest as Re-Atum, <i>smr</i> priest dressed as Anubis, <i>ḥm-kꜣ</i>, <i>wṯ</i> (embalmer)</p> <p>Gods: Atum, Anubis, Horus, Osiris, Isis, Nephtys</p>

					ritual re-enactment of embalmment would be performed during mortuary festivals such as the <i>w^cg</i> -festival (Assmann 2001: 304-308).	
Stundenwachen – Hourly Vigil	The wake most likely held post-embalmment during the night before the burial occurs. The two “female consecrations” or “two kites” were present performing protective consecration rituals at the head and feet of the deceased. These rituals may also have taken place during the protective rituals in the “Holy Realm” or “Sais” (see below”, where four priests acted as Neith, Shu, Tefnut, Geb and Nut to the deceased’s left and right and perform an intricate coronation ritual for the deceased. According to Assmann (2001), the vigil may also represent the initial boat journeys since mostly involve the holy barge of the Ennead and describe travelling along water routes to reach various halting places.	Place of embalmment (<i>sh-n₁r</i>) or tomb itself in the night hours.	Text: CT 60-61; CT 253d; CT 426d; CT 154e; CT 217a BoD Spells 1B and 151 References: Hays 2010: 6; Willems 1988: 135, 141, 145.	Non-specific. Libation utensils for purification	The deceased is guarded in order to ward off Seth and a ritual enactment of the judgement of the dead in the <i>dw^ct</i> was performed. The following events may have occurred during this vigil as a further enactment of the voyage of the dead. These included a voyage to Sais and Abydos. These voyages may have actually occurred in the necropolis, embalming tent, or tomb.	Priests: Lector priest, <i>smr</i> priest, officiants filling the roles of the gods Isis, Nephthys, Horus, Anubis, and Thoth. Gods: Isis, Nephthys, Horus, Anubis, Thoth.
Procession to Sau (Sais) (place of meat offerings) “Coffin	Procession of coffin to place of purification and meat offerings often labelled as “Sais” or “Holy Realm” (tA Dsr). The Lector priest (xri-Hb), sm priest (imi-xnt) walk before the sledge and perform various censuring	The necropolis, the main tomb causeway or main processional route to the tomb courtyard. Protection and Transformation Rituals at Sau (Sais) – “The Divine Realm” (Hwt-Sr)	Despite there being several halting places, Sais appears to be the main destination (apart from Abydos involved in the statue rituals). Sais is named “The Divine Realm” (Hwt-Sr?), approached via the “winding waterway” (wrt). It is unclear when exactly this stage of the ritual occurs, it may have to do with the Opening of the Mouth ritual which occurs just before entombment (see below) or may occur before the entrance into the offering chapel of the tomb itself. Upon arrival, the ropes are put down and the mummy is cleaned using nmst-jars. The lector priest recites a lamentation representing the bA of the deceased. The sm priest represents Thoth while the mummy is confronted by five female mourners. The OMC may	Possibly the tomb courtyard/forecourt. A designated area must have been labelled as “The Divine Realm”. This place may even be inside the offering chamber or central room of the tomb as a few Theban tombs containing a T-shaped basin. Gardens were also present in the forecourt of some tombs, which may also be the location for a few of the rituals at this particular stage. Access to a drainage canal was probably required, present in the forecourt areas of several tombs, even dating to the Middle Kingdom. It is unclear when these rituals would have occurred, since	Text: PT 196-213; PT 250-256; PT 317-320; 230; 284; 293, 298, 226, 237, 300-301 CT 856-858; CT115 (119); Tombs: TT 15, 21, 81, 100 Recitation at slaughter: “Recitation on part of the imi-Hb. Give the sign to the eight	Libation utensils for purification – nmst jars, natron Opening of the Mouth Ceremony utensils - msxtiw tools (copper basins, adze, offering table, etc.) Butchering utensils, binding ropes Nine water	“The Divine Realm” (Hwt-Sr) at Sau (Sais). This site was possibly a metaphorical place. In TT100 (Rekhmire) a “garden scene” is depicted with a central basin, obelisks, deciduous trees, and five date palms. Four water basins are present in the garden. These may be places within the dwat, such as the Field of Rushes. The basins in “the small and great Consecration” are referred to the Lake of Heket and the Lake of Chepre, both figurative lakes perhaps present in the dwat. Sekhmet’s	Family members, mourners Two female mourners (<i>drti</i>) (Drt wrt, Drt nDst) with a third named Mafdet. In total are five “wailers” Priests: Lector priest as bA or ziz (“unwrapper”)/ Horus/ Min/ Atum-Re (<i>hm-nir</i> (?); ) , sm priest as Seth/ Thoth/ Seschat and occasionally Horus. The Lector priest has the role or supreme lector (Xri

	<p>have taken place at this stage. The priests re-enact several tying scenes representing four main gods: Min, Thoth, Horus and Seth, also represented as slaughtered bulls. The images refer to a garden landscape containing a slaughter scene, pond garden, and four water basins with the Drti females performing libation rituals. These scenes are summarised in the following when compared to PT: 1. The slaughter, four priests as the four gods represent the catching of the sacrificial animals with lassos (4) and their slaughter (4); 2. Two consecrations (Drti) and a third female mourner named “the mistress of the Great House” (Mafdet) are represented by four basins. The two women (Drt wrt, Drt nDst) are shown holding spherical vessels over four basins each with a canal connected to a central drainage canal; 3. Obelisks are presented by the ponds involved in tying rituals; 4. “Sleeping of the hiw-Being” which is the Tekenu; 5. Transport of the Sokar barge. The point of the rituals is transfiguration of the deceased via coronation rituals as well as rejuvenation rites.</p>	<p>some protective spells were also recited after the deceased was entombed (see below).</p> <p>The slaughter at the Sm place may be a designated area in the tomb complex where bulls roamed before being captured for slaughter. This indicates specific areas in mortuary temple complexes, or at least a space where tombs would imitate this capture.</p> <p>The place “Sais” represented as an idealistic gardenscape may actually be a representation of all three halting places: Buto, Sais, Heliopolis</p>	<p>bulls. <p>“Funeral/Making a perfect burial”</p>	<p>The procession to the tomb and final resting place. The coffin is dragged into place followed by a procession with a ritual figure named tekenu, the canopic chest, papyrus reeds and utensils, each upon its own sledge. The procession includes offer bearers carrying an abundance of objects in chests, vessels, and equipment intended for burial. Tekenu may also be a priest in a crouching position upon a sledge,</p>	<p>Various places in the necropolis, most likely along the main causeway up to the tomb entrance. It was usually a solemn procession with three main sledges and only the one carrying the deceased would be drawn by oxen.</p>	<p>Text: PT 276a; Spr. 293, 298, 226, 237; PT 455c-456e; PT 606d</p> <p>Tombs: TT 42, 81, 82, 100, 123, 179</p> <p>References: Altenmuller</p>	<p>Non-specific</p>	<p>The night-bark crossing with the Ennead, carrying the deceased.</p>	<p>Family members, mourners, friends (<i>smrw</i>)</p> <p>Priests: Lector priest at head of procession</p> <p>Gods: Isis, Nephtys, Neith, Selkis, Horus, Nehebkau, Suchos, Seth</p>

	referred to as “Elder Horus” and wears an ox hide (PT 466a). Tekenu is also referred to as the “sleeping hiw-being” (Spr. 293, 298, 226, 237). At the head of the entire procession is a Lector priest, who recites to the rope team. Individuals impersonating Isis, Nephtys, Neith, Selkis and their consorts Horus, Nehebkau, Suchos and Seth also accompany the procession.		1975: 171; Assmann 2005: 308-310.			
Opening of the Mouth Ceremony	The coffin is positioned in the forecourt of the tomb and the “opening of the mouth” (<i>wpt r3</i>) ceremony is performed over the statue and corpse to restore human functions. The mummy is taken outside of the coffin for the last time and set up in front of a stela facing south, whilst being supported by a priest impersonating Anubis. It may be composed of four main stages: purification rituals with the use of nmst jars and censors by lector priest and imi-xnt priests (chamberlain) (1-8), a slaughter scene where the leg and heart of a bull are removed and presented to the mummy. The leg is used to “open” the mouth of mummy. A sm priest impersonates the deceased’s son and uses his little finger to open the mummy’s mouth (9-25). Imi-xnt and a “hereditary noble” (iri-pa.t)	The Opening of the Mouth Ceremony may have occurred several times throughout the funeral. The main event must have taken place in the tomb courtyard, after the mummy is placed in the sunlight. The mummy is placed on a small mound of sand and faces south. The ceremony may have also taken place at the workshop over the coffin itself since it is a consecration ritual.	Text: Tombs: References: Assmann 2005: 310-317 Otto?? 	perform recitations and a finger in electrum, psS-kAf knife, bowl of water are used to open the mouth of the mummy (28-32). The sequence is repeated twice for efficacy – slaughter, heart and leg, opening the mouth with an adze. Seven sacred oils are then used to consecrate the mummy.					
Offering Rituals Making an offering (wAH ix.t)	Lighting of torches, slaughtering the bull/calf, presenting the offerings. After the torches are lit, the funeral party reaches the offering chapel before the deceased is placed inside the tomb. An offering ritual is made in preparation for the interment and after the Opening of the Mouth Ceremony likely to have been performed in the courtyard. The event may also be considered as part of the final rites of the ceremony after a series of censuring and libation acts (scene 71 in Otto) Recitations invite the deceased to receive the offerings, which are presented as formulas. The offering ritual begins with establishing contact between the living making the offering and the receiver being the dead. This is the “lesser offering ritual”, the “greater offering ritual” is performed after the coffin was placed inside the sealed burial chamber.	The funeral party moves closer to the burial chamber. Offering ritual most likely occurred in the passageway leading to the internal sealed areas. This could be the false door or the centre of the offering chapel.	Texts: PT 373, etc. Tombs: TT 100, 20 References: Assmann 2005: 326-329.	Numerous food items, vessels, utensils, clothing, etc.	Gathering the limbs of the deceased – calling upon the deceased to become alive again. Gathering the parts of Osiris forming a whole. <p>Mortuary service “coming at the voice” (<i>pri-hrw</i>)</p>	<p>These are the final rites given to the deceased, considered to be a “mortuary service” lit. “coming at the voice” (<i>pri-hrw</i>). The rites may be considered as part of the Great Offering since the mummy is fed in accordance to the offering lists and accompanied with the recitation of transformation spells, including initial. Meals are divided into five different events. The offering list served as a means of illustrating the specific items handed over in order to the deceased. The recipient is called by the reciting priest “The Eye of Horus”. References to the handover action is the repetition of the offering formula: im n.k “take yourself” followed by an item. Offering tables are frequently mentioned. After a series of rituals are performed, protective spells and ritual actions are performed over the deceased. After interment, the rituals were repeated on festival days in designated areas of the tomb.</p>	<p>Tomb offering chapel, tomb courtyard, kA chapel, dwelling.</p>	<p>Texts: Spr. 210-212 First meal: Spr. 23, 25, 32, 34-42, 43-47 Second meal: Spr. 72-81, 25, 32, 82-96 Fourth meal: Spr. 108-171, 204-205 Fifth meal: Spr. 23, 25, 224, 172-198</p> <p>References: Altenmuller 1975: 68, 78-83, 105.</p>	<p>Utensils for libation, censor, offering table.</p>	<p>Same as above.</p>	<p>Family members on festival days</p> <p>Priests: sm priests and other official priests and personnel responsible for mortuary cult.</p>

2.4.2. The Funerary Sequence based on Altenmüller (1972) related to the archaeological record and the case studies outlined in Chapters 4-6.

Funerary Stage	Description	Archaeological Evidence	Case Studies
<p>1. Death (i.e., leaving the “house of the dead”)</p>	<p>This particular moment is rarely addressed. Death may be considered as a very delicate, isolating, messy process and too personal to be displayed in text and depictions outside the private sphere (Assmann 2005). Taking the corpse from the place of death, apparently includes a ritual transition from the realm of the living to the realm of the dead – a rite of passage (Assmann 1989: 136). Representations of the transition from ‘home’ to tomb are, however, found from the 5th dynasty onwards. Images in tombs from the OK, also evident in NK tombs, may illustrate the leaving of “the house of the dead” to the embalming place and the later pulling of a coffin on a sledge drawn by a pair of young cattle/oxen (e.g., TT 15, 60, 100; Altenmüller 1972: 138-139). Pictures and texts are however not related to one another since the texts refer to scenes of the actual entombment process and its initial phases. Apparently, this difference is due to the fact that texts and pictures have, as in TT100, been adapted to a particular context (Altenmüller 1972: 192).</p>	<p>From an archaeological perspective, what may be required for the execution of this ritual stage may be summarised as following: a funerary bier, cattle remains or any other evidence for the presence of animals required for sacrifice or those used for pulling the sledge itself, vessels required for the washing of the corpse as well as any evidence of wrappings.</p>	<p>Death may be depicted in soul houses and offering trays by representing domestic structures such as the funerary bier (see 5.0).</p>

<p>2. Travel to the “place of embalmment” (<i>zḥ-nṯ inpw</i>) and “landing” (<i>dw/rđit r t3, zm3 t3</i>)</p>	<p>In the OK the place of embalmment was defined as the “Pure Place” (<i>ibw</i>). Death was interpreted as “landing” since the journey to the entrance of the necropolis is often depicted to have been reached via a “cult boat” (<i>nšmt</i>), a reed boat upon which the coffin is placed. However, this journey is only depicted from the NK onwards. To mimic this crossing of the Nile to the western shore, libation rituals might have been performed by the Two Kites or “Consecrations” (<i>đrti</i>) frequently mentioned by Altenmüller (1972), and generally defined as two female mourners representing Isis and Nephthys. This Nile crossing is also referenced by the Statue Ritual (Stage 14, Table 7.1), which in many NK tombs is labelled as travelling “upstream in peace to Abydos” (TT 24, 39, 82). The initial rites are important for the preparation of the corpse. The rite of passage of the deceased from one state into another is assisted by purification acts, allowing the deceased to move from death into a liminal state of existence (PT 340-41). In some contexts, the funeral party may already be in the vicinity of the tomb, starting the funeral by pouring water upon the ground in an act of consecration.</p>	<p>Considering the material present in the sample, offering tables and similar objects may be physical manifestations of the various stages of the funerary ritual. In this particular case, the <i>nšmt</i> reed boat may be the offering table itself, representing the active process of transformation, as well as the libation rituals performed at these stages of the funerary cult or the tract of water itself upon which the corpse is meant to be transported. Vessels required for the execution of the ritual are represented upon offering tables and often an important part of the funerary equipment. The movement through the landscape is an important theme at this stage of the ritual and may be linked to the use of procession routes and how they were frequented in the funerary landscape.</p>	<p>The fact that a Nile crossing is mimicked by acts of libation, can be compared with the nautical iconography on limestone stone offering tables (Hözl 2005: 313; Figure 7.2), and the boat-shaped soul-houses at the ÄMP in Berlin described in chapter 5.0. Active processes of transformation are represented on most offering tables in the case studies, such as the Type 2 at Asyut, as well as the unique tilted pouring Hs vases in Type 5 (see 4.5). The link between offering table design, placement, and the processional routes is reflected in the ritual landscape of Asyut (4.6).</p> <p>Examples in 6.0 from the TIP-GR-P also reflect notions of libation rituals and water processes/journeys through sacred space.</p>
---------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

3. “Disembarking” and Coffin Sledge Trail (*pri hr ts, spr r zh-ntr*)

The procession on land to the place of embalment commences as the coffin is placed on a sledge drawn by two young oxen. Protection rites are recited over the deceased by the *sm* priest while the two female mourners perform libation acts by the head and feet of the deceased. However, the most described and depicted part of this ritual event from the OK onwards, is a libation of water and milk in front of the coffin sledge, performed by the lector priest and an *imi-šnt* priest. “Give water under (or on) the

The location of this ritual is of importance since it has been assumed by Altenmüller (1972) as having taken place on the way to a valley temple at the edge of the cultivated land (1972: 172-73). The purification ritual is performed by a lector priest (i.e., “who brings the water”) (PT 316) by using two water jugs beside the “Jackal Lake” and “Dat Lake” (PT 372-73). At Qubbet El-Hawa, a large water jar (*zir*) was found in one of the main causeways which ends at the Nile valley

This libation ritual is evidenced by utensils, as well as the udder-shaped *situlae* which made their appearance during the NK, as described in chapter 6.0. The lakes (6.0) and libation acts may be reflected in offering tables designed with deep basins as well as irrigation field systems common

	<p>sledge and give milk for NN" ( NN) (Rnni, TT15; Altenmüller 1972: 118).</p>	<p>floodplains. Other pots have been found on top of shaft tombs as if sealing the shaft, dating to the MK. These vessels may represent the libation act of the ritual while at the same time the offering ritual in later stages (Bommas 2019).</p>	<p>during the MK (4.0, 5.0) which may also represent the liminal location of the event.</p>
<p>4. Embalment ("wrapping" <i>wṯ</i>) in the Anubis Hall or "Place of Embalment" (<i>zḥ-nṯr</i>)/ "Pure Place" (<i>ibw/wḥbt/pr-nḥr</i>)</p>	<p>The funeral party arrives at the Place of Embalment (<i>zḥ-nṯr</i>) or Unification Hall (<i>ḥbt-wḥsḥt</i>) where the corpse is first purified, and a recitation is performed by a lector priest dressed as Atum. However, this part of the ritual is seldom represented. Only the final stages of mummification have been depicted in 19th dynasty tombs (e.g., TT 1 (<i>CM GE 27301</i>), TT 23). By the 18th Dynasty the ritual is said to occur in a garden with a pool and in earlier periods it was even incorporated in the journey to Abydos. The mummification process is carried out in the "Pure Place" (<i>wḥbt/pr-nḥr</i>) by a priest acting as Anubis "The Master of Secrets" (<i>ḥri-sḥtꜣ</i>). The location of this event has been argued to be a tent set up temporarily somewhere outside the tomb within the necropolis, or at the edge of the cultivated fields. However, it may be argued that the mummification was performed earlier and that this event was a ritual re-enactment performed during mortuary festivals such as the wag-festival (Assmann 2005: 304-8).</p>	<p>The archaeological elements at this stage may be summarised as the following: the tent and its representations within tomb fixtures and offering trays, mummy wrappings and associated embalming material including resin, and cultic vessels which may also be part of the funerary equipment.</p>	<p>The tent structure (<i>ibw/kꜣr</i>) may have been incorporated in pottery offering trays as argued by Petrie (1907) and illustrated in Case Study 4.2.</p>

<p>5. <i>Stundenwachen</i> or “Hourly Vigil”</p>	<p>The embalmment ritual is followed by what German scholars have named the <i>Stundenwachen</i> or “Hourly Vigil” (Junker 1910; Assmann 1977; Pries 2011). This may simply be a wake held after the embalming period is completed and before the delicate transport of the deceased to their final resting place. Purification rituals may have occurred, but it is mostly a private affair only involving official cult functionaries in the semblance of several deities. According to Assmann (LÄ VI, 104-106), the <i>Stundenwachen</i> is composed of several symbolic voyages to main cultic centres in Egypt, although Altenmüller (1972) separates these events, since he is following the sequences depicted on tomb walls. The following voyages were either re-enacted as a funerary procession throughout the necropolis or, according to Assmann (LÄ VI, 104-106), recited during the <i>Stundenwachen</i>. The two female Consecrators, or Kites, are present here as well, performing protective rituals by the head and feet of the deceased. These rituals may have taken place during the protective rites in the Holy Realm (<i>t3 ḏsr</i>), or Sais, where four priests acting as Neith, Shu, Tefnut, Geb and Nut perform an intricate coronation ritual for the deceased. The vigil may also represent the initial boat journey since it mostly involves the holy barge of the Ennead and is described as travelling along water routes to reach various halting places (Assmann 2005).</p>	<p>Purification utensils such as water jugs as well as offering tables and/or basins would have been common at this stage. The actual implements are present on the bronze offering tables known as Hnqt (see 7.3.4, figure 7.4 below). Funerary barges as well as processional routes and various canals may also be classified as archaeological evidence for this particular stage.</p>	<p>The entire process of the <i>Stundenwachen</i> might even be summarised as a birth, which is also a common depiction on offering tables and similar material (see section 5.0, 6.0). The two women, <i>ḏrti</i>, may not only represent female family members in the guise of wailers, but also “midwives”, ensuring the safe “rebirth” of the deceased, pouring out waters to facilitate his transition. However, this transition may also be a rebirth at a cosmological level: the transition of the deceased through the sky assisted via the members of the Ennead (see <i>situlae</i> 6.3.4).</p>
--------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>6. Procession to Sau (Sais), Coffin Procession</p>	<p>After the treatment of the corpse, the coffin procession through the necropolis commences to the final destination, labelled as Sais, or the Divine Realm (<i>tꜣ ḏsr</i>). The initial procession involves the lector priest (<i>hri-ḥb</i>) and the <i>sm</i> priest (<i>imi-ḥnt</i>) walking in front of the sledge performing libation rituals most likely in order to moisten the soil and prevent friction. This indicates that the procession occurred along processional routes in the necropolis also referred to as the “Winding Canal” (<i>wrt</i>). The halting places which include Buto, Sais, and Heliopolis may have been along this route as evidenced in the Ramesside period when these places were depicted as stations containing food and drinks, perhaps for the hospitality of the funeral party (Assmann 2005: 309). The libation ritual may also represent the coffin being transported along a canal (canals being a common feature on offering tables from the early MK onwards). However, this procession is part of a complex mythical and cosmological landscape described in MK coffin texts (e.g., the Book of Two Ways, coffin of Djehutyhotep, Governor of Deir El-Bersha, 12th dynasty). The procession labelled as the <i>Saisfahrt</i> is initiated when the coffin sledge passes through the portal of the Anubis Hall or embalming tent, while the <i>ḏrti</i> and Lector priest, labelled as “the imperishable spirit” (<i>ꜣḥ</i>) recites invocations and spells over the mummy. From the MK onward, the gates on the way to Sais included a ceremonial passage through the divine tribunal, “Calculation of the Difference” (<i>ḥsb.t ꜣꜣw</i>), a portal leading to the horizon (CT I, 253d-254c; Willems 1988:46-47). These mythical destinations may symbolize halting places in the Delta, often depicted in Theban tombs (TT 15, 60, 81). At a</p>	<p>The key themes at this stage are a coffin sledge trail composed of oxen as well as family members and ritualists, arriving at various halting places in the necropolis not only to perform rituals but also to provide rest for the funeral party and secure continuous provisioning of water intended for the cult.</p>	<p>The halting places which were positioned along the processional routes in funerary contexts may be identified in the Asyut necropolis (4.0), especially the offering tables directly cut in the bedrock by shaft tombs, easily accessed from the causeways. The original placement of soul houses in sites like Deir Rifeh may also attest to the frequent interaction with gravesites along processional routes by the non-elite (5.0). Bronze offering tables and similar paraphernalia may have been votive offerings placed in shrines along these sacred routes such as those discovered in the Sacred Animal Necropolis at Saqqara (6.0).</p> <p>Water is frequently depicted on offering tables and is an element exclusively used in combination with tables, basins, and trays. The large amounts of water which were poured and/or stored in the tables must have been part of a communal ritual practice, carried out along these strategically designed routes (4.0, 5.0).</p>
-------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	cosmic level, the night journey paralleled to this procession is a way of mimicking the travel of the sun through the body of Nut before its rebirth as the sunrise.		
7. Procession to Pe and Dep (Buto), arrival at the “gates of the Divine Realm” (<i>t3 dsr</i>)	During the coffin procession, the funeral party passes through the “gates of the Divine Realm (<i>t3 dsr</i>)” in Theban tombs often labelled as the Delta site Pe and Dep (Buto). The funeral party is met by <i>muu</i> -dancers who often initiate the rites at the “landing stations”, marking the arrival to a new halting place and the beginning of the transformation process of the deceased. The <i>muu</i> -dancers are adorned with four crowns of Lower Egypt, representing the ancestral kings and present the deceased with a fifth crown indicating their transformation into a royal ancestor. Although this is based on depictions in the tomb of Rekhmire, this appears to be an adaptation of a royal funerary cult, but which in elite tombs was likened to a transformation of the deceased into an “excellent spirit”. Libation rituals are continuously performed during this transition, while the coffin sledge is said to be moving upwards and downwards the canal. The whole performance appears to be yet another re-enactment of the deceased being moved along a canal. This stage may yet again be a representation of not only a journey through the watery landscape of the cosmos and perhaps the landscape of the living, but also a birthing process.	The canals created by the constant pouring of libations, the ropes likened to the umbilical cord of Osiris, and the wailing of the mourners may be a means of representing the coffin as a vehicle for life and rebirth. Therefore, the procession may be occurring along a birthing canal, while at the same time representing the cosmos and the Nile. The interchangeable symbolism of the funerary process is another example of the multifaceted nature of offering tables and similar material (6.0)	The continuous movement of the coffin barge is facilitated by the constant pouring of water in front of it, imitating a river flow, maybe reflected in the water process on several offering tables and similar material (see section 7.3). Offering tables are often positioned in liminal places within the funerary landscape, which in the funerary cult appear to be the places where most physical actions occur (4.0).
8. Protection and Transformation Rituals at Sau (Sais), “the Divine Realm” (<i>t3 dsr</i>)	Despite the presence of several halting places, Sais appears to be the main destination (apart from Abydos, which is involved in the Statue Ritual). Sais (i.e., “the Divine Realm”, <i>t3 dsr</i>) is reached via the Winding Waterway (<i>wrt</i>). It is	The main key elements of this section are landscapes known as being part of the Buto Burials (see section 2.4). However, these are also architectural elements and fixtures within the funerary landscape and tombs	The slaughter, garden and basins are all essential for the transformation of the deceased and constitute iconographic elements

	<p>unclear when and where exactly this stage of the ritual occurred. It may have been related to the OMC inside the offering chapel, or a central room within the tomb, as evidenced in the architecture of a few NK Theban tombs containing T-shaped basins. The location of these rituals is depicted as a garden with a central basin, obelisks, deciduous trees, and five date palms (TT 100; see section 2.4). These gardens may either be mythical places, such as the Field of Rushes (iArw), of the Lakes of Heket and Chepre. However, it may also be a real location indicated by the presence of gardens, large forecourts, and drainage canals in tombs, as early as in the late OK. These three architectural elements appear to be essential for the execution of transformation rituals at Sais. Upon arrival, the mummy is cleansed using <i>nmst</i>-jars while the lector priest recites a lamentation. The priests re-enact several tying scenes, while representing four main gods (Min, Thoth, Horus and Seth), as well as slaughtered bulls. The two Consecrations (<i>ḏrti</i>) and a third female mourner Mafdet are represented by four life-scale basins. In tomb TT 100, two women (<i>ḏrt wrt</i>, <i>ḏrt nḏst</i>) are depicted holding spherical vessels over the four basins, each with a canal linked to a central drainage canal. The female ritualists play an important role in the water imagery and therefore rejuvenative elements. As mentioned before, their presence may also be of importance for the ritual re-enactment of the birth of the deceased into a new entity.</p>	<p>themselves: T-shaped basins in Theban tombs, funerary gardens (5.0), large forecourts and drainage canals in NK architecture, slaughtering ring (5.0). Objects include <i>nmst</i> jars, slaughtering equipment, and basins. Gardens, pools, and water channels are included in offering tables in the form of iconography but also functional elements such as basins, canals, and even miniature garden plots (see section 5.0).</p>	<p>(see section 3.5) present on offering tables and similar objects from the OK (5.0) to as late as the G-RP (6.0), indicating one of their main use as a means for transformation and rejuvenation of the deceased.</p>
<p>9. Procession to <i>ʿunu</i> (Heliopolis)</p>	<p>The rites upon the mummy may commence at “<i>ḥwt-sr (?)</i>” believed to be in Heliopolis (Altenmüller 1972: 157). The halting place <i>ʿunu</i> (Heliopolis) is most likely located within</p>	<p>Access to sunlight is vital at this stage, more specifically the initial rays after the rebirth of the sun after the Stundenwachen. Ritual vessels and the use of</p>	<p>The outer areas of the soul houses as well as offering trays may correspond to the open space used</p>

	<p>the outer courtyard of the tomb. Actions transporting the coffin to a sunlit place where a purification ritual and lamentation take place, possibly accompanied by the main OMC. The process is described in Pyramid Texts (PT 213-216, 222) as setting up the mummy before Re. The main goal is to rejuvenate the mummy through the energy of the sun in preparation for the OMC. The process is often initiated by the pouring of water over the mummy, using <i>nmst</i>-jars and performed by <i>sm</i> priests. This halting place appears to be most popular during the Ramesside period (TT23, 106, 183, 224) since the forecourts of tombs began to be surrounded by high walls in order to execute the rituals in privacy without compromising the use of sunlight (Assman 2005: 317-24).</p>	<p>water play an important role at this stage, possibly to be imbued with revitalising energies of the sun. The mummy and statue rituals at this stage may also be compared to the statue ritual in the temple cult which involved the transportation of the statue outside at dawn to receive the first rays of the sun (Eaton 2011).</p>	<p>for the rituals carried out at this stage in the funerary ritual. It would involve a transition of the deceased to the inner, hidden areas of the tray/soul house usually containing a seat at the far end under a pillard forecourt (5.0). There is also a link to the OMC at this stage, related to the use and function of offering tables (4.0, 7.3).</p>
<p>10. Opening of the Mouth Ceremony (<i>wpt r</i>)</p>	<p>The OMC marks the last stage of the transformation process of the deceased (see Table 7.2). It occurs in the same location as the previous ritual, which is the liminal space between the tomb entrance and the inner offering chapel. The coffin is positioned in the forecourt of the tomb and the ceremony (<i>wpt r</i>) is performed before the mummy, or the statue, in later stages, in order to restore their human functions. The mummy is taken out of the coffin for the last time and set up in front of a stela facing South, while being supported by a priest impersonating Anubis. The scene is often depicted in Theban tombs (TT 21, 100, 53, 125) alongside Pyramid Texts (PT 250-56; PT 458-63) describing the event and its mythological connotations. The deceased is often surrounded by five female mourners (<i>tr-wr</i>) while initial protective rites are performed by the Hm kA and embalmers (<i>witi</i>). Throughout the ritual, several symbolic</p>	<p>Archaeologically, the implements have been discovered in tombs dating back to the Early Dynastic Period, such as those found inside the tomb of the lector priest Idy at Abydos, dating to the 6th Dynasty. Opening of the mouth kits, including cleansing vessels and alabaster vases, as well as knives and votive representations of fingers in bronze, have been discovered together with miniature representations of offering tables (Figure 7.3). These offering tables differ from the ones present outside the burial chamber, since they are made of bronze, stand on four legs and were probably used for the placement of oils and purification utensils (Figure 7.4). However, these implements eventually became incorporated in offering table design.</p>	<p>The various utensils used throughout this stage, especially the bovid leg, is frequently depicted on offering tables as well as trays and soul houses (4.0, 5.0). The multifaceted nature of the ritual, especially where exactly it was carried out, is also reflected in offering table design and their original placement (4.0, 5.0, for detailed analysis see 7.2.3; 7.3.3-4).</p>

	<p>gifts are offered to the deceased to “activate” him, usually referred to as the “eye of Horus” (Assman 2005:310-317). According to Otto (1969), the OMC occurs at various stages of the funerary ritual, specifically during the embalment, offering, and the statue ritual. The whole process emphasises rejuvenative elements such as the comparison of the deceased to fertility gods and offering objects labelled as the Eye of Hours in order to restore his/her efflux It may be argued that this ceremony “uses” the greatest number of ritual utensils throughout the entire funerary ritual.</p>

11. The Internment:
“making a perfect burial”,
Tekenu and Canopic Trail

At this stage, labelled as ( NN ) the coffin is dragged into its final resting place, the tomb, followed by a procession with a ritual figure named Tekenu (*tiknw*), the canopic chest, papyrus reeds, and utensils, etc. Offering bearers carry an abundance of objects in chests, vessels, and equipment intended for burial, accompany four main sledges, often depicted in Theban tombs transporting the Tekenu, the canopic chest, an offering chest, and the coffin (TT 42, 81, 82, 100, 123, 179). Preparations are made for the upcoming offering ritual and the coffin sledge is by the pulling team moved to the “north” and “south”. This movement of the coffin was achieved by the rope team alternately pulling the

The procession most likely occurred along the main causeway of an important tomb, or by the entrance to the tomb. Archaeological material may include: the coffin sledge and other forms of transportation, offering vessels and storage jars, tomb equipment and various chests, the canopic jars, fabrics, flowers and reeds, and any other funerary equipment frequently found in elite tombs.

Transitional architectural features may be of note at this stage such as narrow passageways, shafts, and staircases to mimic the ascension or dissension into other realms of existence.

The metaphysical events described in the Pyramid Texts may be identified in iconographic elements on later offering tables such as the inclusion of staircases leading to deep basins, mimicking the transformation ritual and the ascension of the *ꜥh*-spirit of the deceased into heaven (see 6.2-3; section 3.3.1).

	<p>ropes attached to either side of the coffin sledge in a manner that simulated the movement of a boat steered with one oar. It could also be an attempt to direct the coffin inside a confined space, steering it through doorways and narrow passage(s). This action is accompanied by a priest dressed as Tekenu, opposite a priest impersonating Thoth, offering a bowl to each other while performing a consecration ritual. The end of the procession involves the transport of papyrus reeds by the <i>smrw</i>, greeted by “the dancing ancestors” i.e., the <i>muu</i> (TT 17). A play on words referring to the ropes (<i>ti</i>) as being equal to bread (<i>t</i>) foreshadows the Great Offering. The Pyramid Texts describe the procession as being greeted at the top of a staircase at the edge of the Lake of Destruction in order to reach the Field of Offerings (<i>htpw</i>)/ Field of Reeds (<i>irw</i>). It describes the <i>ꜥh</i> spirit of the deceased as having arrived in heaven, while the corpse, <i>hꜥt</i>, of the deceased remains on earth (PT 472-75). This marks the end of the transformation rituals.</p>		
<p>12. Offering Rituals, “making an offering” (<i>wꜥh iꜥt</i>)</p>	<p>This ritual stage may be directly linked to the OMC since the deceased has been restored to all life functions after undergoing the necessary transformation ritual. A total of 116 items are offered and listed in the Pyramid Texts (PT23-171). The main list of food offerings ranges from PT53-116 and does at the beginning include purification rituals, followed by numerous kinds of bread, meat and onions, baked goods, beverages, fruits, and grains. This constitutes the “Greater Offering Ritual”, which is followed by a series of closing rites. This stage of the offering ritual is divided into two action cycles, the first most likely occurring before the burial and was depicted in the Type 1B offering list</p>	<p>Among the 116 objects, an offering table (<i>hꜥwt</i>) is mentioned to be offered, while its use is described in the closing rite with the name <i>hꜥt wꜥw</i> (Altenmüller 1972: 81-89). The closing rite of the offering ceremony further describes water rituals as well as rejuvenative elements. Initially the priest handles the “umbilical cord of Osiris” while another lector priest refers to a reproductive sequence, summarised in the process of handing over two ropes (ibid: 91; Roth 1992: 60-63). Another priest named the “butcher” (<i>ꜥbhꜥw</i>) pours water from four bowls over a sacrificial bull, thus mimicking a slaughter (Altenmüller 1972: 97-100).</p>	<p>At this stage the offering table is explicitly mentioned, perhaps as a ‘summary’ of what has come before and will continue forever. The offering table as a guarantor for ritual efficacy and endurance is represented in offering tables at Asyut (4.0) with their permanence in the landscape and role within the ancestor cult; the versatility and multifaceted nature of the pottery trays and soul houses in the FIP, MK</p>

	<p>(Barta 1963). The action describes a priest labelled as “cup-bearer” (<i>wti-wdpw</i>) kneeling in front of several offerings and a <i>hnkt</i>-offering, while his hands are placed upon the offering basket/table. The priest labelled as <i>mr st pr-ꜣ hnhi š</i> pours water from Hs vases into a bowl, “giving the water gift” (Altenmüller 1972: 86-87). The table is then censed and purified by pouring a stream of water upon it (<i>zꜣt</i>). This is the first time the use of an offering table is explicitly mentioned in the funerary cult.</p> <p>Lastly, transfiguration recitations are made, referring to the rebirth of the deceased. The eye of Horus is said to drip over a <i>dnw</i>-plant, possibly referring to a consecration ritual involving the moistening of a plant, which will be used to wipe the floor and clean the offering place (Altenmüller 1972: 95-96). Marking the end of the offering ritual is a final recitation known as <i>irit rd</i>, a wordplay with <i>rdw</i>, meaning “efflux” (PT 118-133; <i>ibid</i>). It is important to note that this offering ritual most likely occurred in the passageway leading to the internal, sealed areas.</p>	<p>The last transfiguration rituals could have taken place by the false door at the centre of the offering chapel, or where the burial shaft is positioned within the tomb. The offering list and depicted offering table scenes, are almost always found in the vicinity of the offering tables and false door. An assumption supported by the presence of the offering formula surrounding the rim of several offering tables stating: “an offering which the king gives” (<i>hꜣp di nsw</i>).</p>	<p>(5.0); as well as the rejuvenative elements represented on later tables and their transformation into a symbol for the endurance of the offering ritual as a symbolic event (6.0).</p> <p>All the offerings described in the Greater Offering Ritual are frequently depicted on offering tables, especially from the late MK throughout the NK (3.3.1).</p> <p>The act of pouring water upon an offering table may not only be a simple cleansing act, but a re-enactment of slaughter rituals, as well as reproductive processes. This may be especially true in connection with pottery offering trays, which are often painted red and show numerous meat cuts, perhaps to mimic the various elements of a slaughter (see 5.5.2).</p>
<p>13. Procession and Tomb Rituals – “funeral” (<i>irt kꜣrst nfrt</i>), Devices Ritual (<i>dbꜣw.t.t</i>)</p>	<p>At this stage the “funeral” takes place, and the deceased is brought into the burial chamber. The burial equipment together with numerous meat offerings are placed beside the deceased followed by Tekenu and cult functionaries. The tomb was essentially off limits to the rest of the funeral party. This ritual takes place by the end of the offering ritual and begins with transformation rites for utensils, rather than for the deceased, who earlier “revived” through the</p>	<p>The Tekenu enters the tomb following the coffin, which is carried by two to four men, while the two mourners, <i>qꜣri</i>, perform a consecration act cleansing the <i>sm</i> priest with the eye of Horus. The coffin is placed in position by the <i>sm</i> priest, who also performs the final act of covering the mummy/statue with a shroud placed inside a shrine/coffin. The large number of priests with denominations like “heart unifier” (<i>dmd</i></p>	<p>It is evident that this entire ritual was conducted inside the burial chamber, or immediately outside it. The funerary landscape outlined at Asyut in Ch. 4 illustrates this very process of transporting, using and/or depositing ritual utensils in strategic areas around the</p>

	<p>OMC and the Great Offering Ritual. Through a process known as the “Devices Ritual” the durability of the utensils was ensured. It involves the reception of different tools, utensils, carriages, furniture, fabrics, jewellery, ointments, and oils, by a reciting lector priest “who stands above the kA forces (<i>ḥri kꜣw</i>)” (Assmann 2005: 33). This occurs while water is being poured from <i>nmst</i>- jars at the offering place (i.e. the offering table) from which a cloth had been removed, “taking away the fabric” (<i>iz</i> and <i>sfḥ</i>) (PT 284). A cleansing scene in the Field of Rushes (<i>shṯ iꜣrw</i>) occurs and the leg and heart of a slaughtered bull are removed and placed upon the altar by the lector priest <i>ḥri-ḥb</i>.</p>	<p><i>ibw</i>), “he who takes and gives forces of <i>kꜣ</i>” (<i>nḥm.f kꜣw nḥb.f kꜣw</i>) and Horus, “Lord of offerings” (<i>Htpw</i>), indicate that the main goal of the ritual was to unify the various elements of the deceased, activated through numerous offerings before the sealing of their final resting place (Altenmüller 1972: 178-179). The process is carried out by using offering tables, which are treated in the same way as the deceased. The offering table may therefore be used as a kind substitute for the deceased, allowing liquids to be poured upon it rather than upon the mummy. This may explain the presence of pottery offering trays inside the MK tombs, where they are found together with the deceased in the burial chamber (see section 4.2.6, 7). Accordingly, the Devices Ritual is important since it guarantees the ritual efficacy of offering tables long after the entombment of the deceased.</p>	<p>necropolis. The pottery offering trays buried with the deceased inside the burial chamber may be considered as part of the devices ritual (see 4.6; 5.6-7). The ritual activates the rest of the utensils within the tomb, including the fixed offering tables outside.</p>
<p>14. Travel to Abydos, “Statue Ritual” (<i>ꜣwt-ib-rꜥ</i>)</p>	<p>The statue of the deceased is placed in the antechamber, after the tomb has been sealed off. This part of the burial process may have occurred after the entombment of the mummy or as a short ritual performed within the workshop or the tomb complex before the statue was transported to the tomb. The procession is often represented in NK tombs as the funeral party “going downstream to Abydos in peace” (TT24, 39, 82) and then retreating from the tomb and leaving Abydos (Altenmüller 1972: 195-196). An OMC is performed on the statue perhaps even simultaneously as it was on the mummy as depicted in some iconographic representations (Figure 7.5). A consecration ritual is performed while presenting a foreleg and a series of</p>	<p>These rituals are performed to activate the statue so that the deceased’s <i>kꜣ</i> may use it to receive offerings, usually via the offering table placed in front of it. The so-called Cannibal Hymn is recited to transform the statue into a god, by devouring numerous magical entities. Like the previous ritual, the act is concluded by covering the statue with a large cloth and the locking of the shrine doors.</p>	<p>The statue ritual may also be a clear reference to the OMC performed in the courtyard area of the tomb or in a shrine within a temple complex. The association between offering tables and stele indicates a correlation between static rituals and active ones. The need for transforming a static object into an active one is represented in the pottery trays and soul houses described in Ch. 6. Their semblance to processing sites is a reference to the deceased</p>

offerings by the lector priest impersonating Horus and labelled as “the one who has brought the water” (inw mw), perhaps performing continuous libations as in previous rituals. The deceased is said to be “transformed in a wind (?)” perhaps indicating the transformation of the statue into a god (*irt hprw*, lit. “making forms”, i.e., transformation) and therefore Osiris, who is associated with the western wind, believed to have caused the annual flood (see section 4.3.4); Altenmüller 1972: 198). Transformation formulas are recited declaring that the statue knows several gods “you know him and he knows you” (PT 327-336). The cleansing ritual performed by the *sm*-priest during the OMC (scene 63) is said to be performed in order to “bring the *k3* to a man in the necropolis” (CT 359d; Altenmüller 1972: 203). A milk offering is also made.

needing to be identified with Osiris and the rejuvenative elements of the Nile and natural elements such as the western wind which brings the flood. These notions of rejuvenation and watery elements are even more evident in the offering tables described in Ch.6.

Figure 4: Opening of the Mouth Ceremony sequence depiction the purification ceremony upon the sarcophagus as well as the mummy (northwall, mid-right register, immediately below “Abydos journey” at the top register, Tomb of Menna (TT 69), 18th Dynasty, Sheikh Abd el-Qurna, Thebes (Hartwig 2001; Moreni 2021 – Osirisnet).

<p>15. Mortuary service, “coming at the voice” (<i>prrt-hrw</i>)</p>	<p>The final event of the funerary ritual is known as the “mortuary service” and occurs after the burial chamber has been sealed off (Altenmüller 1972: 68). This rite may be considered as part of the Lesser Offering and a second cycle of actions related to the offering ritual. The deceased is “fed” in accordance with the offering list and accompanied by transformation spells, after the <i>init rd</i>. The two main actions consist of a “God Offering” (<i>hṯp-nṯr</i>) and the Lesser Offering Ritual (<i>hṯp di nswt Gb</i>). The first action invokes the deceased to receive offerings at the offering table. The invocation in OK Pyramid Texts is usually expressed as “sit down by the offering and place both hands upon it” (<i>ḥmst r iḥt rdit ʿwi.ki ḥr.s</i>) (PT216-217), while Coffin Texts from the MK present a series of more explicit spells, referring to the actual offering table. These spells are labelled as “spells of the offering tables” (CT 591, 599, 831, 863) (Altenmüller 1972: 98; Willems 1988: 228-229). This indicates an explicit location of the ritual within the funerary landscape. It most likely occurred in the tomb offering chapel, possibly by drainage canals and basins enabling the use of fresh water during the numerous libation ceremonies and for the washing of the offering table (e.g., numerous water basins and a surrounding drainage canal in the Osireion, 18th Dynasty, Abydos. Its architecture was based on the design of contemporary tomb structures; see O’Connor 2011). Following these rituals are execration acts performed by priests breaking red pots (<i>dšrt</i>) and a ritual slaughter followed by a libation performed by a priest known as the “butcher” or “libationer” (<i>kḥw</i>). These acts were performed so the deceased could receive his efflux and the</p>	<p>The final funerary rite may be considered as a memorial service for the deceased in the time following the interment and may, therefore, occur in any context, within the funerary landscape, or even within the households by the foot of an ancestors’ shrine, such as those found at El-Amarna and the workers’ village at Deir El-Medina (Stevens 2009: 4-6). Since the offering table is essentially where the important ritual of calling upon the deceased to receive their offerings takes place, it may be assumed that this particular object was used as a kind of cenotaph, or even a representation of the consecrated place where the deceased is actually located (see section 4.3.4,5).</p>	<p>The final stages of the funerary cult may be relevant to most of the offering tables and similar material in the archaeological record. Offering tables with “active” features present upon them such as basins, canals, and spouts may all illustrate the need to invoke, nourish, and commemorate the dead. The fixed offering tables strategically placed within the Asyuti funerary landscape illustrate this notion (Ch. 4), while the handheld pottery trays and soul houses in FIP/MK contexts may show an even more dynamic interaction with the dead at a more personal, local level (Ch. 5). The need to bring forth the Nile, inviting the festivities and celebrations of the living into the funerary realm is further emphasized on later tables (Ch. 6).</p>
----------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>Eyes of Horus (PT 23). After this, the Lesser Offering Ritual was performed, consisting of an abbreviated version of the earlier OMC and the Greater Offering Ritual followed by the closing rite. This rite included the cleansing of the offering area (<i>zꜣꜥ</i>). The recipient is invoked by the reciting priest who uses the term “eye of Horus” as a reference to the handover action summarised in the offering formula <i>im n.k</i> “take to yourself”, followed by the naming of a specific item. These transfiguration spells refer to the deceased as an <i>ꜣꜥ</i>-spirit (Altenmüller 1972: 98-99). The final part of the funerary ritual includes a consecration act consisting of sweeping the floor with a dripping plant, marking the end of the offering ritual with a wordplay related to <i>rdw</i>, the efflux of Osiris.</p>

2.4.3. The OMC Sequence (based on Otto 1960).

Scenes	Description	Location	Texts/ Iconography	Ritual utensils	Mythologies/ Cosmogonies	Participants
1 <i>ḏd-mdw in ḥri-ḥbt [kni?] ḥr.f</i>	Instructions for the adjustment and placement of the statue, originating from the original Statue Ritual. The <i>ḥri-ḥbt</i> priest cleanses the deceased in front of an offering table. The scene is usually composed of anthropoid coffins upon mounds of sand and most likely outside the tomb.	Outside tomb. It is said to be in a place called “the Golden House” (<i>h.t-nb</i>) in Abydos. It may be a funerary complex or royal temple workshop	Texts: 1,2, 3, 4, 5, 48, 51, 59, 64, 65, 66, 67 “As he first is placed on the sand, he is facing South, naked on Earth at the day when the clothes are behind him. Repeat four times: Clean! Clean! N!” Text: Pap Kairo 36803; Pap of Lady sAis Louvre “Opening the mouth for the first time on the sand” (TT181) Otto 1960: 34-37	Offering table? Censor Hill of sand <i>ḥꜣs.t.n.t.šꜣi</i>	The Golden House (<i>h.t-nb</i>) may also be a mythological place since the mummy is placed upon a mound of sand. This may be the primordial hill or is simply a place “apart” or consecrated ground.	<i>ḥri-ḥbt, sm</i> Ptah is called the “protector” of the OMC
2-7	The <i>sm</i> and <i>ḥri.ḥb</i> priest walks around the statue four times with four <i>nmst</i> jars. Cleansing with water (<i>nmst</i> and <i>ḏsrt</i> jars), Upper and Lower Egyptian natron and consecration incense. Here the consecration censuring in scenes 6 and 7	Same as above. In front of “God’s Hall” (Sc. 4b)	Texts: 1, 2, 4, 5, 9, 18, 41, , 53, 59, 66, 70, 78, 80, 81, 83, 2734, PT 9b, 28/29 (Spr 26),	<i>nmst</i> jars <i>ḏsrt</i> jars Censor	The purification and censuring are performed in order to render the deceased as pure as the gods (incl. Horus, Seth, Thoth, <i>dwn-ꜣwi</i> . Unification of various elements via water – it is the Osiris myth which	Lector, <i>šm</i> priest, <i>ḥri.ḥb</i>

	<p>are performed twice. The cleansing formula is recited, consisting of comparing numerous gods and their purity to that of the deceased. After this the priest pours water from the <i>ḏsr.t</i> vessel over the statue/coffin. The natron is held to the mouth and eyes of the deceased. The two eyes are not addressed in older pyramid texts. The mouth of a calf is compared to the that of the deceased's and in some contexts, Isis is mentioned as having given birth to the deceased, indicating that he has been reborn into a calf or that the calf is rejuvenated. Referring to the deceased being "on the beasts of mother Isis" <i>bḥs irḏ.t</i> (TT100) may indicate the use of milk. A censuring ritual is then re-enacted, reaching the mouth, eyes and arms of the deceased.</p>		<p>Recitation: "Purity for your <i>k3</i>" (Scene 3) TT56</p> <p>"Pure, pure N! Take the water which is in the two Eyes of Horus, the two red ones Thoth, unite him so that what is in him disappears" (Sc. 3-6)</p> <p>"Your mouth is the mouth of a milk calf on the day it is born" 2, 3, 4, 5 (Sc. 5)</p> <p>"From the leg of your mother Isis, that everyday your mother gave birth to" (Edfou III)</p> <p>Otto 1960: 37-52.</p>	<p>Natron <i>nṯr</i> balls from Upper (El-Kab) <i>šdp</i> and Lower Egypt (<i>št-pt</i>)</p>	<p>involves restoring his efflux as well as the Eye of Horus. Cleansing is also said to be done with the spit of Horus. Isis as a mother goddess is mentioned referring to the rebirth of the deceased into a new entity. The rejuvenation of a calf and a reverse birth is also outlined, aligned to the fate of the deceased. The Eye of Horus is offered during the censuring ritual in Scene 6 as a unifying agent – "you will be unified"</p>	
8-10	<p>Beginning of the Statue Ritual, an <i>imi-ḥnt</i> and <i>ḥri-ḥbt</i> priest enter the workshop (<i>ḥ.t-nb</i>). Scene 9 involves waking up the <i>sm</i> priest. The <i>ḥri-ḥb</i> and <i>imi-ḥnt</i> go towards one another or stand in front of the statue. The <i>sm</i> priest crouches opposite statue wrapped in a mantel and behind him is the <i>imi-is</i></p>	<p>Workshop (<i>ḥ.t-nb</i>) They are also said to enter a holy place named <i>is</i>, possibly "tomb", indicating that if it would have occurred during the Statue Ritual, it may have been inside a workshop,</p>	<p>Text: 1, 4, 80, 83, 6, 2, 3, 5, 6, 46, 7, 76, PT 96, 97, 99, 617a/b</p> <p>Otto 1960: 52-59.</p>	<p>Statue (<i>twṯ</i>)</p>	<p>The lector and <i>imi-ḥnt</i> are said to be inside the workshop if takes place during the statue ritual. It may be how the statue/coffin was made, however, it could also be in the tomb or shaft since the crouching <i>sm</i> priest in a mantel is reminiscent of the Tekenu. Everything is prepared for a</p>	<p>3 <i>Imi-ḥnt</i>, <i>ḥri-ḥbt</i>, <i>sm</i>, artisan <i>imi-is</i></p>

	(artisan). The statue is then said to be provided with a soul.	otherwise it could be in the “holy place”, here labelled as is, or “tomb”. However, the ritual did not occur in the tomb in earlier times, therefore it may be defined as “chamber” or fixture within a tomb, i.e. shaft.			magical act (<i>dsr</i>). The preparation for receiving the soul in Scene 10 may be a reference to the <i>h3</i> of the deceased since the priest is labelled as “Horus catcher”	
11-18 Rep: 16=30	“Artisan scene” as the focal point of the Statue Ritual. The <i>sm</i> priest changes clothes, he then stands in front of the statue and three artisans. Scene 13 refers to the commissioning of expert artisans (the bone carver, axe worker, polisher). The <i>sm</i> priest touches the mouth of the statue followed by the lector priest, with the little finger of his right hand. The <i>shd</i> action occurs, most involving the use of the knife as well as the “Polishing stone” perhaps a reference to the embalming process. After the statue is complete it is handed over to the lector priest.	Workshop (<i>h.t-nb</i>)	Text: 1, 2, 3, 4, 5, 77, 83 “The head should be cleansed by Hapi, Eyes to be lit (<i>shd</i>) by <i>dws-wr</i> , the mouth opened (<i>wpi</i>) by Thoth so that the dead may speak” CT III 299 Otto 1960: 59-71	Little finger of the Lector priest’s right hand, the <i>smr</i> two fingers Polishing stone	The artisan scene is really about how the representation is made and finished. This is why the polishing and cutting as well as butchering is mentioned. A reference to the unification of lands (<i>t3 št3</i>) in scene 17 illustrates a need for unifying different elements of the statue and/or deceased.	<i>sm</i> , three artisans (<i>ks-tiw</i>): <i>imi-is</i> = the bone carver, axe worker, polisher, <i>smr</i> , <i>imn h̄w</i> “slaughterer”
19-22	Between scene – the <i>sm</i> priest changes clothes and is now equipped with the <i>ḳni</i> – an apron with panther skin. The <i>smr</i> enter. Scene 22 is a transitional scene. These scenes referring to hunting also foreshadow the slaughtering in the following scenes before the official OMC.	The transition is also marked by a transition into the <i>wsh.t</i> – offering place – for the slaughter. It is unclear where exactly this is but the slaughter must have occurred in a separate place from the actual OMC site.	Text: 1, 2, 3, 4, 5, 7, 62, 77, 83 “Recitation by <i>hri-hbt</i> : O N! I have stamped your eye so you might have your soul through it!” (Sc. 19-21)	<i>ḳni</i> -apron (panther skin)	These transitional scenes may also be figurative of a transition between two realms, indicated also by the change of clothes. Also, precarious since it is occasionally compared to “hunting scenes”	<i>šm</i> , <i>smr</i> , <i>imi-hnt</i>

			<p>“Recitation by <i>sm</i>: I have teared out his leg” (Sc. 19-21)</p> <p>Otto 1960: 71-73</p>			
23-25	<p>Slaughter ritual and the bringing of the leg. Here there is a connection between the Statue Ritual and Offering Ritual. The former relates to scene 18 and the completion of the statue. Now the official OMC follows. Therefore, the OMC may be considered as part of the Offering Ritual. There is a lot of variation when it comes to representing the slaughter. The main events include the <i>ḏrti</i>, especially the Great Consecration, who whispers in the ear of the sacrificial animal. The butcher gives the leg and heart to the lector priest and the <i>sm</i> priest then holds the two parts in front of the statue. There is also a reference to the verb “unite” (<i>bwi</i>) and joining Osiris.</p>	<p>Between the <i>wsh.t</i> and the <i>ḥḏ</i>-chapel. It is most likely in the forecourt of the tomb as it is most often represented – a liminal area in which the coffin was set upright.</p>	<p>Text: 1,2, 3, 4, 5, 6, 7, 22, 62, 81, 83, 62 PT 79c, 1628b, 1544</p> <p>CTI 44 “Stay away from this N, so you are away from this N! Do not approach him whom you are close to!” – Speech of the <i>ḏrti</i></p> <p>“O N! Take then the one who has made the Eye of Horus! I bring you the heart that was in him, in the vicinity of this god” (Sc. 24 II – Recitation)</p> <p>“O N! I opened your mouth for you with the one who made the Eye of Horus (<i>ḥph</i>)!” (Sc. 25)</p> <p>Otto 1960: 73- 80</p>	<p>Calf (heart and leg), <i>smn</i> goose (head)</p>	<p>There is a link between the statue ritual and the funerary ritual, especially with the speech of the <i>ḏrti</i> in the calf’s ear. The slaughter scene was originally a “hunting ritual”. The <i>ḏrti</i> blames the calf for its own death – a link to the quarrel between Horus and Seth, and <i>ḏrti</i> being Isis calling out to Seth: “Weep for yourself! Your own mouth said it! Your own cleverness has judged you!”</p>	<p>Butcher, lector, and Great Consecration (<i>ḏrti</i>), <i>sm</i>, <i>imi-ḥnt</i></p>

<p>26-28 29-32</p>	<p>OMC as part of Statue Ritual with the use of specific utensils. The <i>sm</i> priest accompanied by the lector hold the <i>ntr.ti</i>, <i>bjz n ntr</i>, etc. The <i>sm</i> priest accompanied by the Lector priest stands in front of the statue with the magic wand <i>wr-ḥkzꜣw</i> with the <i>imi-ḥnt</i> standing behind him. <i>Mshitiw</i> is also included which is the leg also referred to Seth's leg. The lector priest stands in front of the statue and behind him is the <i>r-pꜣt</i>. A lot of references are made of assuming the powers of the gods, possibly a reference to the Cannibal Hymn already mentioned in the Funerary Ritual.</p>	<p>There is a movement from the Golden House where the statue was made to the Natron House or "cleansing room", possibly a reference to the embalming tent.</p>	<p>Text: 1, 2, 3, 4, 5, 6, 7, 15, 22, 27, 29, 32, 45, 46, 59, 62, 83, 81 PT13c, 14c, 737e/f, 823, 96, 97.</p> <p>"My father, take the <i>ntr.ti</i>, open four times your eyes and mouth. I have opened your mouth and joined your bones" (Sc. 26)</p> <p>Otto 1960: 80-89</p>	<p><i>Wr-ḥkzꜣw</i> "magician's wand" <i>ḏwn-ꜣ adze</i>, <i>dwn-wr</i>, <i>Mrw-</i> wooden adze, <i>nwꜣ</i>, <i>ntri</i>, wan- wooden adze <i>ntr.ti</i>, <i>bjz n ntri</i>, <i>mshitiw</i> <i>mddf.t</i>, <i>ḏꜣm</i> golden finger, <i>ḥw</i> chisel of <i>ḏꜣm</i> gold</p>	<p>The name of the leg is related to the determinative for the Big Dipper in the northern sky, associated with <i>ntr.ti</i>. Therefore, Lower Egypt is mentioned.</p>	<p><i>sm</i>, Lecotr, <i>imi-ḥnt</i>, « the son who loves »</p>
<p>29-32 Rep-16-27 33-36</p>	<p>A second OMC with "the son who loves" An act of <i>shꜣ</i> occurs in scene 30, possibly involving the use of polishing stones. The "son who loves" follow the priests and is in front of the Golden House. The son who loves holds the <i>mDdf.t</i> device while the statue/coffin is held up by the <i>imi-is</i>, and in some cases the <i>smr</i> hold a golden finger to the statue. The finger of gold may have been a chisel used for finishing the eyes and mouth of a statue. The action was possibly first executed with the finger and then substituted with an amulet. The mouth is said to be "swept" with the devices. The mouth is opened with</p>	<p>In front of the Golden House or the <i>ḥꜣ</i>-chapel</p>	<p>Text:1, 2, 4, 5, 6, 7, 8, 10, 15, 22, 26, 46, 49, 62, 79 PT 15, 644a/c</p> <p><i>sk rꜣ.f snꜣ rꜣ.f</i> "Your mouth is swept clean" (Sc. 33 – Text 2)</p> <p>"I will sweep your mouth out for you, I will open your eyes" (Sc. 34)</p> <p>"Your mouth is</p>	<p><i>mddf.t</i>, <i>ḏꜣm</i> golden finger, <i>ḥw</i> chisel of <i>ḏꜣm</i> gold</p> <p>4 <i>ꜣb.t</i> ("polishing stone?"), <i>ꜣb.t</i>, <i>nws</i></p> <p><i>sm</i> priest little finger – amulet?</p> <p><i>nms</i> (piece</p>	<p>The „son who loves“ is the hereditary noble, and therefore represents Horus. 			washed" (Sc. 70b – Text 7) Otto 1960: 155-164			
73-75	Transport of the Statue to the chapel and its placement within the shrine. This part of the ritual undoubtedly comes from the statue ritual and can thus be connected to the temple daily ritual. Scene 73 (dragging of the statue) is depicted in the entombment cult (dragging of the coffin). Bringing the <i>twt</i> to the chapel with the sarcophagus by nine men on a sledge and brought into the "tomb chapel" (<i>ḥd</i>). The statue is then placed in the chapel and sealed.	The statue (<i>twt</i>) and sarcophagus are transported into the tomb chapel by nine men. The statue is then positioned within the <i>ḥd</i> -chapel.	Text: 1, 4, 6, 7, 58, 64; PT 182a/b, 620a/b, 1823c, 619, 361 "God is coming! Beware earth! O <i>sm</i> priests the god has come to protect his land – enduring and be pure this god is carried to his shrine" (Scene 73b) Otto 1960: 164-171	Sledge, sealing material and seal	The storing of the statue in the chapel may present Horus resting in the arms of his father. The statue may also be considered as resting in the Horizon. The chapel itself may also be the Eye of Horus – "it is pleasant for Horus to be in your name" horizon, from which Re always emerges, in your names embrace "the palace interior; you really have put your arms around him" (PT 585a/c)	Nine individuals (<i>smrw</i>) dragging coffin/statue, <i>sm</i> , lector, <i>ḥri-ḥbt</i>

APPENDIX II: GLOSSARY AND CONTRIBUTORY RESEARCH

1. CHAPTER 1 – BACKGROUND INFORMATION

1.1. Chronological and Contextual Framework

Egypt is land of contrasts, evidenced through divisions as Upper and Lower, East and West, Black land (*km.t*) and Red land (*dšr.t*), etc. It contains deserts, fertile valleys, mountain ranges, oases and plateaux (Pires 2017: 151). A diversity which is reflected in material culture and ideologies and furthermore may have influenced theological speculations and ritual practices (see Quirke 2015; Pinch 2006).

The annual flooding has affected the lives of populations living within Egypt's different regions, all with a diversified topography, such as the floodplains and the red lands, creating differences in material culture and belief systems (Quirke 2015:13). Therefore, it is important to reconsider ancient Egyptian "religion" by not only defining it as a system based on an official royal cult, but also acknowledge the numerous regional varieties of belief systems and rituals, as well as different expressions of personal piety and religious practise (Quirke 2015: 25). Belief systems are generally not mutually exclusive, but variants of the same, or at least, similar ideas, though expressed differently depending on social context and landscape. As stated by Quirke (2015), very few ancient Egyptian landscapes have been investigated in an effort to reconstruct the existence of the individuals who made their living within them and how they experienced the sacred or funerary landscape beyond their settlements (Quirke 2015: 62).

1.2. Glossary: Magic

The most common definition of magic was established by James George Frazer, who in his *Golden Bough: The Magic Art and the Evolution of Kings* in 1906 described it as a means of manipulating supernatural forces for the practitioner's own gain, while stating that such an approach differed from religion, which according to Frazer is a communal effort to placate the unknown and often dangerous forces that are believed to have the ultimate control over our existence. The Dutch Egyptologist Joris Borghouts (1994) described magic as generally being of a private nature, not controlled by any institutionalised belief system. It was used for the living as a means to protect themselves and loved ones from spirits and energies which could cross realms (1994: 120-121). Similarly, Jan Assmann (1997: 3) claims that magic is defined as a ritual only used in domestic contexts rather than a religious practice accompanied by specific rituals in a formal setting. Robert Ritner (1993:8-9) has argued that the difference between a priest and a magician is that a priest invokes a deity in order to provide a service, while a magician considers himself to be a deity.

Egyptian magic may also be linked to "behaviourism", meaning that words, acts and objects used in ritual practices are linked and complement each other (Ritner 1993:72). In this sense it is very difficult to differentiate between magic and religion in ancient Egyptian belief, they were probably considered to be one and the same. Egyptian magical practice might relate to what Frazer in 1911 defined as *sympathetic* or *contagious* magic, i.e., the notion that "things which have once been in contact with each other continue to act on each other at a distance after physical contact has been severed" (1994: 26).

1.3. Glossary: Myth

The role of mythology in ancient Egypt has been debated by numerous Egyptologists. The existence of myth indicates a certain distance between the divine and the world of the living, as well as a scepticism towards religious belief (see Assmann 1977). There is little evidence for myths in earlier periods, perhaps the first notions of the Osirian myth and a certain discussion regarding deities has arguably been evidenced during the First Intermediate Period (not before 1350 BC) (Assmann 1977:9-10; Otto 1959:1-2). However, Katja Goebis (2002) has argued that the Pyramid texts inside burial chambers are allusive, possibly due to the fact that they are 'genotexts', in the sense that they may have had a meaning and/or function that we now are unable to understand, and this is simply not because the concept of myth did not exist. The task of the Pyramid texts may have been to accompany offering rituals, and they might have alluded to a mythical realm while framing a ritual action (Goebis 2002: 27). Susanne Bickel (1994) further argues that creating a myth is a creative expression using visual/textual representations to accompany tangible elements, such as ritual utensils and verbal invocations (Bickel 1994: 245-9). Such definitions of myths allow for more fluid interpretations, which are not submissively adapted to established dogma (Quirke 2015: 114). Mythology was perhaps not of such a crucial importance for average ancient Egyptians, who might have emphasised ritual rather than framing it within narratives at least in some contexts (Baines 1991: 160-2), as might be perceived through the layout of Pyramid Texts (c. 2400–2300 BCE) which concentrate on performance rather than providing a clear mythological narrative (Raven 2012: 191; Baines 1991: 101-2).

If a socio-anthropological approach is applied to the relation between myth and ritual, two main trends are particularly evident. *Structuralism*, which considers myth to be a kind of language - even if the outer forms of myth may vary considerably, the basic structures remain the same. Such a universalist view harks back to Émile Durkheim (1915), who considered myth to be a written/oral categorisation of the world, independent of ritual. This interpretation was further elaborated on by Claude Lévi-Strauss (1955), who continued to stress myth as linked to shared human mental strategies used to structure, understand and mediate the contradictions and mysteries that confront us in life. However, if myths are going to be applied/connected to the use of ritual paraphernalia, *functionalism* may prove to be a more practical approach than *structuralism*. So far as myth is concerned, it may be argued that *functionalism* finds its origins with Bronislaw Malinowski who in 1926 wrote that a myth can only be understood in the light of its function within a particular context/society, comparisons with other societies and ideological constructs are, according to Malinowski, virtually worthless. In accordance with a functionalist view Egyptian mythology appears essentially to have been adapted to action and physical, tangible elements and was only comparatively later in time organized and expressed in accordance with coherent narratives (see sections 2.2, 2.3).

1.4. Glossary: Ritual

Anthropologists are often reluctant to define rituals since these tend to be diverse, constantly changing over time and performed in an almost instinctive manner, even if, at the same time, they may be imbued with strong emotions (McCauley & Lawson 2002: 103). Rituals may be both deeply personal and carried out in a highly structured manner, based on repetition and performance. Anthropologists have defined ritual as a sacred performance, associated with symbols, religious/magical beliefs and arguably mythology (Bell 1992: 19-29). For the purpose of this thesis, rituals will be defined as "activities involving gestures, words and objects, performed within a segregated area and in accordance with an established order" (Lundius 2020 – based on Bell 1992; Turner 1969; Schechner & Appel 1990). Action is at the heart of any ritual performance

connected with offering tables and may thus be related to the concept of *sacrifice*, a term combining two Latin words *sacra*, sacred things, and *facere*, to do, i.e., “to perform a sacred act” (Lundius 2020).

2. CHAPTER 2 – THEORETICAL FRAMEWORK

2.1. Glossary: Ancient Egyptian Cosmogonies

The term cosmos derives from the ancient Greek κόσμος, meaning “order”. It later became the definition of “world”, “universe”, “mankind”, an all-encompassing entity (Ragavan 2013:7). Cosmogony, that is notions about how cosmos came into being, determined the sanctity of the ancient Egyptian landscape and the central aspect of these beliefs was that to create and preserve life order, *mꜣꜣt*, which had to reign over chaos, *isft* (chaos). Humans are an integrated part of cosmos and depend on it for their existence both prior to and after death. The essential role of man is to maintain cosmos, something that is accomplished through various means; architecture, kingship, ritual, etc. (Ragavan 2013: 7).

Ancient Egyptian landscape was divided and ordered according to physical characteristics, both natural and architectural features, as well as historical factors (Quirke 2015:19-21). Such phenomena interacted to create the nomes of ancient Egypt in a political and administrative framework (ibid).

The world developed from a body of water, triggered via the manifestation of a creator – Amun. Accordingly, cosmos was divided into the sky, the earth and the underworld. Nu(n) was the male counterpart of Nut, who by embodying the primordial waters was often labelled as “the watery one” *nwi* (Allen 1988: 4). The important quality of Nun was his “hiddenness”, which in turn created the contrasting, tangible and dynamic elements of the Cosmos (Assmann 1998: 139). Even if the above-mentioned cosmogony may be considered as an essential foundation for all ancient Egyptian beliefs about the origin of the world, there existed various, often slightly divergent accounts about the particulars of the process. The main cosmogonies of ancient Egypt were the Hermopolitan, *iwnw*, and the Heliopolitan, *hmnw*. The well-known Osirian myth, with its family feuds and a clear linear family tree constituted the core of the Heliopolitan creation myth, commonly known as the Ennead, while a more elusive and conceptual creation myth was outlined in the Hermopolitan account of the establishment of Cosmos (Lesko 1991: 88-95). However, both cosmogonies emphasized the need to address the duality and inevitability of nature and expressed themselves through tangible and visible elements, such as water, darkness, all linked to agency.

The Heliopolitan Cosmos reflected a legitimisation of kingship as a means to unify Egypt and secure life-preserving phenomena, such as the inundations of the Nile and the rising of the sun (Lesko 1991: 92). The triad composed of Osiris, Seth and Horus play a significant role in this cosmogony, especially concerning the unification of Egypt km.t The Black Land with the dSr.t Red Land, the juxtaposition of different elements within its specific landscape and any change affecting its inhabitants (Lesko 1991). This cosmogony reflects a dynamic existence with Osiris as a god of regeneration, Isis connected with nurturing and motherhood, Seth representing change and movement, while Nephthys acted as a mediator and complement to Seth (Lesko 1991: 92). The dynamics of this triad will be further addressed in the section on water (2.4). The Hermopolitan cosmogony concerned the Ogdoad, eight primordial deities who were mainly worshipped in Hermopolis-Khnemu, or “Eight-town” (Bickel 1994:28). Lists of Hermopolitan deities (four gods and four goddesses) vary slightly over time, but are generally organized in pairs, most common are – Nun and Naunet, Kuk and Kauket, Heh and Hauhet, Amon and Amaunet (based on Lesko 1991: 95; Allen 1988:8-12; Wilkinson 2003: 77-8; Wilson 1997: 728) (Table 2.2.2

above). These eight quite abstract deities represented an intangible but dynamic world where cosmic order was maintained during a constant feud between chaos and order (Lesko 1991: 94)¹.

According to Allen (1989:13-17), as described in the Pyramid Texts (e.g., PT527, 600) and Coffin Texts (e.g., CT714, 75), the ancient Egyptians may have believed the sky to be a body of water and just as the Nile on earth it finds itself in a constant state of flux. Mythological places such as the Field of Reeds and Field of *ḥtp* were considered to be part of the sky and could be flooded and replenished at any time via numerous canals and The Winding Waterway (Allen 1989: 7). “These sparse indications from the Pyramid Texts suggest an early image of the celestial domain as an expanse (*pḏwt*) of water (*bīz*, *kḥw*) above the earth (*ḥrt*) whose shores (*īdbw pt*) consist of marshland (*šḥt īzrw*, *šḥt ḥtp*) with canals (*mrw*, *ptrw/ptrti*) and lakes (*šīw*), bordered perhaps by desert (*w’rt*, *iškn*)” (Allen 1989: 9). Such notions further reflect the dualism of earth and sky, which nevertheless are considered to be one and the same but expressed/manifested differently. Similarly, the sky was divided into two separate realms: an upper sky and a “nether-sky”, in between the earth floats.

According to Hornung (1982), the notions of resurrection and rejuvenation in ancient Egyptian belief depend upon the interaction between the fertile landscape of the *dwt* and the non-place or primordial waters of Nun. The primeval God united and created Cosmos, which in itself is composed of numerous parts, similarly Osiris creates and recreates Cosmos by a sacrificial act of dismemberment (Hornung 1982:128, 250; Pirelli 2002:20). However, this act is also a result of ‘chaos’ in the form of Seth, therefore showing an interdependence of passive/active agents. Such complex notions are present in almost every society where specific aspects of the cosmos contribute to ritual performances. Throughout ancient Egypt, daily offerings to the gods secured and maintained Cosmos (Teeter 2011: 41).

2.2. Glossary: The Concept of the Soul and the Mechanisms of Heka

What is known as the *šḥw* ritual may have been performed in relation to the *Opening of the Mouth ceremony* and various offering rituals. This ritual entailed the transformation of the deceased into an *šḥ-being* and can be literally translated to “making an *akh*” (Assmann 1990b:11-2). Embalming, funerary and burial procession imagery from around 2500 BCE onwards often had “reading *sakhu*” incorporated in the caption (Quirke 2015: 235). Such utterances have also been labelled “glorifications” or even “transfigurations” due to the fact that they were intended to make the *šḥ* of the deceased “excellent” (Ready 2010: 123; Smith 2009:1). Performed during festivals in both temple and funerary contexts they emphasised a need for transformation, or even fusion of different elements in order to create something “excellent” able to transcend into another state or realm.

In ancient Egypt, concepts of personhood, agency and soul were all addressed in complex terms, indicating that a series of elements were fused together to create a human being. The different elements and abstract concepts were personified as deities or intangible entities interacting with each other, creating both dichotomies and harmony.

¹ It has been argued that the Hermopolitan Ogdoad did not appear in sacred texts, nor in iconography, before the Second Intermediate Period (ca. 1650-1550 BC) with the female counterparts appearing even later (Zivie-Choche 2006: 34; Bickel 1994: 28). Some researchers have claimed that the initial Ogdoad was only composed of male entities, first emerging during the New Kingdom. However, there may also be evidence of a form of the cosmogony, which may date back to as early as the Old Kingdom (Wilson 1997: 728; Borchardt 1913: 21).

In order to become the “blessed deceased”, i.e., joining *kꜣ* (life essence/double) with *ḥꜣ* (spirit/soul) to become *ꜣḥ* (enlightened/“effective” spirit), two more active forces had to be added to the process: *ꜣiꜣ* perception and *ḥw* pronouncement (Harrington 2012: 1); Forman & Quirke 1996:23). Both these elements were assumed to exist at the right side of Re and essential to his creation of the world, made possible through the use of *ḥkꜣ*, which was a protective and creative power that sustained all life (Forman & Quirke 1996: 23). Through the creator god’s spittle *šw* air and *tfnwt* moisture were created, both personified as “a generative force” (Ritner 1993:75). Accordingly, magic is also linked to behaviourism, reflecting a connection between the spoken word in the form of a spell and an act involving rituals and material such as a magical utensil (Ritner 1993:72).

Magic itself is personified in the form of *ḥkꜣ*, represented as a generic anthropomorphic god but may also be represented by the same symbol used for *kꜣ* (Wb III 175-7 in Wilson 1997: 682; Teeter 2011: 162). The god *ḥkꜣ* was an abstract entity, akin to the divinities of the *Ogdoad*. He was described as the one “who propels *kꜣ*” (Raven 2012: 19). The power of *ḥkꜣ* was associated with the power of the written and/or spoken word, just like a sacred landscape was empowered by the symbolic nature of hieroglyphs, as discussed earlier (da Silva Veiga 2009:27). Accordingly, the mouth played an important role in the execution of *ḥkꜣ*. Actions of licking, swallowing, spitting are commonly present in spells throughout ancient Egypt (da Silva Veiga 2009:28; Ritner 1993:74-110) and do thus also emphasize the importance of expelled liquid in association with words during creative processes.²

2.2.1. *kꜣ*

kꜣ is closely related to sustenance and reproduction, mostly due to the fact that the word itself is similar to food, crops, ploughing, etc. (Taylor 2001: 19; see Table 2.2.3 above). Understandably, therefore, offering tables may also come in the shape of *kꜣ* (Taylor 2001: 22). The mortuary cult was performed in order to present offerings to the dead. The way that this occurred was by enabling the *kꜣ* to ascend from the burial chamber to each of the *kꜣ* statues and/or stelae in front of the offering table. According to Assmann (2005), the *ḥꜣ* represented the physical sphere of the deceased, while the *kꜣ* was a more intimately connected with the social sphere, representing the status of the deceased transcending from generation to generation (Assmann 2005:90-102). Through its emphasis of potency as an active element, *kꜣ* is associated with action. Gordon (1996) describes *kꜣ* as an “*impersonal* vital energy that makes the world live and function”, therefore it is a vital source of nourishment (1996: 35).

The creative power of words and imagery was central to ancient Egyptian magical practice and the task of a priest, or magician, was to discern and use the essence, the *kꜣ*, in humans and objects (Ritner 1993:25). Magical powers were believed to be inherent in stones, metals, plants and animals (Ritner 1993: 17; Aufrère 1997: 114-135). Anyone who was able to manipulate objects into becoming charged with divine energies was considered to be a kind of magician, lit.

² In the Bible, God creates with words and there were already primeval waters: “In the beginning God created the heavens and the earth. Now the earth was formless and empty, darkness was over the surface of the deep, and the Spirit of God was hovering over the waters. And God said, ‘Let there be light,’ and there was light (Genesis 1:1-3). St. John’s gospel also mentions the creative force of words: “In the beginning was the Word, and the Word was with God, and the Word was God. He was with God in the beginning. Through him all things were made; without him nothing was made that has been made (John 1:1-3).

“one who carries the ritual books” (*hry-ḥbt*). Even sculptors and artisans could be described as “life givers” or *sʿnh* (Raven 2012: 33; Forman & Quirke 1996: 21). The *k3* was assumed to constitute a vital force resting in all things, both material and immaterial, while *ḥk3* was considered to be the creative impulse, which activated the vital forces in everything (Raven 2012: 19).

Since the hieroglyph *k3* may be interpreted as depicting an embrace it makes sense to assume that *k3* could transmit energy through physical contact, stated in PT 359: “Atum put your arms around Pepi Neferkare as *k3*-arms, so that the *k3* of Pepi Neferkare might be in it, firm for the course of eternity. Ho, Atum! May you extend protection over this Pepi Neferkare, and prevent anything bad from happening to it for the course of eternity, like you extended protection over Shu and Tefnut” (PT 359 Pepi II in Allen 2005:269; Lesko 2001; Heiden 2003; Harrington 2012: 13).

2.2.2. *b3*

The *b3* represented a more interactive capacity of the soul. It was believed to be “man’s alter ego” which acted on behalf of the deceased’s needs (Harrington 2012: 3). *b3* is generally depicted as a human-headed falcon representing the physical part of the soul of the deceased, most commonly depicted from the NK onwards (Assmann 2005:90). In *Coffin Texts*, *b3* appears before the living and thus is assumed to be able to leave the tomb, making it different from the *k3* the force of which, generally, is assumed to be limited by the walls of the tomb. “The *b3* comes to the place it knows, it does not miss its former path, no kind of magic holds it back, It comes to those who give it water” (Instruction of Merikare 52-3, Papyrus of Leningrad 1116A, P. Moscow 4658 Lichtheim 1973: 97, 101). The *b3* is able to interact with the living and was endowed with functions similar to those of living beings, mainly due to its ability to move around during the day (Harrington 2012: 3). Statues were often assumed to be receptacles of the presence of a god, and the *b3* could also make use of them. Statues could provide physical manifestations of *b3* that had taken refuge within them and was then often defined as *k3* (Teeter 2011: 43). The *b3* is omnipresent in the cosmos (Teeter 2011:43).

2.2.3. *3ḥ* and *šwt*

The *3ḥ* is essentially the only part of the soul which could communicate with the living and appear in corporal form. It is often defined as a “beneficial” or “effective” spirit (Harrington 2012: 8). The *3ḥ* was assumed to be a physical manifestation, or representation, of the deceased, an invisible form of energy or force transformed into a tangible entity (ibid). In the netherworld the *3ḥ* had to bring gifts to Osiris in order to not to be turned into an *3ḥw*, a vengeful spirit (ibid). The shadow, *šwt*, is yet another part of the soul, somewhat similar to the *b3* in the sense that it is in charge of procuring food for the corpse. It may be considered as one of the most powerful aspects of the soul, being a direct manifestation of the power of the sun. The shadow is a visible proof of the sun’s light and life-giving energy reflected by an individual and does, therefore, become a parallel entity of *3ḥ*, often described as related to solar energy as such described by the verb “to shine” (Harrington 2012: 7-11).

2.3. Water in Ancient Egyptian Magical Practice

“The waters symbolise the entire universe of virtual; they are the fons et origo, the reservoir of all the potentialities of existence; they precede every form and sustain every creation. The exemplary image of the whole creating is the island that suddenly “manifests” itself amidst the waves. Conversely, immersion in the waters symbolises a regression into pre-formal, reintegration into the undifferentiated mod of pre-existence. Emergence repeats the cosmogonic act of the formal manifestation while immersion is equivalent to a dissolution of forms” (Eliade 1991: 151).

In ancient Egyptian magic, liquid elements especially bodily fluids such as spitting, licking swallowing, with a high-water content were considered to be vectors of powerful energy (Ritner 1993: 73-110). The invocation of a scarab from the Leiden Papyrus col. 9/30 outlines the power of active water: "Fill your mouth with the water [of the pool?], pour it on my head together with the one who is at my hand; make me prosper, make him prosper." (from Ritner 1993: 79). In magical practice water was seen as an emulator for magic to be manifested. As Ritner (1993) clearly states: "the power of spell is brought into contact with the patient in various ways: direct application as an amulet to 'open' the throat, and either licking or drinking the text to ingest its efficacy" (1993: 96). Therefore, the act of licking or swallowing are means of internalising divine force (see Lundius 2013). The actual verb "to swallow" became the verb "to know", illustrating the importance of ingesting liquids. To drink water is to know, therefore, to see how water is poured over a table, lead into a spout and then through the shaft to reach the deceased creates an effect of allowing the deceased "to know" and become an "effective spirit".

In the Heliopolitan cosmogony, the triad was believed to collaborate to activate magical properties of inanimate objects. Seth was the active agent who killed Osiris and disbursed his energy by dividing his corpse between Egypt's *nomes*. He also deprived Horus of his eye to spread its moisture throughout the cosmos. Osiris' efflux in the Nile and the Eye of Horus were liquid entities and the cyclic force of water was believed to be set in motion by Seth's actions as a rain god (Oestigaard 2011: 30-38). The active and passive events described in these myths are reflected in the changing states of the Nile. Before the Aswan dam, the Nile became red when its water mixed with the soil during the inundation period. Before the inundation, stagnant water remaining in the fields became green from vegetation and when these organic substances receded through the influx of the vitalising, inundating Nile water, it became white and creamy. These colours are closely related to mythology – the red symbolises the death of Osiris and the life-giving qualities of his streaming blood, green symbolised the vegetation nurtured by his efflux and rotting corpse, while white water suggested milk and tears of Isis, who restored Osiris to life and produced his heir, Horus (Oestigaard 2011: 51-53).

In its stagnant form, water creates life, while in its active form it carries the force of life, something which is reflected in its magical use and associated utensils. Furthermore, water "mirrors" cosmos since elements within the sky are reflected onto bodies of water, while their depth indicates access to obscure areas, making it an axis point to other realms (Oestigaard 2011b:46). As previously discussed, both cosmogonies, the Heliopolitan and the Hermopolitan place much emphasis on water. Both indicate the eternal existence of an essential natural force behind all creation, namely fertility and regeneration, supported by a constant presence and flux of water, something which is at the core of funerary ritual (Allen 2011; Bickel 1994: 28). The offering table, in this context, constituted an essential tool for supporting, harnessing, and activating the life-giving force of water.

The primordial waters of Nun, the source of all existence, was assumed to be a boundless expanse of water and water was thenceforth regarded and used as the main provider of vigour, fecundity, and transformation. Bodies of water could be sacred pools with staircases such as those at Dendera, or smaller water containers as the basins used within Butic burials. In religious texts, the waters of Nun are occasionally perturbed by cosmic events leading to the creation of new entities (Laborinho 2005:224). Such intermittent changes/transformation within and through Nun, causing both separation and re-unification is mirrored by ancient Egyptian magical practice.

Water in its “active” form was considered to be personified as the god Hapi, a fertility god often bestowed with the title “Lord of the Offering Table” (Rotsch 2005:230). Hapi was above all the god of the Nile’s inundation that came “to a halt on the high fields, the waters fighting against the desert plateau, and the cultivable earth being in the Nun” (extract from “Hymn to Hapy” Ostrakon from Deir el-Medina; Rostch 2005:230; Lichtheim 1973:I, 205-10). Nun was the pristine source of all water, as stated on the statue of the priest Djed-Hor: “I have let a great well be constructed of stone to the south-east of the Wabet-sanctuary. Its depth reaches down to the Nun to present libations from it to the gods, which are in the Wabet-sanctuary” (Jelinkova-Reymond 1956: 106).

3. CHAPTER 3 – ADDITIONAL DATA

3.1. Materials: Stone

The following section outlines the morphological properties, Egyptian sources, and common uses of the following stones reflected in the sample: limestone, sandstone, granite and granodiorite, alabaster, basalt, greywacke and schist, and quartzite.

3.1.1. Limestone Geological Distribution

In Aston (2000) a total of 88 ancient Egyptian limestone quarries are listed with the following geological distributions going from south to north in Egypt (see also (Klemm & Klemm 2008: 23, Pl. 41-48).

Tarawan formation

dolomitic, dense and clayey limestone with fossils and incorporated mudstones.

Serai (Theban Group) formation

dolomitic, friable, sandy and silty limestone with fossilised mudstones.

Minia formation

dolomitic to dolomite-free and may range from dense (fine-grained) to slightly more coarse limestone defined by the distribution of mudstones and pack-stones.

Samalut formation

dolomitic to dolomite-free, a coarser limestone.

Mokattam formation

dolomitic and range from fine-grained to more silty and sandy limestone with clay mudstones.

Alexandria formation

dolomite-free, fine-grained and sandy porous limestone.

The most numerous ancient quarries are located in Serai, Drunka and Minia, coinciding with the presence of numerous ancient Egyptian monuments and necropolies. Due to the ready availability of limestone, it is understandable that quarries were in the vicinity of planned construction sites. It was also a common practice, during later periods, to use already outcropped limestone from rock-cut tombs, especially in the New Kingdom (see case study 4.0).

The original use of limestone in ancient Egypt was for the construction of funerary complexes. It was mainly used for fixtures such as flooring and the lining of walls and inside the burial chamber itself as seen in Early Dynastic tombs at Abydos (Aston et al 2000: 41). Its most famous use was for the construction of pyramid complexes in the Memphite region during the first half of the Old Kingdom in the mortuary temples and for the core and casing stones of pyramids, as well as for the elite mastabas. It was the most common stone for statuary, reliefs and other fixtures, including offering tables and stele (ibid).

3.1.2. **Sandstone (8.6%)**

Sandstone is another sedimentary rock with sand grains and mineral fragments consisting of quartz, calcite and iron oxide (Aston et al 2000:54; Klemm & Klemm 2008:167-9). It is similar to limestone due to its availability and malleability. It is encountered along the Nile valley and on desert plateaux from Esna up to Nubian territory in northern Sudan. Aston *et. al.* (2000) list 34 ancient quarries for sandstone. Formations of sandstone include Duwi, Qesir, Umm Barmil, Timash, Abu Aggag and Sabaya. Grain-size and minerals may aid in narrowing down the geographical origin of sandstone, but as in the case of limestone it is very hard to pinpoint the exact composition of various elements (Klemm & Klemm 2008:169-204). Quarries south of Aswan are now lost since they are currently under Lake Nasser, making it difficult to define southern sandstone formations (Aston et al 2000:54).

The earliest uses of sandstone include pavements and wall-linings in mortuary contexts, similar to the use of limestone. The material did not gain popularity until the 18th dynasty when it was principally used for the construction of monuments in Thebes and Abydos. In some cases, it was preferred to limestone during the New Kingdom, due to its durability and size upon extraction, which made it perfect for colossal constructions. Sandstone was not the material of choice for sculpture since its high malleability made it hard to elaborate details and chisel small engravings, such as hieroglyphic text. Nevertheless, it remained popular in the southern regions where limestone was scarce and was there used for reliefs and statuary (Aston et al 2000:54).

3.1.3. **Granite (8.9%) and Granodiorite (1.5%)**

Granite and Granodiorite are igneous rocks, formed by crystallised molten rock and containing varying levels of quartz and feldspar, as well as mica and other minerals. They are widely dispersed across the Nile valley and the desert, specifically along the cataracts from which they were formed (Aston *et. al.* 2000:35). Three ancient quarries have been located at Aswan, Tumbos and Bir Umm Fawakhir in the Eastern desert (*ibid.*). Granite from Aswan consists of two varieties: 1) coarse-grained with quartz forming the typical red or pink Egyptian granite. When there is a higher concentration of mica the granite has a darker appearance. The quarries around Aswan, Elephantine and other islands were in use from the Early Dynastic Period to the Roman Period. 2) medium fine-grained with the same composition as the previous kind, usually light grey or pink in colour. Both types of granite were used for lining burial chambers and other fixtures, such as thresholds, frames and columns in funerary complexes during the Old and Middle Kingdom, at sites such as Abydos. Granite is mainly known for its use in sculptures, sarcophagi, stelae, and obelisks.

Granodiorite from the same regions is darker in colour and is medium grained with quartz causing its grey colour. Quarries are located in southern Aswan and were in function up to the Roman Period. Its uses are similar to those of granite, but it was not used as frequently for buildings. One of the most famous objects made in granodiorite is the Rosetta Stone. Quarries at Bir Umm Fawakhir were used for exportation to the Roman provinces as construction material for fixtures such as columns and pavements (*ibid.*:38).

3.1.4. **Alabaster (3.35%)**

Alabaster is a sedimentary rock, often labelled as “mineral gypsum” (hydrated calcium sulphate) (Aston *et. al.* 2000:21). It is white in colour with veins of crystals known as “satin spar”. Only one quarry has been identified, in the Fayum oasis, despite its frequent use for the manufacturing of vessels. It is an extremely soft stone, and its inlays of impurities make its veins more prominent and appreciated as a decorative stone. Its earliest use dates back to the Predynastic Period for a

variety of objects. In the New Kingdom its most common use was for *khol* jars and other cosmetic containers (ibid).

3.1.5. **Basalt (1.7%)**

Basalt is an igneous rock with its main outcrop sites in Abu Rawash, Giza, Fayum, Cairo, Gebel el-Teir and Abu Simbel (Aston et. al. 2000:23). One ancient Egyptian quarry is known, located in northern Fayum dating to the Old Kingdom. However, basalt was used for sculpture in most time periods and prized by the elite for its colour, ability to take polish and hardness, especially during the Late Period and the Greco-Roman Period, indicating that quarries must have been present elsewhere (ibid:24). Basalt is composed of grey and dark green “phenocrysts” creating its iconic black colour, often with brown discoloration. Its uses in ancient Egypt ranged from pavements in mortuary complexes, especially in Old Kingdom pyramid complexes at Saqqara, Abusir and Giza, imitating the fertile Nile banks post-inundation (ibid:24). After the Old Kingdom it was rarely used until new quarries were opened for the manufacture of religious statuary in the Late and Greco-Roman Periods.

3.1.6. **Greywacke (0.4%) and Schist (0.7%)**

Greywacke and schist are sedimentary stones formed from fragments of other rocks and are classified according to the size of incorporated grains. Greywacke is a type of sandstone with a small concentration of clay making it a hard and dense, dark coloured stone. Hard greywacke is found in the Hammamat region in Egypt and was extracted from the Predynastic Period to the Roman Period. Its colour ranged from dark grey to greyish green and has a slightly “granular” appearance. Schist is more homogenous in appearance and is greener in colour. However, if there is a higher concentration of pebbles in its composition, it may give the rock a variety of colours ranging from white to red and brown. It was known by the Romans and can be known as *breccia verde d’Egitto*, defined by its greenish hue. Its most common uses were for statues and vessels with its earliest occurrence in the Predynastic period for the famous Naqada II palettes. From the Old Kingdom onwards, greywacke and schist were mostly used for statuary, stele and sarcophagi for the elite (Aston et al 2000: 57-58).

3.1.7. **Quartzite (0.4%)**

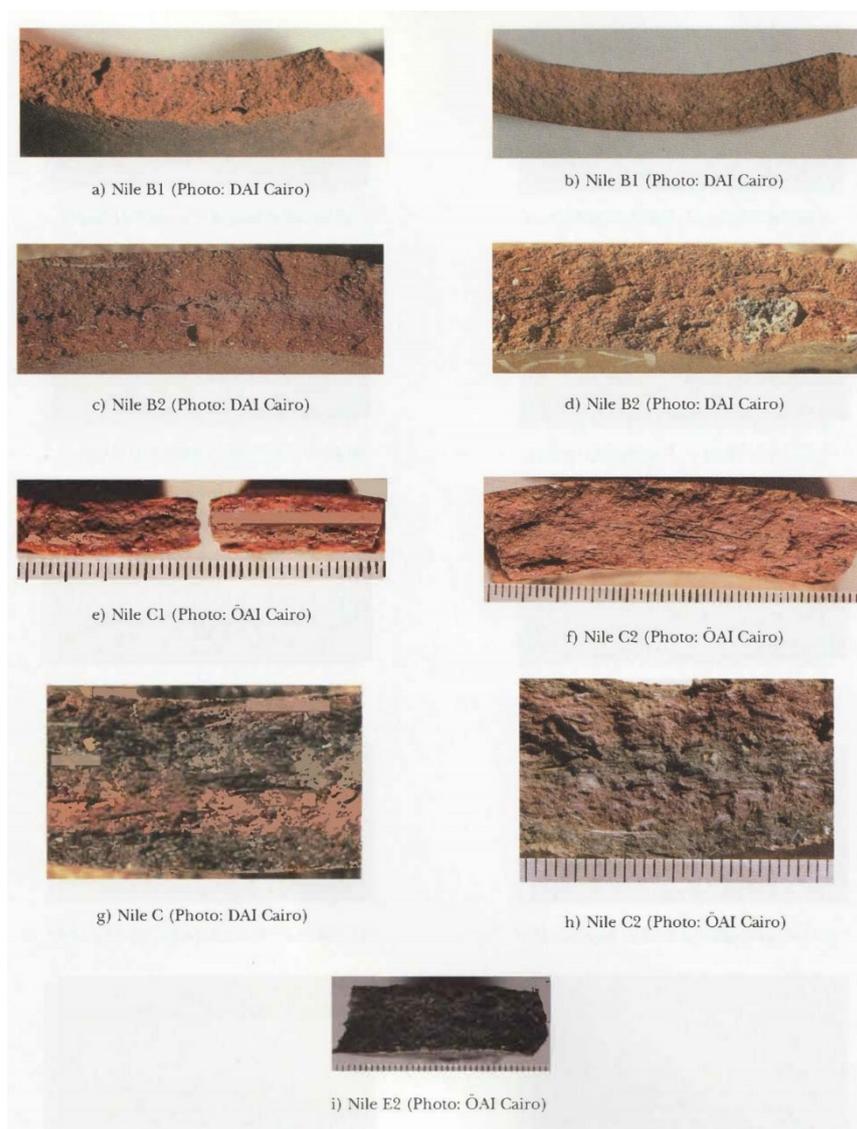

Quartzite is a sedimentary rock and a sandstone. The grains are tightly cemented together with quartz making it particularly hard and dense. It is commonly found in the Western Desert and in some places in the Nile valley. Two ancient quarries are known, an Old Kingdom site near Cairo and a New Kingdom to Roman Period quarry near Aswan (Aston et al 2000: 53). Quartzite is usually brown in colour but can also be grey, yellow, red and purple depending on varying levels of iron oxide within the quartz (ibid). During the Old Kingdom it was mostly used in the construction of thresholds in temples and the linking of walls within the burial chambers at mortuary complexes (ibid:54). After the Old Kingdom it was widely and frequently used up until the Roman Period for mortuary statues and sarcophagi as well as temple building material.

3.2. **Materials: Pottery**

Fabrics are determined by the clay used and its treatment. The following process of the potter determines the final fabric of the vessel: cleaning (removing impurities in the extracted clay), levigation (separating finer clay from denser, etc), fillers (adding material into the clay), the amount of water added (ibid: 128). The shaping and firing process also alter the clay itself and the choices here also determine its final composition due to chemical changes caused by the heat. Nevertheless, most classification methods involve observing and analysing the final fabric of the pottery, classified into the following: texture (a detailed account of the inclusions present), the

colour of the fracture compared to the surface of the vessel, determining the inorganic inclusions (limestone, mica, quartz etc.) and organic inclusions (straw, fibres, carbon, etc.), porosity, and hardness. Ancient Egyptian Nile fabrics and marl fabrics have been classified into the prevalent Vienna System, each with five subcategories. Most of the fabrics recorded from the database listed above may all be classified under “Nile B” or “Nile C” according to the Vienna System (see Figure 5). Nile B may be less frequent in the sample and is characterised as a finer coarse fabric with a medium amount of straw content making it a finer ware with plant remains used as “fillers” (ibid:130). The fracture of the ware is brown in colour with a black or red core depending on the firing process. Nile B is most commonly encountered, for example, among Middle Kingdom drinking cups (ibid). Nile C is what is known as coarseware, therefore a fabric containing a large quantity of coarse plant remains, making it highly porous. It may contain a variety of both organic and inorganic inclusions such as ash, shell, roots, limestone and in some cases even pieces of pottery (examples from the database have pottery sherds on the bases). It is by far the most common ware in the sample and was identified because of the usual grey to reddish-brown colour with a black core (Ibid:131). The firing is usually uneven causing the fabric of the objects to be often soft rather than hard. The vessels in this fabric are usually handmade using the methods listed earlier (ibid).

Figure 5 Examples of Nile Clays classified into the Vienna System (B, C and E) from the Handbook of Pottery of the Egyptian Middle Kingdom, Volume II: The Regional Volume (Schiestl & Seiler 2012: 467, Pl. I).

In Old Kingdom representations, women are often seen working in kiln settings, as well as in brewing and baking scenes. Pottery making becomes an informal affair in New Kingdom and, depictions show that, women and children could be involved in the activities (ibid).

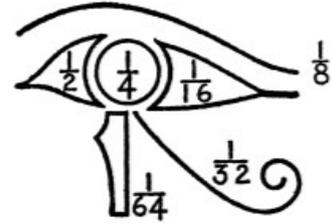

4. CHAPTER 7 – ANALYSIS AND DISCUSSION

4.1. Glossary: Filling the Eye of Horus

The filling of the Eye of Horus is a practice which may have first been attested to the Middle Kingdom Coffin Texts (CT 155). It is a reference to Thoth filling or “completing” (*mḥ*) the eye by joining various parts together regaining its title of *wḏꜣt* “sound eye” (Ritter 2003: 297). The ritual known as *ḥnk wḏꜣt* becomes most prominent from the Ptolemaic Period, as evidenced in the Temple of Edfu (see Wilson 1997: 286-7; Cauville I 1987: 9). The texts in templar contexts referring to this ritual are composed of alliterations and symbolism related to the *wḏꜣt*. The numerous synonyms for the Eye are an attempt to illustrate its multiplicity and therefore the notion of gathering different elements into one (Aufrère 1991: 281-2). By the Late Period, the *ḥnk wḏꜣt* was also a lunar rite, reflecting the nocturnal aspects of the sun. The waning phases of the moon were linked to Seth taking away pieces of the Eye. The waxing days mark the beginning of the filling process of the Eye and its restoration/rejuvenation lasting until the 15th/16th Day when the moon is full (Aufrère 1991: 295). In the Temple of Edfu the process is labelled as *šms-ꜥntyw*, referring to the filling of the moon (VIII 135,7-137,16 in Wilson 1997: 287). Aufrère 1991 outlines the lunar rite as described in the western chapel at Dendera, which also links the ritual to the inundation. Dendera is also described as the *ḥwt-wḏꜣt*, “realm of the *wḏꜣt*”, where the “mysteries” take place (Aufrère 1991: 294-5). The filling process is outlined as a procession of 14 gods, each representing an element or component, dedicated also for each of the waxing days of the moon. On the day of the full moon, the missing element is introduced, restoring the fullness of the Eye and the moon (ibid). The aim of the process as outlined by Durchain (1962), is to mimic the restoration of light after dark, the full moon after a moonless sky, the fertile lands after the inundation, etc. The filling also represents triumph of light over dark, life over death, fertility over sterility by the unification of godlike elements (Durchain 1962:25 in Aufrère 1991:292). The moon contrasts the solar faculties, receiving its energy from other elements and their combination rather than being potent itself. The last missing element is the virility received from Osiris, which was reinstated through the magic of Isis and then active by Thoth to reconstitute the Eye and all its elements (Aufrère 1991: 312). This occurs over 14-16 days, when the Nile flood accumulates and turns white. The elements which fill the eye are synonymous of luminosity and other virtues which receive their potency from the sun, represented as the virtues of specific gods. The offering scenes in temples pertaining to the filling of the eye are composed of gods offering minerals and vegetation to be rejuvenated when combined with the missing element (Aufrère 1991: 309-13).

The various parts of the Eye are composed of corn-measures, first outlined by Gardiner (1927: 197, Figure 6). However, this argument proposed by Möller (1911) and then by Gardiner (1927) is not based on any solid evidence (Miatello 2015). According to Miatello (2015), ancient Egyptian scholars were already aware in the Middle Kingdom that six fractions of *ḥꜣꜣt* are completed to one by $1/64$ *ḥꜣꜣt*, and that the term *ḏꜣ(.t)* “remainder” completes the sum of the six fractions of *ḥꜣꜣt* (Miatello 2015: 69).

Figure 6: The Eye of Horus and the fraction value in $\dot{h}k\dot{z}t$, adding up to 63/64 parts, with the remaining part magically added by Thoth (from Gardiner 1927: 197, in Ritter 2003: 297).

Measurements relating to various parts of the eye have been identified in hieratic texts from the Old Kingdom measured in $\dot{h}k\dot{z}t$ (arguably expressed in the Gebelein papyri, although hard to identify (Miatello 2015: 67). Other perhaps clearer signs in hieratic have been identified in the mathematical papyrus of 12th Dynasty Kahun papyri, referring to measurements in $\dot{h}k\dot{z}t$ and various symbols of the parts of the eye (Pommerening 2005; Miatello 2015: 67). By the New Kingdom (19th Dynasty) the $\dot{h}k\dot{z}t$ measurement is substituted with the $\dot{i}pt$ ($4 \times \dot{h}k\dot{z}t$), and parts of the eye begin to be represented in offering lists (e.g., offering list of Senmut) as well as outlined fully in temple contexts (e.g., Temple of Ramesses III at Medinet Habu; Miatello 2015: 68). By the Greco-Roman period, the measurements required for “healing” the Eye of Hours represented in receptacles are included in medical instruments as evidenced in the temple of Kom Ombo (AD 138-218) (Miatello 2015: 70). An example of these “graduated cups” is found at the Louvre (E 2511-N891), made in bronze dated to the 18th Dynasty (Thuthmosis) containing eleven divisions (in Miatello 2015: 76). Another example is a silver cup from Alexandria with a broad date ranging between the TIP and the Greco-Roman period. Its shape is of interest since it resembles the determinative (V104) \dot{v} $dbhw$ “requirements/components” of the $w\dot{d}z$ eye, included in temple offering lists from the time of Tuthmosis III (Miatello 2015: 77).

However, it is important to note that the scope of this section is not to go into too much detail concerning the mathematical implications and variations within the filling of the eye spells and rituals, but to focus on the process of actually “filling” the eye and how this may be reflected in both the use and symbolism of the offering table. These spells are furthermore not present within the funerary cult but occur within temple contexts from the New Kingdom (e.g., onomasticon of Amenope) onwards as well as in medical papyri (for more on Horus Eye factions see Struve 1930; Neugebauer 1930; Sambin 1997; Pommerang 2003; Ritter 2003). By the New Kingdom and Greco-Roman Period there are two main formulas, one that consists of uniting seven fractions ($\dot{d}z$), which added to a total of about 1 $\dot{d}z$ (1/64 $\dot{i}pt$), the other eleven fractions of hnw and $\dot{d}z$ adding to a total of 1/10 $\dot{i}pt$ (Miatello 2015: 83).

Catalogue/discription

Sample Picture

Rectangular limestone offering basin with sloping internal and external edges. Rim contains hieroglyphs in sunken relief. Iconography: none. Orientation of offerings: none present
 Catalogue: Limestone offering-table with a rectangular well, inscribed for a man named Nedjem and his son Sa-khent-ek. Hieroglyphic inscription incised around borders of table. Limestone offering basin with hieroglyphic text inscribed in sunken relief all around rim. The basin inside is not as deep as the table itself, about half way and its sides are sloped. The inside is filled with residue and white particles, and is heavily eroded in places, especially upper right side. Its sides are porous and contain black soil. Was originally smoothed over. The hieroglyphic text is written nicely around rim. The rim and basin are darker in colour compared to rest of table. Bottom is very smooth and is light in colour with original limestone colour present. The sides are coarse but lighter in colour and have not been smoothed over.

Catalogue/discription

Sample Picture

Square sandstone offering table with central raised platform containing an inscription and surrounding drainage canal leading to a spout incorporated in table. Iconography: not present.
Orientation of inscriptions: towards spout

Catalogue: Sandstone offering-table with rectangular depression for liquid offerings. Rectangular compact offering table made of sandstone and intact. The spout is incorporated in the structure and there are signs scratched into the centre of the table. The table has two canals, one surrounding the central raised area with the engraved signs and on the internal spout structure. Both canals have a raised curved line within them, meaning that just the sides of the canals are grooved. The sides are very smooth, and the bottom is coarse with incorporated square indents.

Sample Picture

Square limestone offering table with a Htp-shaped external spout structure and rim containing hieroglyphic text in sunken relief. Table has a sunken area containing offerings in raised relief and a spout canal. Iconography: grapes, fowl, lotus flowers, round bread, figs, calf head, meat joint, spouted Hs vase, round bread, sha bread (pyramid cakes) Orientation of offerings: towards spout
 Catalogue: Limestone offering-table of May: the customary offerings of food and drink, carved in low relief, occupy the whole of the table, with the exception of a raised rim. On the rim are incised two inscriptions, beginning on either side of the spout and continuing in opposite directions to the middle of the front. There are small abrasions both on the raised rim and on the table itself, but some of the damage, notably that in the upper left-hand corner, must date from antiquity, because the inscription has been cut over it. There is no trace of paint.

Square pottery basin containing four interlinking staircases, one on each internal side. Iconography: sacred lake. Orientation of offerings: no spout
 Catalogue: Modello in argilla di bacino lustrale di forma quadrangolare. Dai quattro ancoli in alto partono le scalette che consentivano l'accesso all'acqua in cui si trovava la purificazione. English Eternal Egypt: This limestone sculpture of an architectural structure appears to present a rectangular lustral basin. Served as it is by not one, but four staircases, this may illustrate a public structure or a royal one, certainly of considerable size. Thus, it is not evident whether this is to be considered an architectural model for an object of funerary significance.

Catalogue/discription

Rectangular diorite or basalt offering table with a broken off spout and with signs of significant wear and reuse. A sunken area with a central Htp sign and reed mat with other offerings may still be visible in raised relief. The external signs of the offering table contains a row of hieroglyphic inscriptions in sunken relief. Iconography: Htp sign with reed mat, Hs vases, round bread, vases. Orientation of offerings: towards spout

Catalogue: Like many other offering tables, this was square in shape with a projection on the front edge. In this instance the projection has been cut off, the a mark on the front edge shows where it once protruded. By the removal of this piece, the table has been fashioned into a rectangular flagstone, which, judging by the signs of wear, has been used as part of a staircase or floor, somewhere with considerable pedestrian traffic. The wear has obliterated much of the raised relief. But the depiction of three loaves of offering bread, together with four offering vases which stand on an offering mat, can, however, still be out on the surface of the table. The front edge of the top is decorated with two offering scenes, whose symmetrical arrangement on either side of the absent projection creates a mirror-image effect. King Sethos I is seen kneeling and presenting an offering vase to Horus. The god is depicted as a man enthroned with the head of a falcon. The contingent inscriptions contain the king's name and identify the god as "Horus in the Great House". The edge of the table is also decorated with the titles of King Sethos I in an inscription-band, which runs from the offering scenes to the middle of the rear edge. The offering table may come from "The Great House", which was probably a part of the Sun Temple in Heliopolis. 19th Dynasty, the reign of Sethos I, 1303-1290 B.C.

Sample Picture

Square bronze offering table model/amulet with a sunken area containing offerings in raised relief surrounded by a raised margin containing a figure of a seated man as well as sacred animals on every corner. At one end there is an external spout structure with a spout canal covered by a frog figure. At the opposite end are two rings (one missing and one with a bronze wire still inside it) for the table to be used as a pendant. Iconography: Hs vases, four round bread (centre), two bovine legs, two baboons (top corners), kneeling male figure (top centre), two falcons (bottom corners), frog (spout). Orientation of offerings: towards spout

Catalogue: The small model offering table is shaped like a shallow basin with a protruding spout on one side. the basin is surrounded by a broad edge and covered with pictures of offerings – two tall vases, four loaves of bread and two animal legs – rendered in raised relief. Five small figures – a kneeling man, two baboons, a falcon and a frog are located along the edge. A sixth figure on one corner, probably yet another falcon, is now lost. On the opposite side to the spout is a loop which securely holds a piece of bronze wire. Another loop on the same side is missing. On similar miniature offerings tables the wire links the two loops so that the table could hand in the frame formed by the wire. In the same way as here, many real offering tables were constructed with a spout and images of offerings on the table top. when lustral water was poured over such tables, the water would run over the offerings depicted across to the spout. then it was possible for the recipient of the offerings to derive benefit from the water, which, in the religious interpretation, had absorbed the essence of the offerings illustrated. Miniature offerings tables of the type seen here were probably votive gifts. The kneeling man represented the donor himself, while the baboons, falcon and frog should be regarded as sacred animals which were probably intercessors between the donor and the recipient.

Sample Picture

Rectangular limestone offering table with an area with offerings in sunken relief and surrounded by hieroglyphic inscriptions in sunken relief. Some surface of the table has been chiselled away. At one end are two sloping edged rectangular basins with a central internal Htp-shaped spout structure with a spout canal. Iconography: spouted Hs vase (centre), four sha bread, two round bread, two melons (centre), fowl (left) lump (left) ribs (left), calf head (right), joint (right), bovine leg (right), Htp sign (spout centre)
Orientation of offerings: towards spout
Catalogue: This offering table of white limestone has two rectangular depressions at the front for the collection of libation water. Between the depressions is a projection with a shallow channel which permits the water to run into the depressions after it is poured over the table. The table-top itself is decorated with an image of an offering: bread, meat, vegetables, fruit and a libation jug. The picture is framed by formulae, which entreat the gods Ptah-Sokar and Nefertum-Horus-Hekenu to bestow air and food on the owner of the offering table, Pagerger. The coarsely-hewn part of the table was originally built into a wall, so that the decorated part projected horizontally toward the celebrants. Traces of a cornice on its underside show that the table was made from an older monument which was cut to pieces and reused. The table comes from the Tomb of Pagerger at Sakkara. A niche with a likeness of Pagerger can be found in the Thorvaldsen Museum in Copenhagen, and other decorative elements from the tomb can be seen in the Egyptian collections in Berlin, Leyden and Paris. 19th Dynasty, circa 1305-1196 B.C.

Sample Picture

Square sandstone offering table with a central square basin with a raised rim, on either side of the basin are four bread (eight in total) and a drainage canal. There is a double canal inside an external spout structure. On the outer sides of the table are hieroglyphic inscriptions in sunken relief. Iconography: sha bread
Orientation of offerings: none

Catalogue: This offering table consists of a rectangular slab of sandstone with a protruding spout on one of the long sides. In the middle of the table is a square hollow for libation water, and carved at each end of the hollow is a decorative element which probably represents four oblong loads of offering bread. on the spout and along the edges of the table are gullies for libation water. Two inscriptions are carved along the side surfaces of the table: "An offering which the King gives, consisting of bread, wine, oxen and fowl (to) the Great Cow, who gave birth to Re, the Mother of Buchis, the Living Ba of Re, the Herald Re, Wah-ib-re in eternal joy". "An offering which the King gives, consisting of food, provisions and every good thing to the Great Cow, who gave birth to Re, whose name is Ta-ast. The man from Djamet, before Osiris, the Great, Foremost in the Necropolis in Eternity". The inscriptions state that the table was dedicated to Ta-ast, a cow which was considered sacred, because it had given birth to a Buchis Bull. It is also apparent that the table was donated to Ta-ast by a man Wah-ib-re, who came from Djamet, a place on the west bank of the Nile opposite modern Luxor. Buchis was a bull sacred to the gods Montu and Re. when a new Buchis was identified, it was taken with its mother to Armant, a city approximately 20 km south of modern Luxor, where they were both installed as sacred animals. On their deaths, each was buried in their own subterranean complexes, the Buchem and the Baqaria respectively, where each new bull and cow had its own walled-up vault. The Buchem and the Baqaria were discovered in Armant in 1927 and the two tomb complexes were excavated in the following years by the Egypt Exploration Society. Among the many finds were stelae (cf. 115) and offering tables. This was donated by the Egypt Exploration Society to the Glyptotek immediately after the excavations, in recognition of the financial support for the excavations from the Ny Calsberg Foundation. From one of the many funerary stelae it is known that the cow Ta-ast, named on the Glyptotek's offering table, was the mother of a Buchis which died in 77 BC. If one assumes that Ta-ast died a considerable number of years before her son, and that the offering table was carved shortly after the cow's death, then it can be dated with some accuracy to the years between 90 and 80 BC. Probably the decade 90-80 BC.

Sample Picture

Limestone rectangular offering table with two rectangular basins on either side of a Htp sign in raised relief. The mat section of the Htp sign creates a margin for the offering formula written clearly in sunken relief along the bottom of the table. Reliefs in sunken relief are also present on the central Htp sign depicting a seated man in front of an offering table as well as his title and dedication on top. The table is slightly worn evidenced by significant pitting and minor flaking as well as a groove at the top end near the tip of the Htp. Both basins are darker in colour and contain residue as well as signs of sedimentation. The sides were left coarse as well as most areas of the surface except for margin with the offering formulae. Catalogue: Display: the inscriptions became simpler during the First Intermediate. This offering table in limestone has a simple dedication of the tomb owner and a stylised hieroglyphic inscription. Probably purchased by P. Lugn from Service des Antiquités in 1931. From the warehouse in Saqqara. Acquisition, Swedish Troligen inköpt av P. Lugn från Service des Antiquités 1931. Från magasinet i Saqqara. Description, Swedish Offerbord med två större fördjupningar och en rad med hieroglyfisk inskrift. Square monumental granite offering table with a large horizontal canal with sloping edges and a sunken area containing offerings in raised relief including a Htp sign. Hieroglyphic inscriptions in raised relief are present all around the external sides of the table including offering bearers. Inscriptions are also present on the central Htp sign. Iconography: Htp sign, round bread, two spouted Hs vases, offering bearers. Orientation of offerings: no spout
 Catalogue: Altar from the mortuary temple of Amenemhat I. This imposing altar was found at the west end of a passage just outside the northern wall of the pyramid temple of King Amenemhat I at Lisht North. It must have been placed there by the quarrymen who - most probably in Ramesseid times - dismantled the temple. Originally, the altar presumably stood in the open court of the temple, its roughly shaped lower part (now removed) sunken into the ground. A rectangular libation basin is carved into the top of the altar, as well as representations in flat relief of an offering mat with two libation (hes) vases and three loaves of bread, the middle one incised with the king's throne name and Horus name and the added wish: "may [he] be given life forever!" At the centre of the altar's front side the incised birth name of the king (Amenemhat) forms the focus for rows of approaching fertility figures (fat men and women carrying offerings) who are designated by inscriptions as personifications of nomes (regional governorates) of northern Egypt (on the left) and southern Egypt (on the right).

Sample Picture

Rectangular granodiorite offering table with a sunken area containing offerings in raised relief, now hardly visible due to surface wear. One side is more worn and may be where the external spout structure was positioned now lost. Hieroglyphic inscriptions in sunken relief are present all around the external sides of the table. Iconography: two Hs vases, two round bread, incensors? Central round bread. Orientation of offerings: towards spout?
 Catalogue: This large offering slab was placed in a temple and dedicated by Seti I to the god Seth: it bears a representation of bread loaves and libation jars on the top. Where the spout would normally be, there is a smoothly finished depression, which suggests the piece was repaired in ancient times. On two sides of the depression are parallel scenes depicting the king worshipping Seth (on the right) and offering libation to his consort Nephthys. All pictorial and textual references to Seth have been defaced, except for his hieroglyph in writing the name of the king.

Sample Picture

Square limestone offering table covered in hieroglyphic inscriptions in sunken relief as well as the depiction of a male figure pouring liquid from a Hs vase over offerings. Other offerings are depicted in the centre of the table, as well as and streams of liquid. An external spout structure with incorporated Htp sign and reed mat is present at one end. Iconography: offering lists, male figure/priest, pouring Hs vase, three Hs vase hieroglyph, streams of liquid, lumps of meat, two bovine legs, ox head (right), six round bread, ribs (left), two bunches of reeds, large onion, fowl (right), papyrus and lotus flowers. Orientation of offerings: towards spout.
 Catalogue: Offering Table of Tjaenhesret, priest of Thoth, son of Iaa Tjaenhesret is shown pouring a libation over a group of food offerings clustered around three libation jars interspersed with cool lotus plants. The label before his face and above him reads "Libation for the Osiris Tjayenhesret, son of Iaa who held the same titles." Just below his feet an empty space is visible where a place left for the name of his son was never filled in. A tabular offering list appears above and on the right side of the scene, and the whole is surrounded by rows and columns that give an invocation offering to Osiris-Wennefer for Tjaenhesret, who is Overseer of the secrets of the domain of Thoth, and then list his many titles. The latter include particularly titles related to cults of Thoth and other gods resident in Hermopolis, Harendotes, Shepsi, Amon, and Amenemope. The last two are testimony to the wide spread of the cults of Amon throughout the country in the first millennium BC. The offering table must have originated in one of the cemeteries of Hermopolis.

Square limestone offering table with two square double-rimmed and sloping-edged basins at one end and hieroglyphic inscriptions including a seated deceased in sunken relief. No offerings present, but an offering list or formulae.

Catalogue: Hetjer's offering table has two depressions to hold liquid and a representation of Hetjer sitting before hieroglyphs that specify his desire for "a thousand of bread . . . of beer . . . of cattle and fowl." Neferka's offering table has one depression and representations of what may be a round loaf of bread and a copper pitcher in a basin seen from above. Such offerings were placed on the floors of tomb chapels to hold real food and liquids or, alternatively, to provide them magically through carved images and prayers. CATALOGUE DESCRIPTION: Offering table of limestone inscribed for a man named Htr. Hieroglyphs and seated figure are plain incised. Condition: Large chips in upper right and lower left; other small chips. Stone fairly friable.

Sample Picture

Rectangular limestone offering table with a sunken area containing a Htp sign in raised relief, a round bread, and a circular, ladle-spouted canal/basin. One end contains a rectangular sloping-edged basin and the rim encircling the whole table containing hieroglyphic inscriptions in sunken relief. Iconography: Htp, round bread, jar.

Catalogue: Hetjer's offering table has two depressions to hold liquid and a representation of Hetjer sitting before hieroglyphs that specify his desire for "a thousand of bread . . . Of beer . . . Of cattle and fowl." Neferka's offering table has one depression and representations of what may be a round loaf of bread and a copper pitcher in a basin seen from above. Such offerings were placed on the floors of tomb chapels to hold real food and liquids or, alternatively, to provide them magically through carved images and prayers.

CATALOGUE DESCRIPTION Limestone offering table belonging to (according to Dr. Federn) Neferka, Captain of the Royal Barge, and Scribe of the Marines. Viewed from the top the table is rectangular. There are two depressions in the top surface. The smaller one is rectangular in outline with a tapering depression. The larger depression is rectangular but for the projection from one of the sides of a representation, in relief, of a loaf of bread (part of the sign "htp"). Within the depression are two representations, in relief, of round loaves of bread. The four sides are vertical for a short distance (1.5 cm.) down from the top surface and then taper in to the flat base. There is an inscription, in sunk hieroglyphs, around the outer edge of the upper surface. Condition: The whole surface is worn. There are many chips and flaking in spots. On the bottom there is brown incrustation. "A boon which the king gives, and a boon which Anubis in front of the divine booth (gives): (namely) a burial in the west after a very good old age (to) the possessor of reverence by the Great God, the Capitan of the Royal Barge, the Scribe of the Marines. Neferka; the King's Acquaintance, the possessor of reverence by the Great God, (Neferka)."

Sample Picture

Square limestone offering table with a raised area containing offerings in raised relief as well as a cartouche-shaped basin. Surrounding the area is a drainage canal linked to a spout canal flowing through an incorporated spout structure. Iconography: cartouche, two nmst jars, four round bread
 Orientation of offerings: towards spout.
 Catalogue: Already from the Old Kingdom sacrificial panels were used in private mortuary cult for the symbolic feeding of the deceased. They feature various decorative elements, symbolic representations of offerings and inscriptions. Often also pelvis are embedded in the sacrificial panels. Troughs and spouts divert the spilled over the sacrificial panel liquids. Over time, there are changes in the appearance of the sacrificial panels. In this late example, the side is rounded to the spout. The surrounding channel, which opens into the spout, framed the image field of the sacrificial panel. In this, four round breads are presented on a narrow mat; Further, a cartridge-shaped depression, which can also be interpreted as a pelvis, and right and left of it vessels with spout. These symbolize the act of liberation.

Catalogue/discription

"Horseshoe"-shaped pottery offering tray containing a sunken area and is open-ended. At one end is a shrine-structure containing a seat/throne. The "courtyard" contains several offerings in raised relief including a pot stand and a square basin with an external spout structure. Iconography: round bread, meat joints, bovine head, bovine body, skins? Tails? Orientation of offerings: towards spout Catalogue: Pottery 'Soul House': an oval platter on which is a small shelter or room with a curved roof at the rear. In front of this room are arranged a number of food items. These include some pots (which are to be understood as containing food), some loaves of bread, and a number of joints of meat, all highly relevant to the needs of the deceased. In the centre at the front is a squarish offering table, with a small spout at the front which permitted libations to be poured (symbolically) over the offerings, and the water could then drain off. Curator's comments: 'Soul Houses' were originally thought to be a representation of an abode for the 'ka' spirit of the deceased, although this is now thought to be less likely, the representations of food offerings being more important. However, it is possible that these often crudely made models can be used to give some idea of what a typical dwelling might have looked like.

 Catalogue: Modello di tavola d'offerta in terracotta, di forma rotonda, con raffigurati degli alimenti.
 Eternal Egypt Exhibition: The Middle Kingdom produced a genre of article for the tomb that was meant almost as a tomb economy. Rather than decorate the walls of the tombs, small wooden dioramas illustrating figures making bread or beer were inserted in the tomb. These scenes magically provided the dead person with food for the Afterlife. The tradition appears to have continued in another form as small architectural structure, often in terracotta, sometimes in limestone, in the New Kingdom. These structures usually appear to be private homes or simply the courtyards supplied with foodstuffs to furnish the deceased in the Afterlife. This courtyard with choice animal bits is unusual for its round shape.

Oval pottery offering tray (?) with a sunken area and nine 3-D small rounded bottom vases. Iconography: vases. Orientation of offerings: no spout
 Catalogue: Vassoio in terracotta con nove vasetti per contenere liquidi, nello stesso materiale. Si tratta di un modello di offerta. English version Eternal Egypt Exhibition: Vases, both singles and multiples, were inserted in tombs from the earliest periods. Often the vases are of distinctive shapes, based on their ancient contents. Here, rather than include a number of loose vases, the undertaker has provided the tomb a group of nine small modelled as one with the high-walled tray.

Sample Picture

Redware pottery offering tray with a roof partially covering the internal area of the tray. The roof appears to have been added later since the edges of the tray are still defined as seen from the inside. The internal area contains numerous food offerings in raised relief. The offering tray has an opening functioning as a spout at one end. The exposed rim contains "postholes". The sides of the table are in good condition, darker red in colour and have imprints made with rope to as decoration. Iconography: potstand containing numerous pots on the left side (pots seem to be beer (with a cover) and least one appears to be an amphora with a seal), a central cone shaped object and four similar objects lying down on the right, a large round flat object, perhaps round bread (bottom centre), stack of ribs (centre above cone), horizontal lines - tails? Entrails? (top left) and a circular object creating a small basin inside (top left). There is also a u-shaped sausage at the bottom right corner lining the inner wall. Orientation of offerings: mixed.

Catalogue/discription

Square pottery soul house with a sunken area including an external spout structure. The sunken area contains offerings in raised relief and a covered area with a four columned façade and internal space accessed via a door. The mezzanine is divided into an upper and lower area via a rampart containing a central internal spout structure. Two square windows are present at the back. Iconography: ox head (right), four round bread (left), two cone-shaped objects (right) bovine leg (right). Orientation of offerings: mixed. Catalogue: zielehuis ; zuil ; verdieping ; hof ; goot ; offergave. So-called 'soulhouses' developed from simple offering slabs which were placed in or on top of the poorer graves at the beginning of the 12th Dynasty. In the final developmental stage, these model houses represented typical dwellings, including details such as stairs and even gardens. This particular soulhouse represents an intermediate form and probably resembles a rock-cut tomb. It is characteristic for Deir Rifeh in Middle Egypt, and these models imitate the rock-cut tombs in whose vicinity they have been excavated. The entrance to the tomb is represented by 4 columns. In the courtyard, several stylized offerings are represented. A central spout served for draining liquid offerings poured over these representations. Two small windows can be seen at the back of the house and protruding ridges appear on the roof. These two features seem to contradict that this is strictly the representation of a tomb. Scanty traces indicate that the object was once covered in a red slip. Source: M.J. Raven/N. Staring, in: D. von Recklinghausen (red.), *Ägyptische Mumien* (Stuttgart 2007), cat. 122

Catalogue/discription

Square pottery soul house with a sunken area containing offerings in raised relief as well as a square basin and spout canal inside an external spout structure. The soul house has a covered area and mezzanine with a raised rim supported by a two columned façade and a curved staircase. Iconography: ox head (right), bovine leg (top centre). Orientation of offerings: mixed. Catalogue: The model represents a house with a two-columned portico, and on the left a stair leads to the roof top where people might sleep during the hot summer and keep provisions. The walled courtyard has an outlet at the front indicating that this house model functioned as an offering "table" on a grave.

Sample Picture

Redware pottery soul house made in coarsewear subject to heavy reconstruction. The house is composed of an open courtyard area with an external spout, a four-columned façade and a two-level mezzanine connected to the lower level via a staircase. A small hole was made in the second mezzanine for the staircase but may just be a reconstruction. The top mezzanine is still intact and is composed of two separate sunken areas with a bulging centre. The separating wall contains a small opening connecting the two areas. Beneath these areas in the upper mezzanine are two oval windows which seem to be part of the original structure. the lower level mezzanine has been reconstructed as well as parts of the columns supporting it underneath. Inside the internal courtyard is a central square basin and offerings. Between the basin and the columns are more animal offerings. The left side of the basin has been entirely reconstructed including parts of the external spout structure containing a thin canal. Iconography: three rack of ribs (right), (right) is an ox leg (centre) and two circular or cone-shaped offerings (right). Orientation of offerings: mixed. Catalogue: 2 chambers, portico with four columns, 2 mulqafs with satahs. D-shaped enclosure with stepped wall and entrance, water tank with channel and offerings, stairway (restored).

Sample Picture

Coarse redware pottery soul house, subject to significant reconstruction using red-painted plaster. The house originally had two levels and still has a staircase connecting the upper mezzanine to the lower. The lower area appears to have been partially open and then covered by a mezzanine supported by a column. The walls of the courtyard are high and have been reconstructed to a great extent, including the frontal façade composed of two archways. Inside this courtyard area is the staircase, below which is a kneeling figure facing the internal parts of the house. Beside the staircase is a cup-like basin. The inner room has a bed and can be accessed by two doorways created by a central supporting wall. The upper mezzanine is entirely reconstructed and is composed of an upper covered structure with a semi-covered courtyard area and internal area. It has a two columned façade and a seat between the two openings to the inner area. Iconography: woman with grinder, basin, bed inside room. Orientation: no particular offerings present. Catalogue: Chamber with portico, upper storey, courtyard with high wall, stair to first floor; woman grinding corn and water jar at foot of stairway (much restored)

Catalogue/discription

Square offering table in pink granite with a sunken area containing offerings in raised relief including a central Htp sign with reed mat formation. The area is surrounded by a drainage canal leading to a spout canal flowing through a standard external spout structure and secondary Htp design in raised relief. The table also contains a margin with hieroglyphs in sunken relief. Iconography: Htp sign with reed mat (centre) secondary Htp sign on spout, 2 nmst vases, 2 round bread. Orientation of offerings: towards spout.

Catalogue/discription

Rectangular limesotne offerirng table divided into two separate offering tables each with a sunken area containing a large Htp sign in raised relief and on either side of the Htp sign are two rectangular sloping-edged basins linked to a central spout canal via two little canals in a Y-shaped formation. Each spout canal flows through an internal spout structure leading two a large rectangular basin. On all raised rims on the tables are hieroglyphic inscriptions in sunken relief. Iconography: Htp sign, ovaries? Fertility? Orientation of offerings: towards spout.

Catalogue

Series of limestone stelae and tables of offerings of a family. Their owners are as follows (left to right): (1) Sekusekht, (2) Ni-ankh-Hor and his wife, Shedi, (3) Sek-usekht-hedj and his wife, Mutemsaf, (4) Sek-uskht-Herib and his brother (?) Sekusekht-wer, (5) Mery and his wife, Hotep. None has any title. Above the cornice of nos. 2 to 4 are the names of the seven sacred oils.

ACatalogue #1			
Site Code S04	Context Asyut, S04 N12.2 (Tomb 4 - "Hogarth's depot" – shaft 1)	Accession Code S04 St. no. 97	Present Location Shutb Magazine
Material Limestone (white, flaky)	Location ID S04 Shutb Magazine - External Storage Room - Offering Table Box	Maximum Dimensions H. 4.8 W. >15.5 L. >16.6 Other Measurements Canal width 1.6 depth 0.7 basin depth 0.5 <i>htp</i> 3.1x3.2 depth 0.5 central offering 2.3x3 depth 0.5 side decoration (cone-shaped?) >4.8x2.5 depth 0.4	
Identification Offering table frag.	Residues and Wear – Signs of Use and Context Heavily worn limestone, porous and stained across surface. Breaks are light in colour with sharp margins. Surface of table (top side) is reddish in colour – may be staining rather than pigment. Scratchings are modern. Bottom of table has been smoothed, signs of chisel marks but all sides smooth. Undefined classification Fixture: Fixed? Wear: 5 (fragmented), Use: 3 (uncertain) No surface treatment No inscriptions present.		
Tool Marks Chisel – regular			
Date Range Undetermined			
Excavation Date			
Sketches			
Photographs			
			
Description Fragment of a limestone offering table, smoothed on all sides, slightly porous in areas with soil staining in deeper areas. Elements of decoration still present are two rectangular basins divided by a central canal, a central square offering with lines, sided by two vertical Hs vases with rims facing centre. There is a <i>htp</i> sign at the bottom, all in raised relief.			
Catalogue Parts of two offering basins, 2 <i>hs</i> + 1 <i>htp</i> sign around a central raised square.			
Deliberate Breakage			
Interpretative Comments May have been subject to quarrying but unclear. Reddish staining across surface, do not believe it is pigment but rather exposure since surface is also very porous. All sides smoothed so handheld and transportable rather than fixed. Execution: 2 (semi-professional).

Scientific Analysis		Date 27.08.2018	

ACatalogue #3			
Site Code S05	Context Asyut S05 Tomb N12.1 (Tomb 3)	Accession Code St. no. 1148	Present Location Shutb Magazine
Material Limestone (pink, flaky)	Location ID Shutb Magazine - External Storage Room - S05 Offering Table Box	Maximum Dimensions H. 16.5 W. 25 L.26 Other Measurements Htp 6.1x11.1 depth 0.5 rough estimate of basin dimensions 4x8.3 depth 1.1	
Identification Offering table	Residues and Wear – Signs of Use and Context Heavily worn limestone offering table, porous surface, significant staining (reddish in colour – prob. not pigment). Central <i>h_{tp}</i> and basins heavily eroded due to exposure to humidity rather than manmade. Has been roughly chiselled out of the bedrock evidenced by prominent chisel marks along the side – sharp margins and bright inside. Also subject to flaking. Classification: Type D Fixture: Fixed Wear: 4 (significant), Use: 3 (uncertain) No surface treatment No inscriptions present.		
Tool Marks Chisel – irregular along the base and sides			
Date Range First Intermediate Period			
Excavation Date 2005			
Sketches			
Photographs			
			
Description Large offering table with significant wear due to exposure to the elements – erosion and soil staining evident as well as heavy chisel marks. The offering table contains remnants of two rectangular basins with sloping edges and a central <i>h_{tp}</i> sign in raised relief.			
Catalogue Heavily damaged offering table.			
Deliberate Breakage			
Interpretative Comments Roughly hacked out of the bedrock – same decoration as two offering tables in situ. Eroded due to exposure to humidity – seen by porous surface and crystallisation processes. Execution: 2 (semi-professional)			
References and Bibliographic Information			
Scientific Analysis		Date 27.08.2018

Material Limestone (white, flaky)	Location ID Shutb Magazine - SCA Room - Box ?	Maximum Dimensions H. 24.5 W. 40 L.34.5 Other Measurements 15.4x12.1 basin -depth 4.4 side margin 10 (right) 9.6 (left) top 7.3 – bottom broken – flaked area – canal? Width 1.5 depth 0.2	
Identification Offering basin	Residues and Wear – Signs of Use and Context Heavily worn limestone with evidence of erosion as well as subject to flaking. Heavy residue (soil staining) alongside the internal area of the basin – subject to pitting. All sides and base very uneven and coarse, subject to significant flaking as well. Bottom of basin is lighter in colour and highly friable on surface. There may be evidence of a canal in the form of a depression on one side of the basin. Limestone is reddish yellow in colour, inside flaked areas it is bright white. Undetermined classification Fixture: fixed Wear: 5 (fragmented), Use: 3 (undetermined) No surface treatment present No inscriptions present		
Tool Marks Chisel – irregular			
Date Range Undetermined			
Excavation Date 2008			
Sketches			
Photographs 			
Description Limestone offering basin inside a large block of stone with uneven sides and base.			
Catalogue			
Deliberate Breakage			
Interpretative Comments May be evidence of a canal stemming from the basin – the bottom of “canal” has flaked off exposing white limestone –offering basin must have slightly leaned in this direction to facilitate the water flow. Execution: 2 (semi-professional)

ACatalogue #34			
Site Code S08	Context Asyut N11.1 Shaft 2 “southern side of chamber in the debris”	Accession Code S08/st.490 – single number 0013	Present Location Shutb Magazine
Material Limestone (white, porous)	Location ID Shutb Magazine - SCA Room - Box?	Maximum Dimensions H. 19 (very uneven base) W. 53.2 L.53.4 Other Measurements Sunken area 40.5x38 depth 0.5-1.1 deepest is bottom margin under <i>htp</i> sign. <i>htp</i> 20x26 depth 1.2 top left basin 6.6x10.5 depth 1.6 top right basin 7.5x10 depth 1.35 bottom left basin 7.9? x4.8 depth 1.1 bottom right basin 6.5x5 depth 1.1 top left depression? width 1.2 depth 0.5 top right depression width 1.5 depth 0.8 bottom right indent 4.8 depression 1.1	
Identification Offering table	Residues and Wear – Signs of Use and Context Highly damaged surface of offering table especially top half of <i>htp</i> sign – subject to significant corrosion – highly porous surface with gaping holes and defects in limestone. Limestone is reddish yellow in colour with slight brown staining in basins and what may be canals. Four depressions may be visible on the four corners of the table – these are slightly eroded inside, traces of residue and are darker in colour. Top right depression is porous similar to defects visible on the <i>Htp</i> sign. All sides are uneven and coarse, including base, also significantly lighter in colour and subject to flaking. Classification: Type A Fixture: fixed Wear: 5 (fragmented), Use: 3 (undetermined) No surface treatment present No inscriptions present		
Tool Marks Chisel – irregular sides and base			
Date Range First Intermediate Period			
Excavation Date 2008			
Sketches			
Photographs			
Description Large limestone offering table with a central <i>Htp</i> flanked by two basins at the top and what may be other two at the bottom. All features may be inside a sunken area upon the table. All basins may also have canals leading to each respective corner of the table. Orientation of offerings: towards basin Catalogue Complete offering table			
Deliberate Breakage			
Interpretative Comments Wear upon <i>htp</i> surface may be due to humidity but also liquids. May have been leaning towards this end since <i>htp</i> usually faces the shaft. All depressions in the corners are canals – water was poured on the centre – leading to each corner of the table. Execution: 2 (semi-professional)

ACatalogue #37			
Site Code S16	Context Asyut – P10.1 (Tomb 1) forecourt, shaft 7 “in the debris of shaft 7, depth 3.90cm	Accession Code S16 st no. 102	Present Location Asyut Gebel - Tomb 3 (Magazine tomb)
Material Limestone (pink, flaky)	Location ID In Tomb 3 S16 section in magazine tomb	Maximum Dimensions H. 21.5 (NB not level ground) W.37.5 L.44 Other Measurements Table surface 33x40 left basin 9x10.3 depth 1.4 right basin 8.3x9.8 depth 1.6 central canal 1.2 depth 0.6 <i>hꜥp</i> 14.8x16.7 depth 1.0 basin canals 1.3 depth 0.85. exposed margin on sides 4.7	
Identification Offering table	Residues and Wear – Signs of Use and Context Significantly worn surface of limestone. Surface limestone completely missing. Limestone is yellowish brown, white in breaks. Colour difference between surface and sides is evident. Limestone is slightly porous but denser than usual, and thus subject to flaking – standard quality in series. Most corrosion and wear present at the end of basin and canals. Basin canals barely visible due to wear on surface of limestone. All sides and base uneven and coarse. Classification: Type C Fixture: fixed Wear: 3 (medium); Use: 3 (undetermined) No surface treatment present No inscriptions present		
Tool Marks Chisel – irregular sides and base			
Date Range First Intermediate Period			
Excavation Date 2016			
Sketches			
Photographs			
Description Large limestone offering table with two basins at the top with a central canal in between and two canals one flowing from each basin in V-shaped formation, joining a the central canal. At the opposite end is a <i>hꜥp</i> sign in raised relief. Orientation of offerings: towards spout Catalogue			
Deliberate Breakage			
Interpretative Comments Directly cut out of bedrock as evidenced by the difference in colour and chisel marks. Most wear on the basin end – use of liquids may indicate the slanting towards that end since all wear is concentrated at the end of the central canal. Execution: 2 (semi-professional)			
References and Bibliographic Information

Photographs			
			
Description Large limestone offering table with a sunken area at one end containing the depiction of a central small <i>htp</i> flanked by two large <i>hs</i> vases with spouts facing inwards with streams of liquid flowing to the external spout structure, creating a canal extending from the <i>htp</i> at one end to the spout structure. Below the sunken area are two basins on either side of the canal and what may be the remnants of canals? Depressions? Leading from each basin to the spout canal. Orientation of offerings: towards spout Catalogue Offering table with decoration: two <i>hs</i> vessels with waterlines spreading out – facing each other. Above is <i>htp</i> sign (turned head down) Below two small basins.			
Deliberate Breakage			
Interpretative Comments Red patches across table indicate the use of red paint, also that the table was placed above ground level. Was originally carved from bedrock as indicated by the coarse base which is also lighter in colour. Execution: 2 (semi-professional)			
References and Bibliographic Information			
Scientific Analysis	Date 30.08.2018		

ACatalogue #47			
Site Code S04	Context Asyut "Hogarth's Depot" Tomb IV – N12.2	Accession Code S04 st. no. 0028	Present Location Shutb Magazine
Material Limestone (pink, porous)	Location ID Shutb Magazine - SCA Room - Box 02	Maximum Dimensions H. 11 W. 37 L.35.2 Other Measurements Offering table surface 29.5x29 sunken area 22x15.5 depth 0.2 <i>h̄tp</i> 8.2x9.3? depth 0.4 depression at top centre 0.1 wide depth 0.1 external spout structure 7.6x5.5 canal 1.7 wide x 9.4 depth 0.7 margin width 4.1	
Identification Offering table	Residues and Wear – Signs of Use and Context Heavily worn limestone, subject to flaking. limestone is very porous in of itself – there are large holes as part of the limestone. Defects have been filled with a type of plaster solution, note crack on right side of spout – may also be present in the canal since it is quite intact unlike rest of table. <i>h̄tp</i> sign is very damaged and has a depression flowing through it to the end of the table. The table has red pigment present across surface, still very bright, also present on external sloping sides. Rest of the table is uneven and coarse and also lighter in colour. Classification: Type J Fixture: handheld, fitted? Wear: 4 (significant); Use: 3 (undetermined) No surface treatment No inscriptions		
Tool Marks Chisel – smoothed sides, regular			
Date Range Middle Kingdom			
Excavation Date 2004			
Sketches			
Photographs			
			
Description Limestone offering table with a central sunken area containing the depiction of a <i>h̄tp</i> in raised relief. The table has an external spout structure containing a canal directed from the sunken area to the end of the spout. The sides of the table are sloping to a certain extent and the table contains element of red pigment. Orientation of offerings: towards spout Catalogue <i>h̄tp</i> sign as lower side of a rectangular flat basin			
Deliberate Breakage			
Interpretative Comments Table was entirely painted red, also sloping sides, rest was part of bedrock. There may be an entire canal system from top of table to end of spout as seen by depression in <i>h̄tp</i> . Defects in limestone may have been mended with plaster. Execution: 2 (semi-professional)

Site Code S04	Context Asyut Tomb IV – “Hogarth’s Depot” – N12.2	Accession Code S04 st. no. 47	Present Location Shutb Magazine
Material Limestone (yellow, flaky)	Location ID Shutb Magazine – SCA Room – Box 04	Maximum Dimensions H. 21 W. 40.5 L.35 Other Measurements Offering table area 37x28 left basin 6.6x13.6 depth 2.1 right basin 6.2x17.7 depth 2.8 <i>h̑tp</i> sign 8.5x18.5 depth 1.3	
Identification Offering table	Residues and Wear – Signs of Use and Context Dense limestone, subject to flaking, very dry and white in colour, not yellowish red. Surface is very damaged subject to flaking. Basins are worn with signs of pitting. <i>h̑tp</i> is also heavily worn, surface slightly more intact as well as shape. There is evidence of black pigment on the surface, esp. on <i>h̑tp</i> sign, large flakes missing around outline of table. Some soil staining present around entire table, uneven and coarse sides and base. Classification: Type A Fixture: fixed Wear: 3 (medium); Use: 3 (uncertain) There may be signs of pigment No inscriptions		
Tool Marks Chisel – irregular sides and base			
Date Range First Intermediate Period			
Excavation Date 2004			
Sketches			
Photographs			
Description Rectangular limestone offering table with two rectangular offering basins and a central <i>h̑tp</i> sign in raised relief containing evidence of black pigment. Orientation of offerings: towards basins Catalogue			
Deliberate Breakage			
Interpretative Comments Directly cut from bedrock, dense limestone and subject to flaking due to depositional wear. Also, <i>h̑tp</i> sign may have beenpainted black. Execution 2 (semi-professional)			
References and Bibliographic Information			
Scientific Analysis	Date 28.08.2018		

ACatalogue #65			
Site Code S04	Context Asyut "Hogarth's Depot" Tomb IV – N12.2	Accession Code S04 st. no. 49	Present Location Shutb Magazine
Material Limestone (yellow, flaky)	Location ID Shutb Magazine - SCA Room - Box?	Maximum Dimensions H. 13.4 W. 42.5 L.33.5 Other Measurements Table area 33x27 sunken area 27x25 depth 0.2 left basin 4.6x7.5 depth 1.2 right basin 5x8.2 depth 1.7 <i>htp</i> 13x20 depth 1.1 rim width 2.5	
Identification Offering table	Residues and Wear – Signs of Use and Context Heavily worn, soil staining present as well as flaking. Surface is reddish-brown but no major signs of pigment. Tip of <i>htp</i> very worn. Sides and base are only slightly uneven – base more uneven than sides and lighter in colour. Classification: Type A Fixture: fixed Wear: 4 (significant); Use: 3 (uncertain) There may be signs of pigment No inscriptions		
Tool Marks Chisel – irregular sides and base

Description Large limestone offering table with a rectangular sunken area containing a <i>hṭp</i> in raised relief. The other half contains the remnants of two square basins and a canal extending form the left basin to the sunken area containing the <i>hṭp</i> . The surface of the table is significantly eroded and worn. Orientations of offerings: towards basins Catalogue Offering table with two basins, heavily eroded			
Deliberate Breakage			
Interpretative Comments Depositional wear due to humidity. Quality of limestone similar to others in the sample – very porous with gaping holes. Darker rim, half exposed and shaped, extracted by excavators from bedrock. Execution: 1 (professional)			
References and Bibliographic Information			
Scientific Analysis	Date 28.08.2018		

ACatalogue #79			
Site Code	Context Asyut Gebel - Forecourt outside Tomb N12.1 (Magazine Tomb 3)	Accession Code No code, in situ.	Present Location Asyut Gebel - Forecourt outside Tomb N12.1 (Magazine Tomb 3)
Material Limestone Plaster/mortar	Location ID Asyut Gebel – in situ	Maximum Dimensions H. W. 398 L.101.5 Other Measurements SEE SKETCH ATTACHED	
Identification Offering table/basin	Residues and Wear – Signs of Use and Context Reddish yellow limestone, porous though denser than usual. Chisel marks present across surface, dense and irregular in some places. Evidence of wear due to use present in large deep circular basin at the top end – also on rim on almost all smaller basins – darker reddish hue also present inside the canals. Central canal has a slight reddish colour and some parts have flaked off. Undetermined classification Fixture: fixed Wear: 3 (some); Use: 2 (infrequent) No surface treatment No inscriptions		
Tool Marks Chisel, surface wear			
Date Range New Kingdom – alterations in Greco-Roman Period			
Excavation Date Photographed in situ			
Sketches Sketch made in situ – see for measurements.			
Photographs 			
Description Large rectangular offering table with 8 circular basins (4 with covered spouts, 4 with open canal spouts) leading into a central large canal flowing from a larger 9 th circular basin at one end and leading to a large rectangular opening (cistern-like) on the other. The table has 2 sunken rectangular structures on either side as well as one on the “southern” side of the table. Catalogue			
Deliberate Breakage			
Interpretative Comments Later period table – limestone is denser – see geological report for how limestone deposits can be dated on site. Was later made into a cistern, perhaps during the Roman period as seen from the present of reddish plaster applications near the large rectangular opening. Used to have 5 circular basins on either side of the canal, evidenced from a basin which has been cut in half by the large rectangular opening and filled with reddish granular applications. Inside the rectangular “cistern” the walls are lined with plaster. Execution: 1 (professional)

<p>Description</p> <p>In situ limestone offering table cut in sunken relief directly into the bedrock at the centre of the tomb in the middle and in front of a deep vertical shaft. The sunken area contains two basins at the top closest to the shaft, what maybe two canals stemming from them and leading into the shaft. A large central <i>htp</i> sign in raised relief with its tip pointing towards shaft and directly in front of the entrance to the tomb. Orientation of offerings: towards basins</p> <p>Catalogue</p>			
Deliberate Breakage			
<p>Interpretative Comments</p> <p>The table is ceremonial, placed directly in front of the tomb entrance as well as in front of the shaft. The two canals from basins to shaft may have been “natural” caused by the use of the table but it is hard to tell. Execution: 2 (semi-professional)</p>

ACatalogue #82			
Site Code	Context Asyut Gebel - Shaft N13.11? Shafts in front of N13.1	Accession Code In Situ	Present Location Asyut Gebel - Shaft N13.11? Shafts in front of N13.1
Material Limestone (geological Level 7)	Location ID In Situ – shaft #13.11?	Maximum Dimensions H. >4 (in bedrock) W. 58 L.42 Other Measurements Left basin (southern?) 9.9x18 depth 8 right basin (northern?) 9.3x16.5 depth 6 remnants of Htp sign 11?x>15.5 depth 4.1?	
Identification Offering table	Residues and Wear – Signs of Use and Context Heavily worn limestone (porous, rigorous flaking) – shaft is missing – possibly due to quarrying and fallen cliff face has fallen resulting in half the <i>htp</i> sign missing, although tip and body may still be present. Both basins are intact, the table is leaning towards the south? (towards agricultural fields). Water damage may be present in both basins as well as <i>htp</i> sign. Classification: Type B Fixture: fixed Wear: 5 (significant); Use: 3(undetermined) No surface treatment No inscriptions		
Tool Marks Faint chisel marks			
Date Range First Intermediate Period			
Excavation Date			
Sketches			
Photographs			
Description IN SITU limestone offering table with remnants of a central <i>htp</i> sign in raised relief and two rectangular basins on either side following the general <i>htp</i> shape. The table was positioned directly next to a no longer present shaft opening. Orientation of offerings: towards basins Catalogue			
Deliberate Breakage			
Interpretative Comments Leaning towards edge of cliff rather than shaft – may just be geological feature and therefore unavoidable. Execution: 2 (semi-professional)

ACatalogue #83			
Site Code S12	Context Asyut Gebel - Tomb H11.1	Accession Code St 12 No 0006	Present Location Asyut Gebel - Tomb H11.1
Material Limestone (pink, porous)	Location ID Still inside H11.1 – not original context	Maximum Dimensions H. 36.8 W. 66 L.76 Other Measurements Left basin 24x18 depth 1.9 right basin 17.4x24 depth 1.0sunken area40x26 depth 1.3 <i>hs</i> vase 8.8x26 depth 1.6 water stream width 1.3 depth 0.9 <i>htp</i> (inc.) 7.5x9.3 depth 0.8 canal width 1.6 depth 0.9 external spout structure 12x10.6	
Identification Offering table	Residues and Wear – Signs of Use and Context Heavily worn limestone, reddish yellow in colour, especially on the surface, hard to see whether it is pigment or natural feature of limestone. Edges have been smoothened to a certain extent, slanting outwards. Most wear is concentrated over inside basins and on the surface. The <i>hs</i> vases are smooth and only little wear due to flaking, original surface limestone is intact. The rest of the sides and the base are very uneven and have been hacked. Classification: Type G Fixture: fixed Wear: 5 (significant); Use: 3(undetermined) No surface treatment No inscriptions		
Tool Marks Chisel – irregular on base and sides			
Date Range Middle Kingdom			
Excavation Date 2012			
Sketches			
Photographs			
Description Large limestone offering table with the depiction of two large rectangular basins towards the spout end and a sunken area at the top containing two <i>hs</i> vases with spouts pouring a stream of water each forming a canal leading to the external spout structure. Between the <i>hs</i> vases at the top is the remains of a <i>htp</i> sign in raised relief. Orientation of offerings: towards spout Catalogue			
Deliberate Breakage			
Interpretative Comments Hacked out of ground, positioned at in the bedrock Execution: 1 (professional)

Identification Offering table in 2 frag.	Residues and Wear – Signs of Use and Context Intact surface, smoothed edges, finish. Minor chippings along edges, as well as minor flaking. Breaks appear to be recent since lighter in colour and with sharp margins. Residue and staining present across surface (thick). No important signs of erosion. Thin scratching present – chisel, on <i>htp</i> sign. Large pieces are missing including top and right side. only bottom half of <i>hs</i> vase and half of <i>htp</i> present. Undetermined classification Fixture: handheld Wear: 5 (significant); Use: 3(undetermined) There may be signs of pigment No inscriptions.		
Tool Marks Chisel – regular, smoothed			
Date Range Undetermined (Middle Kingdom?)			
Excavation Date 2005			
Sketches			
Photographs			
Description Rectangular (?) limestone offering table in two fragments. Probably the bottom left side of a fairly long offering table. Contains the depiction of a central <i>htp</i> and <i>hs</i> vase on left side in raised relief within a sunken area. The bottom side has three distinct lines extending across entire table depicting the <i>htp</i> 's reed mat. May show signs of red pigment			
Catalogue			
Deliberate Breakage			
Interpretative Comments Smoothed edges and very bright limestone may indicate a different time period to FIP – maybe late Middle Kingdom. Also design of central <i>htp</i> and <i>hs</i> vase indicate this period. The staining may show evidence of red pigment. Execution: 1 (professional)			
References and Bibliographic Information			
Scientific Analysis	Date 26.08.2018		

ACatalogue #85			
Site Code S05	Context Asyut S05 Tomb N.12.2- Shaft 1	Accession Code No. 78 scr. 19	Present Location Shutb Magazine
Material Limestone (yellow, dense)	Location ID Shutb Magazine - External Storage - Offering Table Box	Maximum Dimensions H. 7.6 W. >14.7 (inc) L.>12.4 (inc.) Other Measurements Inscription depth 0.2 basin >7.7x4.6 depth 1.1 sunken area depth 0.3 relief depth 0.2 leg 3.4 tall width 4.2. height of table without foot 5.4 inscription depth along sides <0.1 although may be chisel marks	
Identification Offering table (frag.)	Residues and Wear – Signs of Use and Context Fragment of lower corner of an offering table. Limestone is friable and porous flaking is present along rim and in brokenoff parts. Break recent, bight inside and sharpish margins. Evidence of red and dark pigment present in top corner on margin basin worn inside due to water damage, exposure. Evidence of residue and flaking. Sunken area in better condition.		
Tool Marks Chisel – regular, smoothed	Undetermined classification		
Date Range Undetermined (Middle Kingdom?)	Fixture: handheld		
Excavation Date 2005	Wear: 5 (significant); Use: 3(undetermined)		
Sketches	Significant signs of red and black pigment Inscriptions present		
Photographs			
Description Upper corner fragment of a limestone offering table with a leg. Edges have been smoothed. Designed to stand on its own via 4 legs. There are deep chisel marks present along the external rim. The fragment contains hieroglyphic text along the rim which also show evidence of being painted (red) and dark blue or black for margins. The fragment also contains parts of a sloping-edged basin and a sunken area containing depictions of offerings in raised relief.			
Catalogue			
Deliberate Breakage			
Interpretative Comments Stood on its own – legs indicate typical middle kingdom design. Nice finish and paint indicate higher status, also hieroglyphs well executed – tomb owner may be “YM”. Execution: 1 (professional)

Scientific Analysis	Date 26.08.2018		

ACatalogue #86			
Site Code S09	Context Asyut - Tomb H.11.1	Accession Code St.no.0778	Present Location Shutb Magazine
Material Limestone (yellow, flaky)	Location ID Shutb Magazine - External Storage Room - S09 Section Sog. Tomb H.11.1 S09 Magazine: St. no.0778	Maximum Dimensions H. 13.85 W39.5 L. 32.0 Other Measurements Face 31.6x29.2 <i>hup</i> 9.4x10.5 depth 0.9 left square basin 7.4x6 depth 0.7 right basin 6.5x6.4 depth 1.0 rim width with hieroglyphs 2.6 hieroglyph depth 0.1	
Identification Offering table	Residues and Wear – Signs of Use and Context Friable limestone, reddish yellow in colour. Worn due to manmade markings as well as erosion caused by humidity etc. visible via porous surface with elements of pitting and residual ware. Pitting still contains soil particles. Surface covered in chisel marks. Only two corners of surface remain smooth. Flaking present along external sides. Most hieroglyphic inscription missing, only present along right side. impossible to see wear due to use. Crystallization present along external sides (yellowish particles). Sides of table very rough, probably due to modern excavation techniques. Classification: Type A Fixture: fixed Wear: 3 (medium); Use: 3(undetermined) No surface treatment No inscriptions		
Tool Marks Chisel marks – irregular sides and base			
Date Range First Intermediate Period			
Excavation Date 2009			
Sketches			
Photographs			
<p>Description</p> <p>Limestone offering table with a <i>hup</i> design in raised relief at top hand side and two rectangular basins on the opposite side. The table is highly worn; however, the rim may still be visible including the presence of some hieroglyphic signs insunken relief along one side. External sides of the table are highly irregular, and the surface of the table is covered in chisel marks. Orientation of offerings: towards basins</p> <p>Catalogue “Limestone offering table decorated with hetep-“</p>			
Deliberate Breakage			
<p>Interpretative Comments</p> <p>Extracted from the ground, originally created in the tomb floor and extracted – signs of chisel marks may indicate it was subject to quarrying, especially since is highly worn. Execution: 2 (semi-professional)</p>

Scientific Analysis		Date 26.08.2018	

ACatalogue #87			
Site Code S10	Context Asyut – unknown context	Accession Code St 805	Present Location Shutb Magazine
Material Limestone (white, dense)	Location ID Shutb Magazine - External Storage Room - Offering Table Box	Maximum Dimensions H. 5.2 W. ? >19.7 L. >23.5 Other Measurements Upper left basin 4.4x7.2(approx.) depth 0.8 <i>htp</i> 6.7x6 depth 0.4 depth sunken area surrounding <i>htp</i> 0.3 central basin 6.5x3.9 depth 1.0 (from sunken area around <i>htp</i> 0.6) central vertical canal 0.6 wide depth 0.8 horizontal canal 1.2 depth 0.7 approx measurements of lower horizontal basins 6.6x3.4 depth 0.95. rim width 2.0	
Identification Offering table (4 frag.)	Residues and Wear – Signs of Use and Context		
Tool Marks Chisel marks	Fragmented offering table, broken into four pieces, the rest missing (entire right side, bottom left corner and end part of spout). surface worn with presence of marking and corrosion, erosion may be due to humidity. Erosion present inside basins and canals, surface of <i>htp</i> and external rim fairly intact. Table fragmented but in fair condition. Evidence of red pigment may be present across the surface (highly notable inside canals and basins – sunken areas). Breaks appear to be recent since very light inside and has sharp margins, all sides have been smoothed, bottom has chisel marks but has also been smoothed. Classification: Type L Fixture: handheld Wear: 5 (fragmented); Use: 2 (infrequent) No surface treatment No inscriptions		
Date Range Middle Kingdom			
Excavation Date 2010			
Sketches			
Photographs			
<p>Description</p> <p>Limestone offering table in four pieces, rest is missing. Original design contained approx. 5 basins with sloping edges and a central canal leading to an external spout structure, now partially missing. There is a <i>htp</i> sign in raised relief at the top inside a sunken t-shaped area reading to central basin and canal. The central basin is sided by vertical basins (only one present). it contains a central canal leading to a partially missing external spout structure and is divided by a horizontal canal leading two horizontal basins, one on either side. The table has smooth edges and may show evidence of red paint.</p> <p>Orientation of offerings: towards spout</p> <p>Catalogue</p>			
Deliberate Breakage			
<p>Interpretative Comments</p> <p>Table is handheld, transportable since it has smoothed edges and is fairly small. Shows evidence of red paint so it may have been painted red. Dubious hieroglyphs may be present on <i>htp</i> sign?</p> <p>Execution: 1 (professional)</p>
