APPENDIX A

Gazetteer of North Levantine Iron Age Sites

This gazetteer draws together a base level of information from North Levantine sites that have published a reasonable amount of Iron Age pottery or have contributed significantly to our understanding of this period. While sites like Zincirli, Aleppo and Arslan Tash have published little or no pottery, they have made a significant contribution to knowledge of the architecture and urban planning of the Iron Age, and for that reason are included. The site data is presented in a systematic fashion: the location and setting; historical connection; list of excavation; short list of published Iron Age ceramics.

A.1 Abou Danne, Tell (Syria)

Located on the Raqqa – Aleppo road (the road runs along the southern base of the tell), Tell Abou Danne lies 25 km due east of Aleppo and 50 km west of the Euphrates River. The site is situated in the remarkably fertile basin of the *nahr Toman*, which flows into the large Djabboul (Jabbul) Lake 10 km to the south-east. The regular mound has a diameter of 300 m (c. 7 ha.) and height of 25 m (Lebeau 1983, 11).

A.1.1 Ancient Iron Age Name:

The ancient name of the site is currently not known.

A.1.2 Seasons of Excavation

R. Tefnin: 1974-1978, 1981

A.1.3 Published Iron Age Ceramics

Lebeau 1983; Tefnin 1980a

A.2 Abu Hawam, Tell (Israel)

Tell Abu Hawam is composed of a small (c. 4 ha.), low (7 m above the plain) mound surrounded by an extensive settlement (c. 10 ha.), two inhumation necropolises

situated less than one kilometre from the tell, and three anchorage facilities (Balensi 1993, 7). It is today situated on the coastal plain near Mount Carmel and within the city limits of Haifa at a distance of around 2 km from the Mediterranean coast, but the site originally stood on the coast at the point where the Kishon River emptied into the bay of Haifa - the river mouth has long since silted up and moved. Its location is midway between Cyprus and the Nile Delta.

A.2.1 Ancient Iron Age Name:

The ancient name of the settlement at Tell Abu Hawam remains unknown, though Dever (1997c) suggests it may be identified with the biblical city of Shihor-Libnah mentioned in Joshua 19:26.

A.2.2 Seasons of Excavation

P. L. O. Guy and G. M. Fitzgerald: 1922
L. A. Mayer and N. Makhouly: 1929
N. Makhouly, D. Baramki and A. Vilensky: 1930
R. W. Hamilton (Department of Antiquities in Palestine): 1932-1933
E. Anati, Y. Olami and M. Prausnitz (Israel Antiquities Authority): 1952, 1963
J. Balensi (Centre National de la Recherche Scientifique): 1984-1989

A.2.3 Published Iron Age Ceramics

Hamilton 1934; 1935

A.3 Afis, Tell (Syria)

Tell Afis is located to the immediate west of the modern Hama-Aleppo highway c. 3 km north of Saraqab, in the district (*Mohafazeh*) of Idlib. The region is fertile, favourable to both rainfall and irrigation agriculture, and is still renowned for olive oil production. The site itself consists of a circular lower mound (c. 28 ha), crowned with a steep acropolis toward its northern edge (Mazzoni and Cecchini eds 1998, 5).

A.3.1 Ancient Iron Age Name:

Apsuna (Ugaritic, Late Bronze Age)
Hazrak/Hazrek (Aramaic)
Hatarikka (Neo-Assyrian)
Hadrach (Hebrew, Old Testament)
Apish? (Aramaic)

In 1903, H. Pognon, the French Consul in Aleppo, passed through Saraqeb and discovered fragments of a stele bearing an Aramaic inscription. His account of the discovery does not explicitly mention Tell Afis, but the site has come to be identified with the city mentioned in the inscription, ancient Hazrek (Oggiano 1997, 186). The stele is dedicated by Zakkur, king of Hamath and Lu'ash, to god Iluwer for protecting Hazrek against a siege undertaken by a coalition led by the king of Damascus (Mazzoni 1998b, 7-9). Dornemann (2003, 4), however, has suggested an alternate identification with the ancient city of Apish, which also appears in the Zakkur stele.

A.3.2 Seasons of Excavation

P. Matthiae (La Sapienza University, Rome): 1970, 1972, 1978, 1985

S. Mazzoni (University of Pisa) and S. M. Cecchini (University of Bologna): 1986-1989, 1991-1992, 1994, 1996-2006

A.3.3 Published Iron Age Ceramics

Bonatz 1998; Canuti 2000; Cecchini 1988; 1993; 1998; 2000a; 2002; 2005; Chiti 2005; Ciafardoni 1988; D'Amore 1998; 2005; Degli Esposti 1998; Magazzù 2002; Matermawi 2005; Mazzoni 1988; 1990a; 1998a; 2000b; Oggiano 1997; 1999; 2002; Pedrazzi 2002; Scigliuzzo 2002; 2005; Soldi 2005; Venturi 1998a; 2000a; 2000b; 2002; 2005; del Vesco *et al.* 2005; Virgilio 2005

A.4 Ahmar, Tell (Syria)

Located on the east bank of the River Euphrates, Tell Ahmar (literally the 'Red Mound') lies 20 km downstream from Jerablus (Carchemish) and the Turkish border. Now partially submerged by the waters of the Tishrin Dam, Tell Ahmar was once situated at the edge of a terrace overlooking the long alluvial plain of the Euphrates River (Bunnens 1990a, 2). The site stands 1.5 km from the point of confluence of the Euphrates and Sajur Rivers, and overlooks what was once a natural crossing point for the Euphrates. Like the nearby site of Carchemish, the site of Tell Ahmar boasts a tripartite plan: the Acropolis, Middle City and Lower City. The small Acropolis (c. 2 ha.) once stood 25 m over the surrounding plain; the French expedition removed the top seven metres of deposit from the tell and extended its southern edge with a large spoil-dump. The Middle city extends 350 m to the west and lies under much of the

modern village and cemetery. The Lower City is extensive; its semi-circular shape has a diameter of around 1200 m, suggesting an area of *c.* 59 hectares (Roobaert and Bunnens 1999, 163; Anastasio *et al.* 2004, 43).

A.4.1 Ancient Iron Age Name

Til Barsip (Aramaic)
Kar-Shalmeneser (Neo-Assyrian)
KTK (Aramaic)
Masuwari (Luwian)

The history of Tell Ahmar in the Iron Age has attracted much attention. The site is widely recognised as the capital of the small 'Syro-Hittite' kingdom of Masuwari (Hawkins 1983), before being transformed into the headquarters of the 'Aramaean' state of Bit-Adini, and then becoming the Assyrian Kar-Shalmeneser of the eighth and seventh centuries BCE (Schwartz 1989, 278). Ussishkin (1971), however, has reversed the sequence- he prefers to see the early Iron Age site as Aramaean before becoming Syro-Hittite about a century before Assyrian conquest. While the matter remains unresolved, Hawkins (1980; 1983) has suggested an alternative interpretation: that Tell Ahmar was a small kingdom of Hittite (Luwian) descent that was under regional authority of an Aramaean tribal leader. This, according to Hawkins, explains the Syro-Hittite character of the local art and the mention of Tell Ahmar as part of the Aramaean coalition against the Neo-Assyrians.

A.4.2 Seasons of Excavation

F. Thureau-Dangin (Musée du Louvre): 1928-1931.
G. Bunnens (Melbourne University until 1999, then Liege University): 1988-2006

A.4.3 Published Iron Age Ceramics

Wightman 1990b; Jamieson 1999; 2000; Green and Hausleiter 2000

A.5 Ain Dara (Syria)

The site of Ain Dara lies in the Afrin valley, northern Syria, on the left bank of the Afrin River, upstream from the Amuq plain and 67 km north-west of Aleppo. The name of the site derives from the spring which lies 700 m to the east of the mound. The site consists of a steep upper mound (acropolis), which rises 30 m above the plain, and an extensive lower mound (24 ha.), which surrounds the acropolis on the northern and eastern sides (Abou Assaf 1997 and Stone and Zimansky 1999, 2). The

many visitors to the site, due to its proximity to both St Simeon and Cyrrhus, approach the acropolis via a modern road which winds up through the lower city's northern gate, one of four in the Iron Age settlement (Abou Assaf 1990, Fig. 2). The lower tell was settled primarily during the Late Bronze and Iron Age (Stone and Zimansky 1999, 3-7). The acropolis, however, appears to be much older, with evidence of occupation as early as the fourth millennium BCE (Abou Assaf 1997).

A.5.1 Ancient Iron Age Name

Matthiae (1981, 33) has suggested Ain Dara be identified with ancient Kinalua, the capital of the kingdom of Hattina, though Harrison *et al.* (2004, 122) prefers to associate Kinalua with Tell Tayinat. Regardless, Ain Dara and Tel Tayinat were probably part of this same kingdom.

A.5.2 Seasons of Excavation

M. Dunand (French) and F. Seirafi (DGAM): 1956, 1962, 1964
A. Abou Assaf (DGAM): 16 seasons between 1976 and 1992
E. C. Stone and P. E. Zimansky (American): 1982-1984

A.5.3 Published Iron Age Ceramics

Stone and Zimansky 1999

Very little has been published regarding the Iron Age ceramics of the site. Even the final report of the American excavation of the lower town presents a somewhat limited corpus of ceramic profiles despite over 129,000 sherds having been catalogued during the course of two seasons (Stone and Zimansky 1999, 59). The ceramics from the Syrian expedition to the acropolis are currently in preparation for publication.

A.6 Akhziv (Israel)

Akhziv is located on the northern coast of Israel, about 15 km north of 'Akko and 25 km south of Tyre (Dayagi-Mendels 2002, 1). The site itself is unremarkable, except for the associated 'Phoenician' cemeteries. The southern cemetery (*Minet ez-Zib* – literally the port of Akhziv because of its vicinity to the silted-up harbour of the Sha'al River) is situated on the Mediterranean shore less than a kilometre south of the double tell and extends over a great area, about 5000 square metres according to Ben Dor (Dayagi-Mendels 2002, 1). The tombs are on a sandstone (*kurkar*) ridge

below the sand dunes, with nothing notable on the surface to indicate their presence. Other cemeteries are located to the east of the tell (*er-Ras*), on a hard limestone spur, and to the north (a large ashlar-built chamber tomb and cremation field).

A.6.1 Ancient Iron Age Name

Achzib (Hebrew, Old Testament)
Ez-Zib (Aramaic)
Akzibi (Neo-Assyrian)
Accipu (Neo-Assyrian)

The city is mentioned twice in biblical sources as an undefeated Canaanite city. It also appears in Assyrian records as a fortified city conquered by Sennacherib in 701 BCE, as part of the same campaign that saw Sidon, Sarepta and 'Akko subjugated (E. Mazar 1993, 32). The identification of the site with ancient Akhzib is due to the etymologically similar modern name.

A.6.2 Seasons of Excavation

I. Ben Dor (British Mandatory Department of Antiquities in Palestine): 1941-1944
Z. Goldmann (Israeli): 1954
M. Prausnitz (Israel Department of Antiquities): nine seasons between 1957-1984
E. Mazar (Hebrew University, Jerusalem): 1988-1990, 1994, 2002

A.6.3 Published Iron Age Ceramics

Culican 1970; 1982; E. Mazar 1993; 2001; 2004; Dayagi-Mendels 2002

A.7 Aleppo (Syria)

The second largest city within modern Syria, Aleppo is located in the northern part of the country on the banks of the River Quweiq, equidistance from the Mediterranean Sea and Euphrates River. Due to the extensive size of the modern city, archaeological investigation has been somewhat limited, though excavations have recently returned to the ancient tell situated within the Aleppo citadel. Determining the size and extent of ancient Aleppo remains difficult, though the listing of Aleppo as a UNESCO World Heritage site will protect the region for possible future investigation.

A.7.1 Ancient Iron Age Name

HRB (Akkadian, Late Bronze Age)
Halpa (Hittite, Bronze Age)

Hallaba (Neo Assyrian)
Halman (Neo Assyrian)
Halwan (Neo Assyrian)

Aleppo is known as the administrative and cultic centre of Halab, the capital of the independent 'Syro-Hittite' kingdom of Yamhad (Pitard 1997). Following repeated conquests by the Assyrians (853 and 743 BCE) and Urartians, Aleppo was reduced to political insignificance during much of the Iron Age, but remained a major centre for the worship of Hadad, the storm god (Miller 1958, 2).

A.7.2 Seasons of Excavation

G. Ploix de Rotrou (Musée d'Alep; Service des Antiquités): 1929-1936
R. Saba: 1981, 1983
W. Khayyata (DGAM) and K. Kohlmeyer (Frei Universitat, Berlin): 1995-1997, 1999-2005

A.7.3 Published Iron Age Ceramics

None

A.8 Amuq Plain (Turkey)

The Amuq Valley (alternatively known as the Hatay or Plain of Antioch), which was annexed to the Turkish Republic in 1939, constitutes the southernmost province of Turkey. The large (1,400 sq. km) fertile plain is extremely well-watered, with three large rivers flowing into the basin before conjoining and flowing west to the Mediterranean (Pamir 2005, Fig. 3.1). The Orontes River enters the Amuq from the south and bends westward. The *Kara Su* (literally black water) and Afrin River enter the Amuq from the north and east respectively, before joining the Orontes' flow toward the sea. The fertile plain is framed by mountains on all sides, except where the three rivers enter and exit the plain; the Taurus Mountains to the north rise up toward the Anatolian plateau. Of the sites surveyed by the Oriental Institute in the 1930s, three yielded significant Iron Age assemblages: Chatal Höyük, Tell Judeideh and Tell Ta'yinat. The first two sites are located near the town of Rihaniyyah, while the third lies immediately east of the modern village of *Jisr el-Hadid.* Excavation was also undertaken at Tell Atchana (ancient Alalakh) and Tell Kurdu, though neither yielded significant (if any) Iron Age material.

A.8.1 Ancient Iron Age Name

Amuq Region

Paddan-Aram (Hebrew, Old Testament)
Patina (Luwian)
Unqi (Akkadian)
'MQ (Aramaic)
Umqa (Syriac)

Tell Ta'yinat

Kullani (Neo-Assyrian)
Kunalua (Luwian)

The territory of the Amuq was occupied by the 'Syro-Hittite' kingdom of Patina (Harrison 2001a, 116-117), though it appears to also have been known by the name Unqi (Braidwood 1937, 1; McEwan 1937, 8). Fragments of a small Iron Age bowl were found at Tell Ta'yinat inscribed with the word KNLH, linguistically very similar to Kunulua, capital city of the kingdom of Patina/Unqi (Harrison *et al.* 2004, 122; Swift 1958, 191-192). This identification appears supported by the military annals of Ashurnasirpal II (c. 870 BCE), who locates the city at the southern edge of the Amuq (Hawkins 1982, 389). The later use of the term 'MQ (the Aramaic equivalent of the Akkadian Unqi) has been interpreted as representing Aramaic ascendancy in the area.

The excavations at Tell Ta'yinat by the Oriental Institute of the University of Chicago produced an extensive corpus of Akkadian, Aramaic and Luwian inscriptions; Luwian hieroglyphic inscriptions account for the largest number (over 85 fragments).

A.8.2 Seasons of Excavation

Oriental Insitute: C. W. McEwan and R. J. Braidwood:
Chatal Höyük: 1932-1935
Tell al-Judeideh: 1934-1936
Tell Ta'yinat: 1935-1938

In recent years a University of Toronto project has returned to Tell Ta'yinat:
T. Harrison (University of Toronto, Canada): 2004-2006, 2007?

A.8.3 Published Iron Age Ceramics

Batiuk *et al.* 2005; Casana and Wilkinson 2005; Harrison *et al.* 2006

A.9 Arqa, Tell (Lebanon)

Tell Arqa is a high (40 m), multi-period tell situated in northern Lebanon. It lies twenty kilometres north of Tripoli and c. 5 km inland, near where the Homs-Tripoli gap debouches into the Mediterranean. The tell looms over the surrounding Akkar Plain, the vast fertile plain watered by the *Nahr el-Kebir*, which is today the Syrian border. Found at the very southern edge of the plain, Tell Arqa is one of three large tells in the Akkar (the other two are Tell Kazel and Tell Jamous). Despite its imposing height, the modest area of the mound (*c.* 4 ha.) belies a settlement of intermittent occupation and sporadic prosperity (Thalmann 1978, 3).

A.9.1 Ancient Iron Age Name

Irqata (Akkadian, Amarna Letters)
RQT (Akkadian, Late Bronze Age)
Arka (Hebrew, Old Testament)
'Arqa (Phoenician)
'Arqu (Aramaic)

A.9.2 Seasons of Excavation

J.P. Thalmann (Centre National De La Recherche Scientifique): 1972-1974, 1978-1981, 1992-2005

A.9.3 Published Iron Age Ceramics

Will *et al.* 1973; Thalmann 1978a; 1978b; 1983; 1990; Chaaya 2000

A.10 Arslan Tash (Syria)

Arslan Tash is located in northern Syria approximately 30 km northeast of Tell Ahmar and the Euphrates River and 6 km south of the modern Turkish border. The large oval mound, c. 30.5 ha. (728 m x 560 m), lies in the middle of the fertile Plain of Saruj (Anastasio *et al.* 2004, 58). The name of the site, which literally means 'lion stone' in Turkish, derives from the large basalt lion statues that were originally found lying on the site's surface.

A.10.1 Ancient Iron Age Name

Hadatu (Neo-Assyrian)
Dur-Tukulti-apil-Esarra (Neo-Assyrian)

A.10.2 Seasons of Excavation

G. Paşa (Ottoman Turkish): 1886

F. Thureau-Dangin (Musée du Louvre): 1927-1929
L. Delaporte: 1938

A.10.3 Published Iron Age Ceramics

None identified

A.11 'Athlit (Israel)

'Athlit is located on the northern coast of Palestine, approximately 12 km south of the modern city of Haifa. It is situated on a kurkar ridge adjacent to a natural bay. Evidence for Iron Age occupation initially consisted of the remains of fourteen chamber tombs exposed beneath the medieval castle (Johns 1931, 111) on a natural promontory (Johns 1931, Pl. 40; 1932, Fig. 1). The remains of an Iron Age settlement were found to the east and south-east of the promontory within a low lying (7 m above sea level), medium-sized (c. 8 ha) tell that boasts evidence of occupation from the Late Bronze Age to the Roman Period (Johns 1934, 145-146).

A.11.1 Ancient Iron Age Name

Although 'Athlit is not mentioned explicitly in ancient sources, the site has been identified with Kartah of Zebulun mentioned in Joshua 21:34 (Johns 1993, 112).

A.11.2 Seasons of Excavation

C. N. Johns (Department of Antiquities in Palestine): 1930-1933, 1935
A. Raban and A. Haggi (University of Haifa): 2002-2003

A.11.3 Published Iron Age Ceramics

Johns 1932; 1934; 1938; Haggi 2006

A.12 Beirut (Lebanon)

While Lebanon's capital, Beirut is today a thriving metropolis that covers a large area, the ancient settlement of Beirut was initially located on the northern side of the natural promontory that today forms the Beirut Town Centre. Occupation was originally restricted to a small tell (2.5 ha.) that lies to the south of the modern harbour of Beirut (Badre 1998, 73). Ancient Biruta (of the Amarna texts) took the form of a small arc facing the sea, before expanding during the Classical period to cover much of the promontory.

A.12.1 Ancient Iron Age Name

Beruta/Biruti (Amarna letters, 14th century BCE)
Kur bi-ru-ù-ti / Kur bi-ru-ut-ti (Ugaritic texts, 14th-13th centuries BCE)
Bi'ru (Neo-Assyrian, Esarhaddon Prism inscription)
Beerot (Phoenician)
Berytos (Greek)

The oldest confirmed references to Beirut are found in the Amarna Letters of the fourteenth century BCE (Curvers and Stuart 1996, 228). During the Iron Age, however, there is only one possible mention of the site, a reference that lists Bi'ru amongst the cities within the kingdom of Sidon (Badre 1997b, 12). The conspicuous scarcity of Iron Age references has brought into question the importance of this city during the first millennium BCE, though recent excavations have begun to reverse that image.

A.12.2 Seasons of Excavation

R. du Mesnil du Buisson and T. Homolle (French): 1924
L. Brossé, L. Albanèse, F. Anus and M. Chéhab (Service des Antiquités): 1924-1932
R. du Mesnil du Buisson (French): 1927-1928
H. Fleisch: 1947
H. Kalayan: 1968-1969
C. Forest and J.D. Forest: 1977
BCD Archaeology Project (UNESCO, DGA and Solidere): 1993-2003

A.12.3 Published Iron Age Ceramics

Badre 1997b; 1998; 2000b; Doumet-Serhal and Sayegh 1998; Jabak *et al.* 1998; Sapin and Sayegh 1998; Shefton *et al.* 1998; Elayi and Sayegh 2000

Despite a good Iron Age ceramic sequence being obtained from the excavations under the BCD 'umbrella', no comprehensive typology or catalogue has been published (e.g. Núñez 2001-2002; Curvers and Stuart 1997, 182-183).

A.13 Beth Shan, Tel (Israel)

Tel Beth Shan (*Tell el-Husn* in Arabic) is located on the western edge of the Jordan Valley, approximately 20 km south of the Sea of Galilee (*Yam Kinneret*). The site guards the ford of the Jordan 5 km to the east and lies near the junction of the Jezreel and Jordan Valleys, which were both important roads in the ancient world. The steep but small (c. 4 ha) conical tell is situated on a high hill, though still 300 m below sea

level. Excavations have revealed an almost continuous occupation of the site from the Neolithic to the Early Medieval period. The classical settlement (Scythopolis) outgrew the tell and a large urban centre developed around the foot of the mound.

Tel Rehov (*Tell es-Sarem* in Arabic) is one of the largest mounds (c. 10 ha) in Palestine. The upper tell rises 20 m above the surrounding alluvium of the Beth Shan Valley and is visible from the site of Pella, 10 km to the east (A. Mazar 1999a, Fig. 1). The lower mound is elongated and rises 8 m above the plain and is heavily eroded on its eastern edge. Tel Rehov is situated at the western edge of the Jordan Valley, 6km from the Jordan River and 5 km south of Beth Shan.

A.13.1 Ancient Iron Age Name

Beth Shan (Hebrew, Old Testament)
Bit Sani (Amarna Letters)
Beit She'al (Egyptian)

Beth Shan is mentioned in the biblical text as an unconquered Canaanite city (Joshua 17:11), and where the Philistines impaled the body of Saul and his sons on the city-wall (1 Samuel 31:10).

Rehob (Hebrew)
Rehob (Egyptian, Shoshenq's Year 5 inscription at Karnak)

Rehov (literally 'street' in Hebrew) was the name of several cities mentioned in ancient texts, and is identified with *Tell es-Sarem* due to the survival of the name Rehov at the nearby Islamic holy tomb (*esh-Sheikh er-Rihab*).

A.13.2 Seasons of Excavation

C.S. Fisher (University of Pennsylvania): 1921-1923
A. Rowe (University of Pennsylvania): 1925-1928
G.M. Fitzgerald (University of Pennsylvania): 1930, 1933
Y. Yadin and S. Geva (Hebrew University, Jerusalem): 1983
A. Mazar (Hebrew University, Jerusalem): 1989-1996
Tel Rehov:
F. Vitto: 1974-1980 (five seasons)
A. Mazar (Hebrew University, Jerusalem): 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007

A.13.3 Published Iron Age Ceramics

Beth Shan: James 1966; Oren 1973; Yadin and Geva 1986; A. Mazar 1993b; 2001
Rehov: A. Mazar 1999a;

A.14 Byblos (Lebanon)

The ancient site of Byblos is located on a short headland known locally as *Djebeil* (or *Gabayl*). It lies on the Lebanese coast roughly equidistant (c. 40 km) between Beirut and Tripoli. The short promontory provided two natural harbours for the site, a feature common amongst coastal settlements of the region. Before excavation the large mound (c. 10 ha.) stood 12 m. above the surrounding coastline.

A.14.1 Ancient Iron Age Name

Gebal (Hebrew, Old Testament)
KBN (Akkadian, Late Bronze Age)
KPNJ (Akkadian, Late Bronze Age)
Gubla (Akkadian, Amarna Letters, Late Bronze Age)
Gublu (Neo-Assyrian)
Byblos (Greek, Achaemenid and Hellenistic Periods)

A.14.2 Seasons of Excavation

E. Renan (French): 1860-1861

A.15 Dan, Tel (Israel)

Tel Dan (*Tell el-Qadi* in Arabic, literally the 'mound of the judge') lies at the foot of Mount Hermon on the present-day border between Israel and Syria (Biran 1994, 21). It is situated in the heart of a rich and fertile region; the spring flowing in and around the mound is one of three sources of the Jordan River. The edge of the large (c. 20

ha) tell rises 20 m above the plain, while the central area descends 10 m in height, giving the impression of a crater.

A.15.1 Ancient Iron Age Name

Dan (Hebrew, Old Testament)
Laish/Leshem (Canaanite, Mari Documents, Egyptian Execration Texts)

The identification of Biblical Dan with *Tell el-Qadi* was first suggested in the mid-nineteenth century by Robinson, but wasn't confirmed until 1976, when excavations discovered a bilingual (Greek and Aramaic) inscription; "To the god who is in Dan" (Biran 1994, 25). The city is mentioned repeatedly in the biblical source, in particular as the northern-most point of ancient Israel. The city also appears in Egyptian Execration texts and the Mari Letters, though under the city's former name, Laish or Leshem. According to the biblical account, the name was changed to Dan when that Israelite tribe conquered Laish.

A.16 Deve Höyük (Turkey)

Deve Höyük is a small village in the Sajur Valley, about 30 km west of Jerablus and the Euphrates River. The village consists of a cluster of houses surrounding the southern slope of a small tell. Little more is known about the site, except that an ancient cemetery was located on the north eastern edge of a shallow depression surrounding the mound.

A.16.1 Ancient Iron Age Name

Not known

A.16.2 Seasons of Excavation

No systematic excavation at Deve Höyük was undertaken, only the illicit plundering of "some fifty peasants... in full view of the Baghdad railway" (Woolley 1914-1916, 115).

A.16.3 Published Iron Age Ceramics

Woolley 1914; 1914-1916; Moorey 1975; 1980; Klengel-Brandt 1990

A.17 Ghassil, Tell el- (Lebanon)

The small mound (c. 3 ha.) of Tell el-Ghassil is located in the northern reaches of the Beqa' Valley of Lebanon. The small mound lies 18 km southwest of Baalbek and to the immediate east of the Litani River (*Nahr al-Litani*). The site derives its name from the nearby spring, Ayn Ghassil, which emerges from the 1,000 m contour of the Lebanese Range.

A.17.1 Ancient Iron Age Name

The ancient name of the site is currently not known.

A.17.2 Seasons of Excavation

D. C. Baramki (AUB): 1956-1961, 1963, 1968-1969
L. Badre (AUB): 1972-1974.

A.17.3 Published Iron Age Ceramics

Baramki 1961; 1964; 1966; Joukowsky 1972 (unpublished); Marfoe 1995

A.18 Hama (Syria)

Situated in west-central Syria, the ancient mound of Hama is located on the left bank of the River Orontes at the point where a major north-south road crossed the river. The modern city of the same name, however, has significantly grown to encompass both banks of the river, and the site itself is now on its north-western outskirts. The steep tell still dominates the city skyline as it towers 46 m above the river (Ingholt 1942, 469).

A.18.1 Ancient Iron Age Name

Hamath (Hebrew, Old Testament)
Hamati (Akkadian, Late Bronze Age)
'MT/HMT (Akkadian, Late Bronze Age)
Tunip (Amarna Letters, Late Bronze Age)
Amatu (Luwian)
Hamatu (Neo-Assyrian)

Neo-Assyrian records reveal that during the middle of the 9th century BCE, Urhilina, king of Hamatu, played an important role in a coalition that was able to temporarily

arrest Assyrian advances toward the west. By the late 8th century BCE, however, many of the provinces belonging to Hamatu had to be surrendered and a large number of inhabitants were deported by the rampaging Assyrians (Buhl 1992, 34).

A.18.2 Seasons of Excavation

A.19 Hazor (Israel)

Biblical Hazor has long been associated with *Tell el-Qedah* located in Upper Galilee, 14 km north of the Sea of Galilee and 8 km southwest of Lake Hula. The site comprises two distinct areas: the 40 m high acropolis mound (c. 10 ha); and the extensive (c. 80 ha) rectangular mound of the lower city (Ben Tor 1997, 107; Yadin *et al.* 1958, Pl. I). The lower city is protected by huge ramparts, a fosse and a glacis.

A.19.1 Ancient Iron Age Name

Hazor (Hebrew, Old Testament and Armana Letters)

Hazor and Laish (Tel Dan) are the only two Canaanite cities mentioned in the Mari archives of the Middle Bronze Age. The frequency with which Hazor appears in these documents is indicative of its importance during the 2nd millennium BCE; indeed, the site covers its largest area during this period (Ben Tor 1993a, 603). Hazor appears in the biblical record foremost as the chief Canaanite city of the region, which is conquered and settled by the invading Israelite tribes (Joshua 11:10-13).

A.19.2 Seasons of Excavation

J. Garstang (British Mandatory Department of Antiquities in Palestine): 1928

A.20 Jerablus (Turkey) including Kefrik and Merj Khamis

The site of Barak, more commonly known as Jerablus (or *Jerabis* in Arabic), lies at the extreme north of the plain of Jerablus (Anastasio *et al.* 2004, 83). It is a large tell site on the right bank of the Euphrates River, situated by the modern border of the Turkish and Syrian Arab Republics, c. 100 km north east of Aleppo and 60 km south of Gaziantep. The somewhat tense, though generally cordial relations between these two nations means the site, which is actually cut by the border, is unavailable for further study. The eastern half of the tell is well protected by the deeply incised Euphrates River, while the western portion of the site is protected by long mud-brick city walls, still visible as large earth mounds at the time of the British Expedition. In ancient times the extensive city commanded the main ford across the Euphrates.

A.20.1 Ancient Iron Age Name

KRKMS (Akkadian, Late Bronze Age)
Kargamiş (Hittite, Late Bronze Age)

The city of Carchemish, known from biblical, Assyrian and Egyptian sources, was first identified with Jerablus by George Smith in 1876.

(www.pef.org.uk/EarlySyriaPages/Carchemish.htm).

A.20.2 Seasons of Excavation

A. E. Henderson (British Museum): 1876-1879
D.G. Hogarth, C.L. Woolley and T.E. Lawrence (British Museum): 1911-1914
C.L. Woolley (British Museum): 1920
The Yunus cemetery at Carchemish was excavated in 1913 by the British Museum Expedition.

A.20.3 Published Iron Age Ceramics

Woolley 1914; 1921a; 1939b; 1952; Moorey 1980

A.21 Jezreel, Tel (Israel)

The site of Tel Jezreel (or *Yizre'el*, literally 'God sows') is situated at the eastern part of the Valley of Jezreel, and lies almost equidistant between the two large mounds of Beth Shan and Megiddo. Situated on the very edge of a 100 m high ridge extending along the southern side of the valley, the view from the site is a commanding and strategic one. The relatively small (6 ha.) mound is roughly rectangular in shape,

indicative of the regular casemate wall exposed in the excavations (Ussishkin and Woodhead 1992).

A.21.1 Ancient Iron Age Name

Jezreel (Hebrew, Old Testament)

A.21.2 Seasons of Excavation

O. Yogev (Israel Department of Antiquities): 1987-1988

A.22 Joya (Lebanon)

The cemetery of Joya lies about 10 km inland (east) of Tyre in the south of Lebanon, approximately equidistant between Khirbet Silm and Tyre (Chapman 1972, 56). The nature of the site is not known.

A.22.1 Ancient Iron Age Name

Not known

A.22.2 Seasons of Excavation

Clandestine excavation only

A.22.3 Published Iron Age Ceramics

S. V. Chapman 1972

Judeideh, Tell (Turkey) - see A.8 Amuq

A.23 Jurn Kabir, Tell (Syria)

Located on the right bank of the Upper Syrian Euphrates, Tell Jurn Kabir is situated 2.5 km south of the Islamic fortress *Qal'at Najm* (Eidem 1999a, 149-153). Aleppo lies 80 km to the west. The small (c. 3 ha.), low mound of Tell Jurn Kabir is heavily eroded. The site is surrounded by the village of Jurn Kabir, founded sometime in the late nineteenth century (Eidem 1999a, 152; Anastasio *et al.* 2004, 188).

A.23.1 Ancient Iron Age Name

The ancient name of the site is currently not known.

A.23.2 Seasons of Excavation

J. Eidem (Carsten Niebuhr Institute, University of Copenhagen): 1993-1998

A.23.3 Published Iron Age Ceramics

Eidem1999b; Eidem and Ackermann 1999; Eidem and Putt 1999; 2001;

A.24 Kamid el-Loz (Lebanon)

Kamid el-Loz is a steep tell site within the southern reaches of the Beqa' Valley, where the alluvial plain rises toward the Anti-Lebanon Range (Kushcke 1966, 15; Hachmann 1989, Fig. 6). A modern town of the same name is located to the immediate south of the oval mound and a modern cemetery covers the south eastern quarter of the site. The tell of Kamid el-Loz is one of the largest (c. 7 ha) and tallest (26 m) within the Beqa' Valley, though it is relatively small when compared to the size of the large Syrian and Mesopotamian tells (Hachmann 1989, 13). The Litani River lies 3 km to the west, though there is a spring to the immediate north.

A.24.1 Ancient Iron Age Name

Kumidi (Akkadian, Amarna Letters, Late Bronze Age)
KMT (Egyptian texts)

Cuneiform texts found within the Late Bronze Age temple at Kamid el-Loz have confirmed the identification of the site with the Bronze Age city of Kumidi (Heinz 2004, 570), an identification that was originally postulated in the late nineteenth century (Hachmann 1989, 89).

A.24.2 Seasons of Excavation

A.25 Kazel, Tell (Syria)

Tell Kazel is situated 3.5 km from the Syrian coast, within the northern limits of the Akkar Plain and 18 km south of Tartous (Badre 2006, 65). The tell is oval in shape with particularly well-defined upper edges, suggesting the presence of significant fortifications on the edge of the acropolis; three depressions along the edge are probably the three city gates. The height of the large (11 ha.) tell reaches 25 m above the level of the surrounding Akkar Plain (Badre 1990a, 13). Tell Kazel is the largest site in the Akkar (Thalmann and al-Maqdissi 1989, 98) and is the only one boasting evidence of continuous occupation from the 4th to 1st millennium BCE.

A.25.1 Ancient Iron Age Name

Zemar (Hebrew, Old Testament)
DMR (Akkadian, Late Bronze Age)
Sumur (Akkadian, Amarna Letters, Late Bronze Age)
Samuri/Simirra (Neo-Assyrian)
Simyra (Greek)

The site is thought to be historical Simyra/Sumur, an identification first presented by M. Dunand (Dunand and Saliby 1957, 1-10), developed by H. Klengel (1984, 6) and today widely accepted (Gubel 2000; Sader 1990a; cf. Stieglitz 1991). However, this interpretation is based on a number of assumptions; foremost being that the historical importance of Simyra is comparable with the size of Tell Kazel. The identification of Tell Kazel with Sumur has not yet been established by any inscription found on the site (Badre 2006, 67).

A.25.2 Seasons of Excavation

A.26 Keisan, Tell (Israel)

Situated between Haifa and Akko, the high conical mound of Tell Keisan is prominent within the landscape of the Akko Plain (Briend and Humbert 1980, Pl. 2). Although the site today lies 8 km inland, it originally stood much closer to the coast, effectively linking the hills of the Lower Galilee with the Mediterranean Sea (Briend and Humbert 1980, Pl. 1). The surviving mound rises to a height of at least 25 m above the alluvial plain and covers an area of c. 6 hectares (Briend and Humbert 1980, 3; Seton-Williams 1980, 381).

A.26.1 Ancient Iron Age Name

The ancient name of the site is not known, though a number of arbitrary identifications have been suggested, all of them biblical: Kishion; Allammelech; Mishal and Akshaph (Garstang 1931, 354; Humbert 1993, 862).

A.26.2 Seasons of Excavation

J. Garstang and A. Rowe (Department of Antiquities in Palestine): 1935-1936

Briend and Humbert 1980; Seton-Williams 1980

A.27 Khalde (Lebanon)

About 12 km south of Beirut, Khalde (*Kobbet Choueifat*) is situated beside the Beirut International Airport, and is cut by the Beirut-Sidon Highway (Saidah 1966, 51). The large Iron Age necropolis (c. 500 m in length) lies atop two promontories sloping down to the Mediterranean Sea. The site's proximity to Beirut ensured its importance in ancient times, as indicated by the large number (over 400) of intact Iron Age burials found *in situ* (Badre 1997a). The extensive cemetery points to an equally large settlement nearby, though it was not found and was probably destroyed by modern construction.

A.27.1 Ancient Iron Age Name

Hi-il-du-ya (Akkadian, Neo-Assyrian)
Heldua? (Greek)

Khalde is identified with ancient Hi-il-du-ya, a city of the kingdom of Sidon annexed by Esarhaddon in the first half of the seventh century BCE.

A.27.2 Seasons of Excavation

A.30 Megiddo (Israel)

The mound of *Tell al Mutesellim* has been associated with the biblical site of Megiddo since the end of the nineteenth century (Smith 1892, 385). The medium-sized (c. 15 ha) conical tell rises 40-60 m above the surrounding plain. The position of the mound at the point where the *Nahal 'Iron* enters the Jezreel Valley gave it strategic control over the narrow 'Iron Valley, which passes through the formidable coastal mountains (Aharoni *et al.* 1993, 1003).

A.30.1 Ancient Iron Age Name

Megiddo (Hebrew, Old Testament)

A.30.2 Seasons of Excavation

G. Schumacher (German Society for Oriental Research): 1903-1905

A.31 Mina, al (Turkey)

The site of al Mina is located in the Turkish province of the Hatay on the northern bank of the Orontes River, at the point where the river empties into the Mediterranean Sea. It lies in the gulf of Suwaidia, which is protected on all sides by mountains; Mount Casius, Ras al Khanzir and the Amanus to the south, north and east, respectively. Access to the site is granted either from the sea or along the course of the Orontes River (S. Smith 1942, 88). Apart from a good defensive position, al Mina, and the Amuq Plain to the east, was located in an ideal position for linking the Mediterranean and Mesopotamian worlds. The size of the tell itself is difficult to determine because a large portion of the site has been lost to erosion or obscured by thick alluvial deposits.

A.31.1 Ancient Iron Age Name

Al Mina was originally identified with the Poseideion of classical literature, but subsequent excavation of nearby Ras al Bassit, which was the other option for Poseideion (S. Smith 1942, 96-98), has also shown strong connections with the Greek world whilst also, significantly, retaining an echo of the classical name. As a result, al Mina has been left 'nameless' (Boardman 1990, 170).

A.31.2 Seasons of Excavation

C. L. Woolley (British Museum): 1935-1936

A.32 Mishrifeh, Tell (Syria)

Situated within the *mohafàzah* (district) of Homs, Tell Mishrifeh lies approximately 18 km north east of the modern city of Homs. It is located in a large fertile plain between the desert steppe and the alluvial Orontes Valley, an area crossed by a seasonal net of *wadis*. The site consists of a large, gently sloping tell, which is enclosed by massive Bronze Age ramparts. The fortifications, which still stand to heights of 15-20 m, protect and enclose a roughly square area of c. 110 ha (al-Maqdissi *et al.* 2002a, 9).

A.32.1 Ancient Iron Age Name:

Qaṭna (Amarna Letters, Late Bronze Age)

King Akizzi of Qatna wrote a number of letters to Pharaoh Akhenaton requesting help against the aggressive Hittite king Šuppiluliuma I. In addition to the Amarna letters, Hittite sources also mention the siege and conquest of Qatna. The site then fades from the textual record (Klengel 2000b).

A.32.2 Seasons of Excavation

R. du Mesnil du Buisson (Musée du Louvre): 1924, 1927-1929

A.33 Nayrab (Syria)

Within the suburbs of modern Aleppo, c. 5 km to the south-east of the Aleppo citadel, lies the small tell of Nayrab. The low mound, which rises less than 10 m above the surrounding plain, is today completely enclosed by modern dwellings. Most of the site is lost amongst the houses, but at the time of excavation the exposed south-east corner of the tell was available for excavation (Carrière and Barrois 1927, Pl. XXXV.2).

A.33.1 Ancient Iron Age Name

nrb (Aramaic, funerary stelae)
ni-ri-ib (Neo-Babylonian, Nayrab tablets)

The identification of Nayrab comes from textual evidence recovered from the site.

A.33.2 Seasons of Excavation

B. Carrière, A, Barrois and A. Parrot (École Archéologique Française de Jerusalem): 1926

F. M. Abel, A. Barrois, A. Parrot and J. Darrous (École Archéologique Française de Jerusalem): 1927

A.33.3 Published Iron Age Ceramics

Carrière and Barrois 1927; Abel and Barrois 1928

A.34 Nebi Mend, Tell (Syria)

Tell Nebi Mend is located in west central Syria approximately 30 km south west of Homs (ancient Emessa) and only 4-5 km directly south of the Lake of Homs (also Lake Qattineh). The modern village of the same name surrounds the large mound, which lies between the Orontes River, to the east, and its tributary, the Mukadiyeh, to the west: the confluence of the two lies to the north. The large mound (10 ha.) rises

30 m above the surrounding plain, though thick alluvial deposits along the Orontes River imply an even more imposing sequence of occupation.

A.34.1 Ancient Iron Age Name

Qadeš (Old Babylonian, Bronze Age)
QDS/Kinza (Akkadian, Late Bronze Age)
Qidša (Akkadian, Amarna Letters, Late Bronze Age)
Qi-di-si (Neo-Assyrian)

Tell Nebi Mend was first identified with ancient Kadesh-on-the-Orontes in 1848 by W. M. Thompson (1848, 691-692). Subsequent geographical, textual and archaeological investigations have since confirmed the identification (Parr 1983, 99-100; 1991, 78; Conder 1881; 1882; 1883; W. Wright 1882). While no direct evidence for the Battle of Kadesh has been located, the position of the large tell between two rivers recalls the depiction of the city upon the Egyptian monuments of Ramesses II.

A.34.2 Seasons of Excavation

M. Pézard and C. L. Brossé (Musée du Louvre): 1921-1922
Director General of Antiquities and Museums, Syria: 1950

Pezard 1931; Sagona and Haymes 1992-1993; Whincop 2007

A.35 Pella (Jordan)

The ruins at *Tabaqat Fahl* have been associated with ancient Pella since the mid-nineteenth century. Located approximately 30 km south of the Sea of Galilee, the site is positioned amid the foothills of the eastern side of the Jordan Valley (biblical Gilead) and enjoys a commanding view of the Jordan River and surrounding plains. Despite this 'elevated' position, the site only lies at *c.* sea level (McNicoll *et al.* 1982a, 12). Nevertheless, summers are much cooler here than in the valley, and winters much milder. A perennial spring also provides sufficient water for settlement, which is supplemented by winter rains sufficient for spring crops. Parts of the site, which includes a tell (*Tell el-Husn*) and small settled tableland (*tabaqah* in Arabic), have been occupied for at least eight millennia. Pella is remembered as one of the Decapolis cities of Roman Syria (R. H. Smith 1993).

A.35.1 Ancient Iron Age Name

Pihilum (Semitic?, Late Bronze Age)
Pehel (Egyptian, Late Bronze Age)

The name of the site is absent from Iron Age literary sources (McNicoll *et al.* 1982a, 55). The Hellenised name, Pella, was introduced after the conquests of Alexander the Great, who was born at Pella in Macedonia, though the similarity between Pella and the Late Bronze Age name (Pihilum) has not been adequately explained (R. H. Smith 1993, 1174).

A.35.2 Seasons of Excavation

A.36 Qarqur, Tell (Syria)

Tell Qarqur is located within the northern reaches of the Gharb Valley, a fertile strip of Western Syria enclosed by the Jebel Anasariya to the west and the Idlib plateau to the east. The heavily occupied Amuq Plain lies less than 50 km (30 miles) to the north. The site itself consists of a double mound; a high southern tell rising *c.* 30 m above the plain, and an extensive (22 ha) lower city mound stretching to the north. While today Tell Qarqur lies 2 km east of the Orontes River, the course of the river in pre-Roman times would have run close to the western edge of the mound.

A.36.1 Ancient Iron Age Name

Karkara (Neo-Assyrian, Shalmeneser III's inscriptions)
Qarqar (Neo-Assyrian, Sargon II's inscriptions)

Tell Qarqur has long been identified with ancient Qarqar (Pritchard 1955; Yamada 2000, 154), site of two major battles between the Neo-Assyrians and Hama-led coalitions. The Neo-Assyrian records mention a battle at the time of Shalmeneser III

(853 BCE) and later during the reign of Sargon II (720 BCE); both battles were fought against a coalition of Syrian and Palestinian states. The focus of Assyrian attack was against the northern border of the important Kingdom of Hamath, and more specifically the royal city of Qarqar (Dornemann 2003a, 4). The site of Tell Qarqur today lies at the very northern end of the Hama district, a fact that lends support to its equation with ancient Qarqar, though no epigraphic evidence has been found at the site to confirm the identification.

A.38 Qrayé (Lebanon)

Situated in the foothills of the Lebanons, the village of Qrayé lies approximately eight km southeast of Saïda (Guigues 1939, 53). Along the western edge of the village, a Bronze and Iron Age cemetery was exposed early in the twentieth century. Little else has been published regarding the nature of the site.

A.38.1 Ancient Iron Age Name

The ancient name of Qraye is currently not known.

A.38.2 Seasons of Excavation

A.39 Rachidieh, Tell (Lebanon)

The site of Tell Rachidieh (also *Tell Habish*) lies approximately 5 km south of Tyre (Dunand 1940, 123); close enough to originally be considered part of Tyre. The tell is found on the fertile Plain of Tyre within 1 km of the Ras al-Ayn spring, one of the main sources of fresh water along the coastal plain. The proximity to water, arable land and timber lends the site a favourable position, one that the prosperous island of Tyre possibly lamented (Doumet-Serhal 2004a).

A.39.1 Ancient Iron Age Name

Uzu (Papyrus Anastasi, New Kingdom)

A.40 Ras al Bassit (Syria)

Ras al-Bassit lies on the Syrian coast between Lattakia (55 km to the south) and the mouth of the Orontes River (25 km to the north). The tell lies on a natural terrace overlooking the cove formed by a natural headland jutting out from the coast. An ancient necropolis is situated c. 75 m to the south west, between the tell and a large

classical acropolis. The shore line has changed over the centuries, and the buildings on the tell were once situated directly on the cove, though today the tell lies 100 m from the water (Courbin 1993a, Fig. 1). The tell itself is of a low height (the highest point is 6.40 m above sea-level) and modest size (< 1 ha.), though the late Iron Age settlement was apparently not restricted to the tell (Courbin 1986, 182).

A.40.1 Ancient Iron Age Name

R'S(Y) (Ugaritic, Late Bronze Age)
SNR(Y) (Ugaritic, Late Bronze Age)
Sinuru (Late Bronze Age)
Posideion (Greek, Herodotus)

Ras al-Bassit has strong connections with the Greek world and, significantly, retains an etymological echo of the classical Posideion (Boardman 1990, 170).

A.40.2 Seasons of Excavation

A.41 Ras Ibn Hani (Syria)

The site of Ras Ibn Hani is situated on the north Syrian coast c. 9 km north of Lattakia (Bounni *et al.* 1976, 233, 265). Sited on a 2.5 km long limestone promontory, the widely spread settlement (c. 15 ha) was protected on three sides by the sea, leaving only its eastern extent to be protected by fortifications (Bounni *et al.* 1978, Fig. 1). The natural topography provided unimpeded access to the Mediterranean, which encouraged participation in maritime trade whilst maintaining visible communication with Ugarit 4.5 km to the north-east (Bounni *et al.* 1998, 7-8). The moderate height (9 m) of the tell is indicative of limited occupation.

A.41.1 Ancient Name

B'IR/Biruti (Ugaritic, Late Bronze Age)
PU/Bi-i-ri (Akkadian, Late Bronze Age)

Since the discovery of a Late Bronze Age archive at Ras Ibn Hani, a number of proposals have been advanced regarding the identification of the ancient site; Biruti being the most popular candidate (Bounni *et al.* 1998, 92-93).

A.41.2 Seasons of Excavation

A.42 Rifa'at, Tell (Syria)

Tell Rifa'at occupies a commanding position between the Qoueiq River and the Jebel Sam'an, 35 km north of Aleppo. The rich red soil and relatively high water table of the undulating limestone country means the region is extremely fertile (Seton-Williams 1961, 69-70). The imposing tell, one of the largest in the area (c. 5 ha), rises 36 m above the surrounding plain. The mound itself, with its heavily eroded edges and steep slopes, is completely surrounded by the town of the same name, which since the 1870s occupies an area roughly equivalent to the lower settlement of the Iron Age (Seton-Williams 1967, Pl. V). Extensive quarrying of the site by local villagers, combined with heavy winter rains, has led to extensive damage of the tell.

A.42.1 Ancient Iron Age Name

Arpad (Aramaic, Old Testament)
Arpadda (Neo-Assyrian)

The identification of Tell Rifa'at with the ancient city of Arpad, capital of the Aramaean kingdom of Bit-Agusi, was proposed on etymological and geographical grounds prior to excavation (Kraeling 1918, 65). According to textual sources, the city and district of Arpad were seized by Aramaeans under their leader, Agusi, sometime in the first half of the 9th century BCE. From that point on Arpad appears to have played a significant role in the shifting politics of a region in dangerous proximity to the re-invigorated Assyrians.

A.43 Sarepta (Lebanon)

Located on the southern coast of Lebanon, Sarepta lies 22 km north of Tyre and 13 km south of Sidon. The site conforms to the classic pattern of settlement within Iron Age Lebanon, utilising either an island or promontory that gives access to at least two natural harbours. The modern village of Sarafand, approximately 2 km to the south, still makes use of the dual harbours. The low Iron Age tell (*Ras el-Qantara*) rises abruptly from the shore and extends in a gradual incline to the south and east, reaching a modest height of 15 m (Pritchard 1978, 71).

A.43.1 Ancient Iron Age Name

DRPT (Akkadian, Late Bronze Age)
Zarpat/Zarephath (Hebrew, Old Testament)
Sa-ri-ip-tu/Za-ri-ib-tu (Neo-Assyrian)
Sarepta (Greek)

The site of Sarafand has long been identified with ancient Sarepta, primarily based on etymological similarity (Pritchard 1975, 7-9). The 1969 discovery at Sarafand of a Greek inscription dedicated to "the holy god of Sarepta," supports this identification (Pritchard 1978, Fig. 16). When in 1971 an inscribed scarab was discovered with the four letters ***s r p t*** (Sarepta) the identification appears confirmed (Anderson 1988, 36). While literary sources depict Sarepta as a major city of the first millennium BCE, it is always coupled with Sidon and appears to have been one of many satellite fortresses within the Sidonian kingdom. The city also held significant fame within the early Christian period; remembered for the two miracles performed there by the biblical prophet Elijah (see 1 Kings 17:7*ff* and Luke 4:24-26).

A.44 Sheikh Hassan, Tell (Syria)

Tell Sheikh Hassan is situated in North Syria within the elbow of the Euphrates River, about half-way between Tawi and Mumbaqat. Originally situated on the left bank of the Euphrates River, the tell is now an island within Lake Assad as a result of the Tabqa Dam inundation (Anastasio *et al.* 2004, 300). The tell originally rose 14 m above the Euphrates River and possessed a diameter of over 250 m (c. 5 ha.), but today is a small (c. 0.5 ha.) island situated 500 m from land.

A.44.1 Ancient Iron Age Name

The ancient name of the site is currently not known.

A.44.2 Seasons of Excavation

A. Bounni (DGAM): 1972-1974
J. Cauvin (French): 1976

A.45 Shiyukh Fawqani, Tell (Syria)

One of a few Iron Age sites excavated as part of Euphrates dam salvage projects, Tell Shiyukh Fawqani is located on the left bank of the Euphrates equidistant between Jerablus, a few kilometres to the north, and Tell Shiyukh Tahtani, to the south (Bachelot and Fales 2005). While the lower town is not extensive (c. 4 ha.), the upper acropolis is particularly small (c. 1.3 ha.). From its position on the river terrace, the tell rises 25 m above the surrounding village, and 30 m above the alluvial plain (Luciani 2005, 719).

A.45.1 Ancient Iron Age Name

Bur-mar'ina (Neo-Assyrian)
^{Uru} Marina sa sade (Middle Assyrian)

A text excavated from the mound of Tell Shiyukh Fawqani mentions the city of Burmarina (Fales *et al.* 2005; Fales 1999), which is also mentioned in the Assyrian annals as a city conquered by Shalmeneser III. Bur-mar'ana is mentioned as belonging to Ahuni, man of Adini (Pritchard 1955, 277; Morandi Bonacossi 2000c).

A.45.2 Seasons of Excavation

Bachelot 1999; Luciani 2000; 2005; al-Bahloul *et al.* 2005; Makinson 2005

A.46 Sidon (Lebanon)

The ancient site of Sidon is identified with the modern city of Saïda located on the southern Lebanese coast 20 km south of Beirut. The ancient city occupied two distinct areas; the oldest town ('little Sidon') was built on a promontory between two bays, while 'Greater Sidon' was situated slightly inland from the coast (Doumet-Serhal 2004d, 102). It is impossible to determine the size and height of the tell, as the modern city of Saïda covers and obscures the ancient settlement.

A.46.1 Ancient Iron Age Name

Sidon (Hebrew, Old Testament)
DDN/Sidna (Akkadian)
Siduna (Amarna letters)
Sidunu (Neo-Assyrian)
SDN (Phoenician)

Ancient documents (e.g. Homer, Hebrew Bible) depict Sidon as the most important and ancient of the Levantine coastal cities, a portrait yet to be fully explored through archaeological means.

A.47 Sukas, Tell (Syria)

Tell Sukas is a site on the north Syrian coast bordering the Gabala plain, 26 km south of Lattakia. This highly fertile plain, c. 40 km in length, is surrounded by mountains to the north, east and south (Riis 1970, 7). The relatively small (c. 2 ha) mound rises 20 m above the natural promontory upon which it resides. The site is flanked by two small bays, to the north and south (Riis 1970, Fig. 3).

A.47.1 Ancient Name

Su-uk-su/Suksi (Ugaritic – Late Bronze Age)

No find from Tell Sukas has confirmed the name of the settlement, though Sukas corresponds well with Suksu, the name of a town at the southern frontier of the kingdom of Ugarit, a position that accords well with the location of Tell Sukas.

A.50 Tyre (Lebanon)

The plain of Tyre stretches 25 km south from the Litani River. The ancient site of Tyre was situated on an island opposite the plain. When Alexander laid siege to the city, he built a causeway joining the island to the mainland, thus creating today's peninsula. Tyre lies 94 km south of Beirut, midway between Sidon and Akko. At this point the coastal plain reaches its maximum width of 2 km. The ancient city of Tyre is today covered by the modern city of Sour, leaving much of the past settlement beyond reach.
